The Path to the Spiders' Nests Cabi

Landslide Risk Management comprises the proceedings of the International Conference on Landslide Risk Management, held in Vancouver, Canada, from May 31 to June 3, 2005. The first part of the book contains state-of-the-art and invited lectures, prepared by teams of authors selected for their experience in specific topics assigned to them by the JTC-1 Committee. The second part is a selection of papers submitted to the conference, most of which serve as case-history illustrations of projects on landslide risk management. This reference work presents the current status of landslide risk management as viewed by experts from around the world.

Il coro sulla scala University of Chicago Press

Brooklyn firefighter Griff has kept his crush on his friend and teammate, Dante, secret. But when a broke Dante suggests they do gay porn, Griff will live out his fantasies on camera. Will their friendship and their careers survive?

Il Grande dizionario Garzanti della lingua italiana Springer Science & Business Media

During a time of persecution in sixteenth-century England, the lyrics of this well-known carol were used to teach children Christian doctrine. Each verse symbolizes elements of the Christian faith.

Creditocracy OR Books

Presents board books which help find out where the fingerworms have been and where they live now.

Archeologia Capstone

Thoughtful teen fiction at its finest. Kate Malone: popular straight A student, long-distance runner, pillar of strength to her single-parent dad. She thinks she can handle anything. Until it all goes wrong. Kate's life is spiraling out of control - and Kate's about to find out how exhilarating that can be.

Miracle Fair: Selected Poems of Wislawa Szymborska

Simon and Schuster

Hide-and-seek fun with sturdy sliders! This silly but stylish slider book is sure to give little ones a giggle. They'll love joining in a game of hide-and-seek as they move the sliders to reveal the dinosaur hiding in every scene. Is it behind the sofa? Or in the

shower? Just push the slider to find out! With beautiful artwork from Lydia Nichols, the whole family will enjoy reading and playing with this fresh new novelty series.

Abruzzo Conundrum International

The International Federation of Library Associations and Institutions (IFLA) is the leading international body representing the interests of library and information services and their users. It is the global voice of the information profession. The series IFLA Publications deals with many of the means through which libraries, information centres, and information professionals worldwide can formulate their goals, exert their influence as a group, protect their interests, and find solutions to global problems.

The Selfish Giant Independently Published

Who could be hiding behind the lift-the-flaps in this uniquely-shaped board book? Brimming with colorful art that children will want to pore over, this clever book is full of hidden animals, each making a different sound. Can you figure out who each one is? Lift the triangular flaps to see who peeks out! This beautifully designed book is sure to provide a delightfully interactive experience.

My Christmas Picture Book PONS

With the current interest in the environmental and economic sustainability of dairy farming, grass forage crops have emerged as a potential solution to some of the nutrient management problems now encountered on intensively managed dairy farms. The expansion and reintegration of grass-based systems into the mainstream of dairying systems will require a major paradigm shift involving economic, social and ecological, as well as biological factors. This book examines the role of grass in milk production in sustainable agricultural ecosystems. It provides a current summary of the role of grass in dairy cattle systems, including the breeding, management, storage, feeding and economics of grass for both lactating and dry dairy cows. Written by leading specialists from Australia, Europe, New Zealand, North and South America, this is an essential reference source for researchers, dairy industry professionals and advanced students of forage and dairy cattle nutrition.

The Pirates! In an Adventure with Scientists Millbrook Press

Pin is a bawdy, adolescent cobbler's assistant, both arrogant and insecure who - while the Second World War rages - sings songs and tells jokes to endear himself to the grown-ups of his town - particularly jokes about his sister, who they all know as the town's 'mattress'. Among those his sister sleeps with is a German sailor, and Pin dares to steal his pistol, hiding it among the spiders' nests in an act of rebellion that entangles him in the adults' war.

