HARRISON MAURICIO

[French Faux Amis](#) Routledge

This book considers the post-68 French city as a prism through which to understand the contemporary world and France's specificity within it. The reader is invited to join in a series of exploratory strolls through texts, buildings, and neighborhoods, and thereby share in a process of discovery. Zeroing in on international architectural debates, a range of key Parisian exhibitions, and major urban design decisions in Paris, Montpellier, and Lille, Yaari unravels an often-acerbic French critique of both modern and postmodern positions on culture, technology, and the city. This critique—stemming from the competing claims of national identity, the ethics of architecture and display, and an anthropologically informed revision of prevailing views on the city—has sparked in France a passionate search for a third path, which the author proposes to term *après-moderne*. Breaking new ground in the field of French Studies through cultural analysis of the contemporary city, this study brings new insight to scholars and professionals in architecture and urbanism, and will interest all others for whom France and cities in general hold special appeal.

Comparative Stylistics of French and English John Benjamins Publishing

Errors are information. In contrastive linguistics, they are thought to be caused by unconscious transfer of mother tongue structures to the system of the target language and give information about both systems. In the interlanguage hypothesis of second language acquisition, errors are indicative of the different intermediate learning levels and are useful pedagogical feedback. In both cases error analysis is an essential methodological tool for diagnosis and evaluation of the language acquisition process. Errors, too, give information in psychoanalysis (e.g., the Freudian slip), in language universal research, and in other fields of linguistics, such as linguistic change. This bibliography is intended to stimulate study into cross-language, cross-discipline and cross-theoretical, as well as for language universal, use of the numerous, but sometimes hard to come by, error analysis studies. 5398 titles covering the period 1578 up to 1990 (with work in more than 144 languages and language families) are cited, cross-referenced, and described. The subject areas covered are numerous. For example: Theoretical Linguistics (Linguistic Typology, Cognitive Linguistics), Historical Linguistics (Language Change), Applied Linguistics (e.g. Speech Disorders), Translation, Mother Tongue Acquisition, Foreign Language Learning (Negative Transfer, Intralingual and Interlingual Errors), Psychoanalysis (Slips of the Tongue), Typography, Shorthand, Clinical Linguistics and Speech Pathology, Reading Research, Automatic Error Detection, Contact Linguistics (Code-switching, Interference), etc.

In *The Headless Republic*, Jesse Goldhammer explores how the French revolutionaries retrieved a set of ideas about founding violence from the classical Romans and early Christians and incorporated it into postrevolutionary debates that echoed into the twentieth century. By linking sacrifice as expressed in revolutionary practices to modern French theory, Goldhammer shows how ancient ideas of violent political renewal made their way into the contemporary age. Goldhammer elucidates the theoretical and practical significance of sacrificial violence during the Revolution, and then turns his attention to postrevolutionary intellectuals whose work is inspired by the founding sacrifices of the French Republic. Showing how Georges Bataille, Joseph de Maistre, and Georges Sorel adapted concepts of sacrifice to their own particular political agendas—whether reactionary or revolutionary?Goldhammer challenges conventional readings of these three thinkers as "bloodthirsty

intellectuals." Instead, he argues, their work reveals the limits of violence as an agent of political change and attacks the forms of violence later adopted by fascist regimes. More broadly, Goldhammer makes the case for including ancient concepts of collective bloodshed in the modern lexicon of political violence.

In *Sociology of Culture and of Cultural Practices*, Laurent Fleury presents a synthesis of research and debate from France and the United States. He traces the development of the sociology of culture from its origins (Weber and Simmel) and examines the major trends that have emerged in this branch of sociology. Fleury also raises issues of cultural hierarchy, distinction, and legitimate culture and mass culture and focuses on new areas of research, including the role of institutions, the reception of works of art, aesthetic experience, and emancipation through art.

Politeness and impoliteness are not just expressed by words. People communicate polite and impolite attitudes towards each other through their intonation, tone of voice, their facial expressions, their gestures, the positioning of their bodies towards each other, and so on. This volume brings together eleven empirical studies that investigate these various modalities of im/politeness across signed, spoken and written languages, plus a detailed introductory chapter that establishes a framework for the multimodal investigation of im/politeness. The papers cover a range of languages and cultures, including Swiss German Sign Language, Catalan Sign Language, English (as a native language and as a lingua franca), Korean, Catalan, Persian, Japanese and Spanish. Using a range of data sources and state-of-the-art methodologies, the papers reveal that these multimodal features are essential aspects of im/politeness across different languages, cultures and modes of interaction. Put together, the findings from these studies lay the groundwork for a new understanding of im/politeness which is fundamentally multimodal.

The Treasury of Knowledge and Library of Reference ... John Benjamins Publishing

This book approaches the topic of false friends from a theoretical perspective, arguing that false friends carry out a positive role as a cognitive device, mainly in literature and jokes, and suggesting some pragmatic strategies in order to restore the original sense of a text/utterance when a given translator (or a foreign speaker) falls victim to false friends. This theoretical account is successively verified by appealing to texts from the fields of literature, science, philosophy, journalism, and everyday speech.

[Thoughts of Cicero](#) Saul Rosenthal

Author Mary-Lou Weisman and her husband, Larry, didn't want to tour a foreign country; they wanted to become part of it. They were eager to pierce the tourist veil, and get as close to the essence of the culture as they could. No more observing from the outside with their noses pressed to the glass. They yearned for someone to open the door and invite them to step right in and make themselves at home. They wanted to become so French that even Americans wouldn't like them. In September of 2003, the Weismans arrived in Provence, France, for the first of four, monthlong stays. Playing House in Provence follows them on their sometimes wonderful, sometimes humiliating, always playful pursuit, as they learn that feeling disoriented and stupid on a daily basis can be fun. So can looking up French words they need to ask for direction so est la pharmacie only to realize there's no chance they will understand the answer. Funnier, smarter, and more wickedly honest than any memoir about Provence. Sybil Steinberg Contributing Editor, Publishers Weekly
