Until now there has been  
no state-of-the-art  
collection of the most  
important writings in  
automatic text  
summarization. This  
book presents the key  
developments in the field  
in an integrated  
framework and suggests  
future research areas.

With the rapid growth of the World Wide Web and electronic information services, information is becoming available on-line at an incredible rate. One result is the oft-decried information overload. No one has time to read everything, yet we often have to make critical decisions based on what we are able to assimilate. The technology of automatic text summarization is becoming indispensable for dealing with this problem. Text summarization is the

process of distilling the most important information from a source to produce an abridged version for a particular user or task. Until now there has been no state-of-the-art collection of the most important writings in automatic text summarization. This book presents the key developments in the field in an integrated framework and suggests future research areas. The book is organized into six sections: Classical Approaches, Corpus-Based Approaches,

Exploiting Discourse Structure, Knowledge-Rich Approaches, Evaluation Methods, and New Summarization Problem Areas. Contributors D. A. Adams, C. Aone, R. Barzilay, E. Bloedorn, B. Boguraev, R. Brandow, C. Buckley, F. Chen, M. J. Chrzanowski, H. P. Edmundson, M. Elhadad, T. Firmin, R. P. Futrelle, J. Gorlinsky, U. Hahn, E. Hovy, D. Jang, K. Sparck Jones, G. M. Kasper, C. Kennedy, K. Kukich, J. Kupiec, B. Larsen, W. G. Lehnert, C. Lin, H. P. Luhn, I. Mani, D. Marcu, M.

University Press  
A proven methodology  
every online Help writer  
can use immediately.--  
Advanced techniques:  
interactivity, graphics,

synchronized tables of  
contents, indexing, full-  
text search, and more.--  
By one of the first writers  
to build an enterprise-  
class online help system  
with HTML Help.The best  
way to create Help  
systems for Windows  
software is with  
Microsoft's advanced  
HTML Help system -- and  
the best way to use HTML  
Help is to leverage the  
power of DHTML and  
Cascading Style Sheets at  
the same time. Building  
Enhanced HTML Help with  
DHTML and CSS is the  
first book to show you

how to use all three  
technologies together.  
Written by one of the first  
developers to create an  
industrial-strength HTML  
Help system, it provides a  
proven methodology and  
step-by-step instructions  
for creating world-class  
help systems that  
leverage both advanced  
Web technologies and  
traditional publishing  
strategies. Learn how to  
plan and design online  
help systems. Discover  
what HTML Help brings to  
the table, including a  
graphical look and feel  
(managed through CSS)

and increased interactivity (managed through DHTML). Learn how to craft HTML templates and individual pages, define your HTML Help project, create navigation, compile and view your Help; then walk step-by-step through creating cascading style sheets and DHTML elements for online help. Klein covers automatic compilation, cross-referencing, tables of contents, and merging modular files into a single online help system. AI Australian National

Bibliography Cambridge University Press  
 First multi-year cumulation covers six years: 1965-70.  
Ethnomusicology Springer Science & Business Media  
 Ethnomusicology: A Research and Information Guide is an annotated bibliography of books, recordings, videos, and websites in the field of ethnomusicology. The book is divided into two parts; Part One is organised by resource type in categories of greatest concern to students and scholars.

This includes handbooks and guides; encyclopedias and dictionaries; indexes and bibliographies; journals; media sources; and archives. It also offers annotated entries on the basic literature of ethnomusicological history and research. Part Two provides a list of current publications in the field that are widely used by ethnomusicologists. Multiply indexed, this book serves as an excellent tool for librarians, researchers, and scholars in sorting through the massive

amount of new material that has appeared in the field over the past decades.

**Student's Book with Online Practice** Prentice Hall Ptr

The fourth campaign of the Cross-language Evaluation Forum (CLEF) for European languages was held from January to August 2003. Participation in this campaign showed

a slight rise in the number of participants from the previous year, with 42 groups submitting results for one or more of the different tracks (compared with 37 in 2002), but a steep rise in the number of experiments attempted. A distinctive feature of CLEF 2003 was the number of new tracks and tasks that were offered as pilot experiments. The aim was to try out new ideas and to encourage the development of new evaluation methodologies, suited to the emerging

requirements of both system developers and users with respect to today's digital collections and to encourage work on many European languages rather than just those most widely used. CLEF is thus gradually pushing its participants towards the ultimate goal: the development of truly multilingual systems capable of processing collections in diverse media. The campaign culminated in a two-day workshop held in Trondheim, Norway, 21-22 August,

immediately following the 7th European Conference on Digital Libraries (ECDL 2003), and attended by more than 70 researchers and system developers. The objective of the workshop was to bring together the groups that had participated in the CLEF 2003 campaign so that they could report on the results of their experiments. Elsevier

For the past three decades, ARBA has kept librarians up to date on the latest reference materials by providing high-quality, critical reviews. The 2007 edition of ARBA continues this great tradition by providing users with access to 1,600-plus

reviews of both print and online resources, written by more than 400 academic, public, and school librarians who are experts in their field. With coverage of nearly 500 subject disciplines, ranging from the social sciences and humanities to science and technology, users are guaranteed to find information on the latest resources available in the areas they are most trying to expand their collection. With ARBA in hand, collection development librarians can manage

their library's high standards of quality, and make the best use of their budget.

