AUGUSTUS CASSIUS

E-business & E-commerce Skyhorse Publishing Inc.

Due to ongoing advancements in technology, new legislation, and other innovations, the field of finance is rapidly changing. Developments in financial markets and investments necessitate that students be exposed to these topics as well as to financial management, the traditional focus of the introductory finance course. Introduction to Finance develops the three components of finance in an interactive framework that is consistent with the responsibilities of all financial professionals, managers, intermediaries, and investors in today's economy. To show the interrelationships between the areas of finance, the text emphasizes how investor activities monitor firms and focuses on the role of financial markets in channeling funds from investors to firms.

Gregor wakes up one morning to discover that he's become a "monstrous vermin". As he struggles to come to terms with his new body, he realizes that he's late for his job as a traveling salesman. First his mother, then his father and sister, knock on his bedroom door in an effort to get him out of bed. His supervisor, the office manager, arrives to inquire about his absence. With his parents pleading with the office manager outside his bedroom door and his sister sobbing in another room, Gregor manages to crawl to his bedroom door, open it, and reveal to everyone his shocking new form. His mother collapses, and the office manager runs out of the apartment in horror. His father

grabs a newspaper and the office manager's cane and chases Gregor around the living room. Gregor finally manages to crawl back to his bedroom door, but he gets stuck. His father firmly shoves him into the room and closes the door behind him.

"We also hear from guards, commandants, and bureaucrats whose lives were bound together with the inmates in an absurd drama. Regardless of their grade and duties, all agree that those responsible for these "excesses" were above or below them, yet never they themselves. Accountability is thereby diffused through the many strata of the state apparatus, providing legal defenses and "clear" consciences. Yet, as the concluding section of interviews - with the children and wives of the victims - reminds us, accountability is a moral and historical imperative."--BOOK JACKET.

The Governance of Corporate Groups Pearson

This book examines the economics of the travel and tourism industries and their customer markets - tourists. It clearly identifies the special factors within tourism which distinguish its analysis, in economic terms, from other activities.

Kaarle Krohn's Folklore Methodology was the first systematic attempt to state a method of studying folkloristic materials. For centuries scholars had collected folkloristic texts and had commented on

them, but they had not tried to formulate a method of investigating folklore. *Folklore Methodology* became the handbook for the great Finnish School of folklore research. It provided for its students a guide to the geographical research of traditional materials, a radical departure from the literary scholarship that had dominated folklore studies. Krohn's book explores the causes and modes of folklore diffusion, development, and destruction; it outlines the influences that cause change in folklore; it provides valuable insights into the nature of folklore; and, finally, it develops geographic methods for analyzing, classifying, and reconstructing individual items from the folk repertoire. While many developments have taken place since Krohn first published his guide, important new concepts of folklore research sprang from his efforts. For this reason, *Folklore Methodology* is mandatory reading for every serious student of folklore.

Sociolinguistic Perspectives Pearson UK Starting from a discussion of the theoretical underpinning of the place companies occupy in society, this book explores the consequences of adherence to free market contractualist theory, including the lack of regulatory control of a sufficiently robust nature. Professor Dine comments on the absence of a concept of governance of groups from a comparative perspective and considers the consequences of this absence for the conflict of laws. In particular, she highlights the tragic consequences of globalization by transnationals including polarization of income and environmental damage, and suggests a possible legal framework to prevent future damages.

Introduction to Finance Prentice Hall

A disarmingly hilarious and honest memoir of marriage and motherhood by a woman who realized she was sleepwalking through life and decided she needed to do something about it. "A love song to family and to life.... One of the happiest books to cross our paths in a very long time." —San Francisco Chronicle *The Slippery Year* chronicles her struggle to rediscover meaning and pleasure in life while navigating the comical ups and downs of cohabiting with a husband, a child, and a dog: mattress wars with her snoring mate, the psychological minefield of the school carpool line, and sending her son to sleep-away camp for the first time. Gideon manages to be laugh-out-loud funny while also reflecting beautifully and movingly on her quest to appreciate what she has.

This study on the potential of law to ensure the social responsibility of a company is an innovative and important study. It is a topical contribution to the sociology of market economies in transition. It is a unique effort to provide detailed practical guidance for the design of the company law in developing economies in general and the new Europe in particular. Christian Joerges, European University Institute Florence, Italy This book provides comprehensive analysis of the recent enlargement of the EU, shedding light on the rationale behind the EU's decisions to enlarge, examining the side effects these choices have on a range of EU policies and particularly on the effect of the Acquis on candidate countries. Emphasis is placed on the area of company law, which occupies a central part in a country's economic planning and therefore its commercial law. Past enlargements are thoroughly explained and the potential impact of the new political landscape in Europe in the wake of the popular rejection of the European Constitutional Treaty on future enlargements is evaluated. A comparative methodology for commercial law drafting in transition and developing economies is put forward and the book concludes with a complete draft of a model company law for transition (and developing) economies. The aim is to provide a template for discussion. This book will be of great interest to those interested in considering the influence that the prospect of EU membership has on transition countries in general, the emphasis being on laws vital to emerging market economies, particularly commercial and company law.

How to Read a Balance Sheet: The Bottom Line on What You Need to Know about Cash Flow, Assets,

Debt, Equity, Profit...and How It all Comes Together Cambridge University Press

This book presents a thoughtful inquiry into the nature and rationale of corporate governance. The authors address fundamental questions including; What is the balance between ownership and control?; For whose interests should the company be run?; What is the institutional balance between shareholders, directors and other potential stakeholders, including the economy? Professor Dine and Dr Koutsias consider how these issues are dealt with by the jurisprudence of three major and greatly influential jurisdictions; the USA, the UK, and Germany, and also reflect on why and how the current corporate governance context in some states is defined by social, political and historical developments. The authors argue that corporate governance is crucial for the identity of each country. What is revealed in the work is that when national corporate governance is thriving it allows space for democracy to flourish. Corporate governance scholars, policy makers, LLM and LLB students of company law and corporate governance, NGOs involving issues of inequality, poverty and democracy will find this important book an insightful resource.

In Central and Eastern European countries, inequalities for Roma families living in marginalized communities start early and are striking. Some of these inequalities reflect hard-wired family circumstances such as being born in poverty. Others reflect lack of opportunities such as limited access to those basic goods and services that are necessary not only for realizing one's

potential in life, but also for living with dignity. Gaps between Roma and non-Roma widen over the lifecycle in a way that reinforces and perpetuates disadvantage and translates into significantly unequal outcomes, despite the fact that Roma report having similar aspirations to those of their non-Roma neighbors. Promoting equal opportunities for disadvantaged Roma is not only an imperative for societies that want to call themselves fair, but it is also a smart economic choice, especially in those countries where populations are aging rapidly. Investing early, with a particular emphasis on supporting healthy and cognitive development for disadvantaged Roma children, is likely to go a long way in promoting fair chances. However, leveling the playing field in childhood is likely not enough: disadvantaged Roma continue being exposed to unequal opportunities at key nodes in their lives, such as when pursuing education or when looking for a job. Therefore, it is as important that a broader set of policies address some of the circumstances in which a large share of Roma children grow up, including access to employment and decent living conditions for their families. Implementing interventions that help overcome these interrelated barriers will

require strong ownership at the national level, coordinated policies across different ministries and government levels, and an integrated delivery system that is grounded in approaches that are customized to local conditions and implemented in a participatory manner. Good practices in Europe and elsewhere show that inclusion of the most disadvantaged - including many Roma - is possible and the current programming cycle for European Funds represents a unique opportunity to fund such interventions.
