WIRED REMOTE RACE CAR Penguin
BrewDog's first beer book is a brilliant

intro to the world of craft beer. It includes a look at what makes craft beer great and how it's made, explains how to understand different beer styles, how to cook with beer and match beers and food, right through to how to brew your own at home. It's not just about BrewDog's beers either - plenty of other excellent breweries and their beers from around the world are featured. This book is both a window into the BrewDog world and a repository of essential craft beer information. Designed in the highly individual style of the brand, the book also includes quirky features such as spaces to place your drop of beer once you've ticked a particular beer off your 'to-drink' list and pull-out beer mats.

Science has never been so easy--or so much fun! With *The Everything Kids' Science Experiments Book*, all you need to do is gather a few household items and you can recreate dozens of mind-blowing, kid-tested science experiments. High

school science teacher Tom Robinson shows you how to expand your scientific horizons--from biology to chemistry to physics to outer space. You'll discover answers to questions like: Is it possible to blow up a balloon without actually blowing into it? What is inside coins? Can a magnet ever be "turned off"? Do toilets always flush in the same direction? Can a swimming pool be cleaned with just the breath of one person? You won't want to wait for a rainy day or your school's science fair to test these cool experiments for yourself!

At last, fans of the LEGO BOOST robot building kit have the learning resource they've been missing! Enter *The LEGO BOOST Activity Book*: a full-color guide that will help readers learn how to build and code LEGO creations that move, explore their environment, grab and lift objects, and more. The LEGO BOOST kit lets younger builders create fun, multifunctional robots by combining bricks with code, but it doesn't come with a manual. With the help of this complete guide to the LEGO BOOST set, you'll be on

your way to building and programming BOOST robots in no time. You'll begin your exploration by building a basic rover robot called MARIO to help you learn the fundamentals of the BOOST programming environment. Next, you'll add features to your rover to control its movement and make it repeat actions and react to colors and sounds. Once you've learned some programming basics, you'll learn how to program your robot to do things like follow lines on the ground, scan its environment to decide where to go, and even play darts. As final projects, you'll create two complete robots: BrickPecker to help you organize your bricks and CYBOT, a robot that talks, shoots objects, and executes voice commands. As you advance through the book, optional lessons aim to deepen your understanding of basic robotics concepts. Brain BOOSTer sections let you dig into the math and engineering behind your builds while a host of experiments seek to test your skills and encourage you to do more with your robots. With countless illustrations, extensive explanations, and a wealth of coding examples to guide you, The LEGO BOOST Activity Book is sure to take you from

beginning builder to robotics whiz and give your robot-building brain that needed boost!
