A perfect companion to the Mystical Lenormand cards. In the book, Regula Elizabeth Fiechter describes each card, both the image and the interpretation. Each card is also presented in combination to each other card. Just as you never enter the same river twice, each reader will find his and her own interpretation. To have trust in one's own intuition here is the key to a successful and helpful interpretation. This is a most interesting book that combines psychology with homeopathy. Philip Bailey describes in depth the personality profiles of some 35 polychrests. The last pages of the book cover a mix of psychological astrology and homeopathy when he explores the elements and some polychrests. Bailey provides detailed information on 35 major types, giving insight on diagnosis, mental and emotional traits, and physical characteristics. His broad profiles of major constitutional remedies give the reader a good overall picture of the personality type and therefore ways of remembering facts about the archetype, by having a unifying theory for each remedy.

Anyone can dowse. And Sig Lonegren shows you how. From the beginning of The Pendulum Book he will have you holding your pendulum perfectly still and waiting for it to indicate your search position, and then your 'Yes/No' response. And move it will (eventually) -and from that moment you are well on the way to becoming a dowser. Sig takes you through exercise after exercise, patiently building up your experience and confidence. It doesn't matter if you sometimes get the wrong response-Sig's system allows for this and he shows you how you can move forward and add this to your experience. Soon you will progress to the 'Maybe' response, the Leading Edge concept, and

Triangulation -the simplest way to home in on something hidden from you. Now there is nothing to hold you back. You will refine your techniques, enabling you to tell when you have moved over an object, learn how to look for drinking water, and even follow your plumbing and drainage systems. And, if you are into lay lines and sacred-energy sites, there is no better way of detecting them than by dowsing. Should you want to test your new-found skills with other dowsing tools, there is also information on using Y-rods (forked sticks), the bobber (long branch), and L-rods (wire pistol grips). The Pendulum Box guarantees hours of absorbing fun with much practical application. Get dowsing!

There is a large gap between engineering courses in tensor algebra on one hand, and the treatment of linear transformations within classical linear algebra on the other. This book addresses primarily engineering students with some initial knowledge of matrix algebra. Thereby, mathematical formalism is applied as far as it is absolutely necessary. Numerous exercises provided in the book are accompanied by solutions enabling autonomous study. The last chapters deal with modern developments in the theory of isotropic and anisotropic tensor functions and their applications to continuum mechanics and might therefore be of high interest for PhD-students and scientists working in this area.

"Sir Nathaniel William Wraxall, 1st Baronet (8 April 1751 ? 7 November 1831) was an English author....He visited Portugal and was presented to the court, of which he gives a curious account

in his Historical Memoirs; and in the north of Europe he made the acquaintance of several Danish nobles who had been exiled for their support of the deposed Queen Caroline Matilda, sister of George III. Wraxall at their suggestion undertook to endeavour to persuade the king to act on her behalf. He was able to secure an interview with her at Zell in September 1774. His exertions are told in his Posthumous Memoirs. As the queen died on 11 May 1775, his schemes came to nothing and he complained that he was out-of-pocket, but George III took no notice of him for some time."--Wikipedia.
