and Basic Education
Reform Hampton Press
(NJ)
This interdisciplinary
book offers a critical
analysis of Thai
education and its
evolution, providing
diverse perspectives
and theoretical
frameworks. In the
past five decades
Thailand has seen
impressive economic
success and it is now a
middle-income country
that provides
development
assistance to poorer
countries. However,
educational and social
development have
lagged considerably
behind its globally
recognized economic
success. This
comprehensive book
covers each level of
education, such as
higher and

vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary

chapter suggests strategies to enable Thailand to escape “the middle income trap” and enhance the quality of its education to ensure its long-term developmental success.

Health Education Asian Development Bank Technology based intervention program for at-risk students. The ultimate goal of the program is to provide rigorous, standards-based intervention instruction in a way that returns students to basic grade-level program materials as soon as possible.

In all parts of Asia,
households devote
considerable
expenditures to private
supplementary
tutoring. This tutoring
may contribute to
students' achievement,
but it also maintains
and exacerbates social
inequalities, diverts
resources from other
uses, and can
contribute to
inefficiencies in
education systems.
Such tutoring is widely
called shadow
education, because it
mimics school systems.
As the curriculum in

the school system
changes, so does the
shadow. This study
documents the scale
and nature of shadow
education in different
parts of the region.
Shadow education has
been a major
phenomenon in East
Asia and it has far-
reaching economic and
social implications.

Deakin University Press
This book is the first work that comprehensively presents the accounts of Lia Eden, a former flower arranger who claims to have received divine messages from the Archangel Gabriel and founded the divine Eden Kingdom in her house in Jakarta. This book places Lia Eden's prophetic trajectory in the context of diverse Indonesian spiritual and religious traditions, by which hundreds of others also claimed to have been commanded by God to lead people and to establish religious groups. This book offers a fresh approach towards the rich Indonesian religious and spiritual

traditions with particular attention to the accounts of the emergence of indigenous prophets who founded some popular religions. It presents the history of prophetic tradition which remains alive in Indonesian society from the colonial to reform period. It also explores the ways in which these prophets rebelled against two hegemonies: colonial power in the past and Islamic orthodoxy in the present. The discussion of this book focuses on Lia Eden including her biography, claims to prophethood and divinity, the development of her group Eden Kingdom, her challenge to Islamic orthodoxy under the banner of the MUI (Indonesian

Ulama Council), her persecution by radical groups, her experiences in court trials and imprisonment, and public responses to her emergence. The discussion also covers other themes currently drawing public attention in Indonesia, such as pluralism, religious freedom, tolerance, discrimination against minorities, and secularisation.

Goldilocks Springer

A textbook for undergraduate and graduate courses in Play; also appropriate as a supplement for Child Development and Early Childhood Education courses.

With significantly expanded discussions on key topics, this text ties play directly to child development. Addressing the full spectrum of play-related topics, including age-group chapters, its coverage is quite comprehensive

and blends research, theory, and practical applications. Play and Child Development, Fourth Edition, is arranged to guide students through topics leading to a comprehensive understanding of play intended to help prepare them for guiding children's play in a number of contexts: preschools, elementary schools, park systems, and research programs. The text is developmentally-based, providing basic information about historical, theoretical, and practical approaches to promoting development through integrated play and learning approaches across various age or developmental levels. The book analyzes play

theories and play therapy; presents a history of play; and discusses current play trends. It explores ways to create safe play environments for all children, and how to weave play into school curricula. Finally, the authors examine the role of adults in leading and encouraging children's natural tendencies toward learning by playing. Special coverage includes a full chapter on play and children with disabilities, and the value of field trips in supporting learning. This book constitutes the refereed proceedings of the Second International Conference on

Innovative Technologies and Learning, ICITL 2019, held in Tromsø, Norway, in December 2019. The 85 full papers presented together with 4 short papers were carefully reviewed and selected from 189 submissions. The papers are organized in the following topical sections: application and design of innovative learning software; artificial intelligence and data mining in education; augmented and virtual reality in education; computational thinking in education; design and framework of learning systems; educational data analytics techniques and adaptive learning applications; evaluation, assessment and test; innovative

learning in education; mobile learning; new perspectives in education; online course and web-based environment; pedagogies to innovative technologies; social media learning; technologies enhanced language learning; and technology and engineering education.

Kasher in the Rye

Hassell Street Press

There is growing recognition that non-formal education (NFE) can play an important role in providing basic education for disadvantaged children and young people. However, development agencies and governments face difficult questions about how to manage the relationship between NFE and the formal education

system. This paper offers strategies to support and expand the provision of quality non-formal basic education without compromising its innovation and responsiveness to the needs of different groups. The paper first provides an overview of the history of debates, ideological perspectives and practice in NFE, and outlines key areas of relationships between NFE and the education field as a whole. It draws on examples from Mali, Mexico, Tanzania, India, Namibia, Burkina Faso, Trinidad and Tobago, Somaliland, Brazil, South Africa and the Latin American *Fey y Alegria* (Faith and Joy) movement.

This book constitutes the refereed proceedings of the 4th International Conference on Innovative Technologies and Learning, ICITL 2021, held in November/December 2021. Due to COVID-19 pandemic the conference was held virtually. The 59 full papers presented together with 2 short papers were carefully reviewed and selected from 110 submissions. The papers are organized in the following topical sections: Artificial Intelligence in Education; Augmented, Virtual and Mixed Reality in Education; Computational Thinking in Education; Design Framework and Model for Innovative learning; Education

Practice Issues and Trends; Educational Gamification and Game-based Learning; Innovative Technologies and Pedagogies Enhanced Learning; Multimedia Technology Enhanced Learning; Online Course and Web-Based Environment; and Science, Technology, Engineering, Arts and Design, and Mathematics.

Science Focus Pearson Education

Learning analytics is one of the most important research issues in the field of educational technology. By analyzing logs and records in educational databases and systems, it can provide useful information to teachers, learners, and decision makers – information which they

can use to improve teaching strategies, learning performances, and educational policies. However, it is a great challenge for most researchers to efficiently analyze educational data in a meaningful way. This book presents various learning analytics approaches and applications, including the process of determining the coding scheme, analyzing the collected data, and interpreting the findings. This book was originally published as a special issue of Interactive Learning Environments.

students develop the skills employers seek. Students need better support to succeed in their higher education studies and develop labour market relevant skills, which will help facili

Education in Thailand Grand Central Publishing The Science Focus Second Edition is the complete science package for the teaching of the New South Wales Stage 4 and 5 Science Syllabus. The Science Focus Second Edition package retains the identified strengths of the highly successful First Edition and includes a number of new and exciting features, improvements and components. Innovative Technologies and

Learning Pearson Education This volume examines contemporary Thailand. It captures aspects of Thai society that have changed dramatically over the past years and that have turned Thailand into a society that is different from what most people outside the country know and expect. The social transition of Thailand has been marked by economic growth, population restructuring, social and cultural development, political movements, and many reforms including the national health care system. The book covers the social, cultural, and economic changes as well as political situations. It discusses both historical contexts and

emerging issues. It includes chapters on social and public health concerns, and on ethnicity, gender, sexuality and social class. Most chapters use information from empirical-based and historical research. They describe real life experiences of the contributors and Thai

people who participated in the research.
