DANIELA HULL

Review and Herald Rowman & Littlefield

Revolutionary Struggles and Girls' Education centers on the education system of North-Ethiopia's (in)ability to address discrimination and enable transformation of "hard-lived" gender norms, which therefore continue to hinder girls' educational performance, even after parity is reached.

Gondar, Ethiopia University of Michigan Press ELT

This book discusses reforms that should be undertaken in secondary education to support Ethiopia's transition from a low- to middle-income economy. The most critical reform identified is the introduction of a flexible curriculum that serves the needs of all students, including those who may not pursue higher education.

Walia World Bank Publications

Includes special issues.

McDougal Littell World Geography UNESCO Publishing

Specifically tailored for the new AQA GCSE Science (9-1) specifications, this third edition supports your students on their journey from Key Stage 3 and through to success in the new linear GCSE qualifications. This series help students and teachers monitor progress, while supporting the increased demand, maths, and new practical requirements.

Journal of Ethiopian Studies ABC-CLIO

In 1971, teachers Barb and Clark Olson, together with the two small children, moved to Gondar, Ethiopia. For four years, Barb kept a detailed journal about the family's experiences, recording people's stories and events both domestic and political, local and national, chronicling the early days of the revolution, as well as the drought and famine moving across this East African nation. Barb now lives with her husband in Springfield, Illinois where she writes and is a community organizer. This book is a "Thank you" to the people of Gondar and a tribute to the resiliency and vision of Ethiopia's youth. Several of these stories are published separately, including the children's book, Christmas in Gondar, Five Ethiopian Stories, available soon.

Education for All 2000-2015: Achievements and challenges Xlibris Corporation

Progress in literacy and learning, especially through universal primary education, has done more to advance human conditions than perhaps any other policy. Our generation has the possibility of becoming the first generation ever to offer all children access to good quality basic education. But it will only happen if we have the political commitment -- at the country as well as at the international level -- to give priority to achieve this first in human history. And it will only happen if also those who cannot afford to pay school fees can benefit from a complete cycle of good quality primary education. Investment in good quality fee-free primary education should be a cornerstone in any government's poverty reduction strategy.

Ethiopian Publications John Wiley & Sons

Peterson's Private Secondary Schools 2014-15 is a valuable resource to help parents and students evaluate and choose from more than 1,100 schools in the United States, Canada, and throughout the world. Featured institutions include independent day schools, special-needs schools, and boarding schools-including junior boarding schools for middle school students. Profiles offer detailed information on areas of specialization, location/setting, affiliation, accreditation, tuition and aid availability, student body, faculty, academic programs, athletics, computers and campus technology, and admission information. Dozens of in-depth descriptions and displays offer photos of students and school campuses, as well as essential information to help parents find the right private secondary school for their child. Extra Summer Programs section offers additional details on fascinating summer opportunities at private secondary schools.

Indianapolis Monthly is the Circle City's essential chronicle and guide, an indispensable authority on what's new and what's news. Through coverage of politics, crime, dining, style, business, sports, and arts and entertainment, each issue offers compelling narrative stories and lively, urbane coverage of Indy's cultural landscape.

Current Index to Journals in Education American Academic Press

Biology is where many of science's most exciting and relevant advances are taking place. Yet, many students leave school without having learned basic biology principles, and few are excited enough to continue in the sciences. Why is biology education failing? How can reform be accomplished? This book presents information and expert views from curriculum developers, teachers, and others, offering suggestions about major issues in biology education: what should we teach in biology and how should it be taught? How can we measure results? How should teachers be educated and certified? What obstacles are blocking reform?

High-School Biology Today and Tomorrow World Bank Publications

A visual approach to world geography.