*Chemistry ABC-CLIO*

The continued place of Shakespeare in the classroom and how various critical theories inform current pedagogy are at the core of this conversation among an international group of educators. Its scope ranges from the theoretical background on the subject to new research and practical tips

for the teaching of Shakespeare. Digital Shakespeare, Shakespeare through performance, protecting Shakespeare, and Shakespeare for the new millennium are a sampling of the topics covered. Contributing to the discussion are representatives from Northwestern University, Colgate University, Western University, and Black Hills State. [Advances in Brain Inspired Cognitive Systems](#) Univ of California Press English File's unique,

lively and enjoyable lessons are renowned for getting students talking. Advanced Plus is for higher-level students who want to push the boundaries of their English learning. Advanced Plus is a genuine step-up from the Advanced level, providing students with new, more challenging input with a focus on concepts such as finer shades of meaning, using language flexibly, more abstract and complex topics and an appreciation of humour. This Advanced Plus

Student's Book with Online Practice is suitable for CEFR language level C1+. Key Features: Relevant, entertaining and authentic content with a clear structure that challenges students. Video listening activity is integrated in to each even-numbered File. These short documentaries and dramas make class time more dynamic and exciting. The conversation feature allows students to observe authentic, unscripted conversations

in English and learn and practise features of natural conversation to express their own ideas. Advanced Plus helps students develop relevant skills for higher-level exams, including practice activities in the Revise and Check sections and exams skills development in Writing sections. Further skills development available in 'Use of English' activities in the Workbook and on Online Practice. Online Practice provides students with learning tools and longer listening and reading

texts to further challenge them at this level outside of class. Teacher's Resource Centre allows teachers to manage all English File resources and teaching materials in one place online. Classroom Presentation Tool shows the course content on screen, with interactive features making it easier than ever for teachers to deliver heads-up, engaging lessons.

Identity and Pragmatic Language Use Routledge

The present volume contains some selected topics of current interest

around the world in the mathematical analysis of natural language. The book is divided into four sections: - analytical algebraic models - models from the theory of formal grammars and automata, with interest mainly in syntax - model-theoretic concepts in semantics or pragmatics, and - a final section containing some applications in computational linguistics. The varied perspectives illustrated in the book confirm that Mathematical Linguistics has finally introduced scientific

methods into a previously fuzzy field, through the use of mathematical reasoning. The text will contribute to a fruitful convergence between linguists, mathematicians, logicians, computer scientists, cognitive scientists and others interested in the formal treatment of natural language and the research of its properties.

Multilingual Information Access for Text, Speech and Images Springer

With this volume in honour of Don Walker, Linguistica

Computazionale continues the series of special issues dedicated to outstanding personalities who have made a significant contribution to the progress of our discipline and maintained a special collaborative relationship with our Institute in Pisa. I take the liberty of quoting in this preface some of the initiatives Pisa and Don Walker have jointly promoted and developed during our collaboration, because I think that they might serve to illustrate some outstanding

features of Don's personality, in particular his capacity for identifying areas of potential convergence among the different scientific communities within our field and establishing concrete forms of cooperation. These initiatives also testify to his continuous and untiring work, dedicated to putting people into contact and opening up communication between them, collecting and disseminating information, knowledge and resources, and

creating shareable basic infrastructures needed for progress in our field. Our collaboration began within the Linguistics in Documentation group of the FID and continued in the framework of the ICCL (International Committee for Computational Linguistics). In 1982 this collaboration was strengthened when, at COLING in Prague, I was invited by Don to join him in the organization of a series of workshops with participants of the various communities interested in the study, development,

and use of computational lexica.

Springer Science & Business Media

This ambitious undertaking is designed to acquaint students, teachers, and researchers with reference sources in any branch of English studies, which Marcuse defines as "all those subjects and lines of critical and scholarly inquiry presently pursued by members of university departments of English language and literature."

Within each of 24 major sections, Marcuse lists and annotates bibliographies, guides, reviews of research, encyclopedias, dictionaries, journals, and reference histories. The annotations and various indexes are models of clarity and usefulness, and cross references are liberally supplied where appropriate. Although cost-conscious librarians will probably consider the several other excellent literary bibliographies in print, such as James L. Harner's Literary

Research Guide (Modern Language Assn. of America, 1989), larger academic libraries will want Marcuse's volume.-- Jack Bales, Mary Washington Coll. Lib., Fredericksburg, Va. - Library Journal.  
The Facts on File Companion to Classical Drama John Benjamins Publishing  
In this issue of Library Technology Reports, Karen Coyle updates readers on the development of fundamental resources such as standards, data

elements, and term lists, showing how they fit together.
