Teach Yourself HTML, CSS, and JavaScript All in One combines
these three fundamental web development technologies into one
clearly written, carefully organized, step-by-step tutorial that
expertly guides the beginner through these three interconnected
technologies. In just a short time, you can learn how to use HTML,
Cascading Style Sheets (CSS), and JavaScript together to design,
create, and maintain world-class websites. Each lesson in this
book builds on the previous ones, enabling you to learn the

essentials from the ground up. Clear instructions and practical,
hands-on examples show you how to use HTML to create the
framework of your website, design your site's layout and
typography with CSS, and then add interactivity with JavaScript
and jQuery. Step-by-step instructions carefully walk you through
the most common web development tasks. Practical, hands-on
examples show you how to apply what you learn. Quizzes and
exercises help you test your knowledge and stretch your skills.

Build interactive, data-driven websites with the potent combination of open source technologies and web standards, even if you have only basic HTML knowledge. In this update to this popular hands-on guide, you'll tackle dynamic web programming with the latest versions of today's core technologies: PHP, MySQL, JavaScript, CSS, HTML5, and key jQuery libraries. Web designers will learn how to use these technologies together and pick up valuable web programming practices along the way—including how to optimize websites for mobile devices. At the end of the book, you'll put everything together to build a fully functional social networking site suitable for both desktop and mobile browsers. Explore MySQL, from database structure to complex queries Use the MySQLi extension, PHP's improved MySQL interface Create dynamic PHP web pages that tailor themselves to the user Manage cookies and sessions and maintain a high level of security Enhance the JavaScript language with jQuery and jQuery mobile libraries Use Ajax calls for background browser-server communication Style your web pages by acquiring CSS2 and CSS3 skills Implement HTML5 features, including geolocation, audio, video, and the canvas

Learn AngularJS, JavaScript and jQuery Web Application
 Development In just a short time, you can learn the basics of the
 JavaScript language, jQuery library, and AngularJS framework –
 and find out how to use them to build well-designed, reusable

components for web applications. Sams Teach Yourself AngularJS,
 JavaScript, and jQuery All in One assumes absolutely no previous
 knowledge of JavaScript or jQuery. The authors begin by helping
 students gain the relevant JavaScript skills they need, introducing
 JavaScript in a way specifically designed for modern AngularJS
 web development. Each short, easy lesson builds on all that's
 come before, teaching new concepts and techniques from the
 ground up, through practical examples and hands-on problem
 solving. As you complete the lessons in this book, you'll gain a
 practical understanding of how to provide rich user interactions in
 your web pages, adding dynamic code that allows web pages to
 instantly react to mouse clicks and finger swipes, and interact
 with back-end services to store and retrieve data from the web
 server. Learn how to: Create powerful, highly interactive single-
 page web applications Leverage AngularJS's innovative MVC
 approach to web development Use JavaScript in modern
 frameworks Implement JavaScript, jQuery, and AngularJS together
 in web pages Dynamically modify page elements in the browser
 Use browser events to interact with the user directly Implement
 client-side services that interact with web servers Integrate rich
 user interface components, including zoomable images and
 expandable lists Enhance user experience by creating AngularJS
 templates with built-in directives Bind user interface elements
 and events to the data model to add flexibility and support more
 robust interactivity Define custom AngularJS directives to extend
 HTML's capabilities Build dynamic browser views to provide richer
 user interaction Create custom services you can integrate into