Education in Ethiopia Springer

The aim of this book is to show brief concept of genetics based on selected ideas and related facts. Additional information is presented in the introduction, with a chronological list of important discoveries and advances in the history of genetics, in an appendix with supplementary data in tables, and in references. This book is written for two kinds of readers: for students of biology and genetics, as an introductory overview; and for their teachers, as a teaching aid. Other interested individuals will also be able to gain information about current developments and achievements in this rapidly growing field.

This publication reflects the results of the Ethiopian education reform as well as the exceptional efforts that multiethnic Ethiopia undertakes in order to cope with the challenges arising from the population explosion. More than 55 per cent of the 77 million Ethiopians are under the age of 18 years. The great social and political changes started in Ethiopia at the beginning of the 1990s have resulted in the substitution of the educational system based on Amharic and English by one which uses a multilingual approach. According to the Ministry of Education 22 out of the 84 languages spoken in Ethiopia are now used as media of instruction in primary schools. The book presents the lectures delivered at the workshop "On the Results of the Reform in Ethiopia's Language and Education Policy" held at Addis Ababa University in April 2006 by Ethiopian education experts and a German research team. Their contribution has facilitated a subsumption into the historical context and has given insight into the analyses of the use of 8 Ethiopian languages in primary schools in different regions of the country.

Starting Life as a Midwife World Bank Publications

The Focus On Elementary Geology Student Textbook, 3rd Edition introduces young students to the scientific discipline of geology. Students will explore geology in everyday life; the history of geology; tools used by geologists; rocks, minerals, and soil; the layers that make up Earth; volcanoes and earthquakes; the geosphere; the atmosphere; the hydrosphere; the biosphere and cycles; the geomagnetic field and the magnetosphere; how the different part of Earth work together; and more. The Focus On Elementary Geology Student Textbook, 3rd Edition has 12 full-color chapters, a glossary-index, and pronunciation guides. 114 pages. Grades K-4.

Abolishing School Fees in Africa Peterson's

This book is the most complete, accessible, and up-to-date resource for Ethiopian geography, history, politics, economics, society, culture, and education, with coverage from ancient times to the

present. • Sidebars provide brief encapsulations of topics relevant to Ethiopian history, society, and culture • Figures and tables summarize statistics quoted in the text, offering up-to-date data on the economy of the country and other aspects of Ethiopian life • A reference section provides extensive information such as addresses, telephone numbers, and websites of major institutions and businesses and economic, cultural, educational, exchange, government, and tourist bureaus • An annotated bibliography facilitates in-depth research

Thinking Outside the Box Peterson's

Lists books, pamphlets, annuals, and periodical articles published during the year.

The Impact of the COVID-19 Pandemic on Education Peterson's

Peterson's Private Secondary Schools: Traditional Day and Boarding Schools is everything parents need to find the right day or boarding private secondary school for their child. Readers will find hundreds of school profiles plus links to informative two-page in-depth descriptions written by some of the schools. Helpful information includes the school's area of specialization, setting, affiliation, accreditation, subjects offered, special academic programs, tuition, financial aid, student profile, faculty, academic programs, student life, admission information, contacts, and much more.

Math Starters UNESCO Publishing

This book sets out with the question why Ethiopia a country with one of the oldest still existing state-formations in the world and a farming population that has domesticated a number of indigenous food products, including coffee, oilseeds and Eragrostis teff - remains one of the poorest in the world. To answer this question the authors review the history of Ethiopia from the earliest centuries A.D. until the 21st century dispelling a number of prevalent myths in the process. The book covers topics such as ethnicity (a hot issue in today's Ethiopian politics), international relations with especially Britain and Italy, and the country's lack of technical and economic progress. A survey of the current situation in Ethiopia sets the scene for comparisons with other countries. An examination of the history of the West illustrates how the autonomy of intellectual inquiry could promote a spiral of knowledge, pave the way for the Industrial Revolution and allow western countries to attain the highest standard of living in the world. A review of some East Asian countries (Japan, South Korea, and Taiwan) exemplifies how they could catch-up with the West. Against the backdrop of these studies, the authors find the basic causes for Ethiopia's poverty to be missed or messed-up opportunities to adopt available scientific knowledge and technology. Premising that a decent living standard, a catch-up, should be the only reasonable goal also for Ethiopian citizens, the authors propose that the country must emphasize promotion of a) knowledge and information (rather than focusing numbers of school children and schools) and of b) entrepreneurship in all economic sectors. To boost these requirements successfully, the authors argue that all involved in the present development agenda need to think outside the box and reassess at least two common assumptions about Ethiopia's future namely, that only heavy-handed state guidance can bring about rapid development and that peasants and pastoralists are ignorant and must be told what to do.

Private Independent Schools AuthorHouse

This volume explores the unique challenges midwifery graduates face as they move into practice. It identifies the similarities and differences in midwifery education, regulation, and clinical practice faced by graduate midwives in all continents, examining the various support systems available for graduate midwives in many countries, and identifying the common strategies (formal and informal) and approaches that have proved to be effective in supporting midwifery graduates. The book

volume brings together the experiences of new midwives starting out in registered practice, to share the challenges and triumphs during their transition to confident practitioners. It identifies, explains and details both established and innovative new mechanisms in place to support new midwives in each country, and examines the effects the experiences of transitioning to practice may have on future professional practice, resilience and sustainability. Lack of support during the new-graduate transition to practice has been associated with early attrition from the midwifery profession. Stress, disillusion, and horizontal violence have been identified as factors that influence midwifery attrition rates. Exploration of the various support mechanisms currently available in different countries may stimulate the sharing of best practices in providing new midwives with transition to practice programmes and generate further research. Each chapter is harmonized to facilitate the comparison between countries, and the maternity services context is explained using each country's specific legislation, regulation and registration of midwives. The preparation of midwifery students for qualified practice is outlined to explain how midwifery students are trained and socialized into the profession, mentored in their placements and then transitioned to registered midwife status. This book appeals to midwives, managers, educators, and newly graduated interested in international midwifery practice.

Revolutionary Struggles and Girls' Education Real Science-4-Kids

Peterson's Private Secondary Schools is everything parents need to find the right private secondary school for their child. This valuable resource allows students and parents to compare and select from more than 1,500 schools in the U.S. and Canada, and around the world. Schools featured include independent day schools, special needs schools, and boarding schools (including junior boarding schools for middle-school students). Helpful information listed for each of these schools include: school's area of specialization, setting, affiliation, accreditation, tuition, financial aid, student body, faculty, academic programs, social life, admission information, contacts, and more. Also includes helpful articles on the merits of private education, planning a successful school search, searching for private schools online, finding the perfect match, paying for a private education, tips for taking the necessary standardized tests, semester programs and understanding the private schools' admission application form and process.

Ethiopia Observer National Academies

Understanding Your Refugee and Immigrant Students is an excellent resource for educators who work with refugees and immigrants. This well-researched volume-including interviews with students from the profiled countries-provides a wealth of information about the specific schooling traditions, practices, circumstances, and expectations that follow these individuals to their new homes in North America and influence their learning experience. The author has focused her research on 18 countries that contribute a majority of refugees and immigrants to the United States: Afghanistan, Bosnia-Herzegovina, Croatia, the Dominican Republic, Ecuador, El Salvador, Ethiopia, Guatemala, Honduras, India, Iran, Laos, Liberia, Peru, Somalia, Sudan, and the Ukraine. Each country profile features: statistics about the country, a historical synopsis, an overview of the country's official education policy, cultural perspectives, and a problem-solution section containing classroom strategies. The linguistic systems of the languages featured are also included for teacher reference. Also included is information about teacher-student relationships, discipline and class management, and appropriate non-verbal communication. This volume provides invaluable insight into refugee and immigrant students' cultural and educational backgrounds and gives instructors the tools to translate this information into effective classroom strategies.