Autobiography of Miss Cornelia Knight, Lady Companion to the Princess Charlotte of Wales Walter de Gruyter GmbH & Co KG

It seems like pretty much everybody - homeowners, students, those who are ill and without health insurance, and, of course, credit card holders - is up to their neck in debt that can never be repaid. 77% of US households are seriously indebted and one in seven Americans has been pursued by debt collectors. The major banks are bigger and more profitable than before the 2008 crash, and legislators are all but powerless to bring them to heel. In this forceful, eye-opening survey, Andrew Ross contends that we are in the cruel grip of a creditocracy - where the finance industry commandeers our elected governments and where the citizenry have to take out loans to meet their basic needs. The implications of mass indebtedness for any democracy are profound, and history shows that whenever a creditor class becomes as powerful as Wall Street, the result has been debt bondage for the bulk of the population. Following in the ancient tradition of the jubilee, activists have had some success in repudiating the debts

of developing countries. The time is ripe, Ross argues, for a debtors' movement to use the same kinds of moral and legal arguments to bring relief to household debtors in the North. After examining the varieties of lending that have contributed to the crisis, Ross suggests ways of lifting the burden of illegitimate debts from our backs. Just as important, Creditocracy outlines the kind of alternative economy we need to replace a predatory debt-money system that only benefits the 1%.

Handbook of Ancient Roman Marbles Bloomsbury Publishing

It is my contention that the table of intentionality (rationality, mind, thought, language, personality etc.) that features prominently here describes more or less accurately, or at least serves as an heuristic for, how we think and behave, and so it encompasses not merely philosophy and psychology, but everything else (history, literature, mathematics, politics etc.). Note especially that intentionality and rationality as I (along with Searle, Wittgenstein and others) view it, includes both conscious deliberative linguistic System 2 and unconscious automated prelinguistic System 1 actions or reflexes. I provide a critical survey of some of the major findings of two of the most eminent students of behavior of modern times, Ludwig Wittgenstein and John Searle, on the logical structure of intentionality (mind, language, behavior), taking as my starting point Wittgenstein's fundamental discovery -that all truly 'philosophical' problems are the same-confusions about how to use language in a particular context, and so all solutions are the same-looking at how language can be used in the context at issue so that its truth conditions (Conditions of Satisfaction or COS) are clear. The basic problem is that one can say anything but one cannot mean (state clear COS for) any arbitrary utterance and meaning is only possible in a very specific context. I analyze various writings by and about them from the modern perspective of the two systems of thought (popularized as 'thinking fast, thinking slow'), employing a new table of intentionality and new dual systems nomenclature. I show that this is a powerful heuristic for describing behavior. Thus, all behavior is intimately connected if one takes the correct viewpoint. The Phenomenological Illusion (oblivion to our automated System 1) is universal and extends not merely throughout philosophy but throughout life. I am sure that Chomsky, Obama, Zuckerberg and the Pope would be incredulous if told that they suffer from the same problem as Hegel, Husserl and Heidegger, (or that that they differ only in degree from drug and sex addicts in being motivated by stimulation of their frontal cortices by the delivery of dopamine (and over 100 other chemicals) via the ventral tegmentum and the nucleus accumbens), but it's clearly true. While the phenomenologists only wasted a lot of people's time, they are wasting the earth and their descendant's future.

Early Life on Earth National Geographic Books

Introduces the history, daily life, religion, social customs, and inventions of the Aztecs, along with descriptions of Tenochtitlan, its largest city.

Intelligent Library Buildings CRC Press

It's time to visit the doctor, and everyone is in the waiting room. The doctor treats a crocodile and an elephant first. Next up is a wolf. Will the doctor survive his cunning patient? Full color.

Unlike other crocodiles, Cornelius walks upright, sees things no crocodile has ever seen before, and does tricks no other crocodile can. His friends aren't impressed--or are they?

Pompieri Libro Da Colorare Per Bambini Dai 4-8 Anni Penguin UK

When Louise goes away for the summer, Simon takes a road trip of his own--and both discover more than they bargained for. Written and illustrated from both points of view by the award-winning creator of "Moose, " this is a story about two people in

love and the chaos that happens when technology gets in the way.x 9.

Simon & Louise Scholastic UK

No System is Vinca Petersen's photographic document of her life as a modern nomad. She tells us in her introduction, "Different people's lives are based around different things, ours is based around music. "For the last few years she has been traveling with a group of young people through Europe, organizing illegal musical events and raves. Living between cities in old vans and buses, they scavenge for abandoned structures, often on the cusp between urban and rural areas, where they can dance to loud techno music. The photographs present a fascinating look at modern tribal life, where technology-driven equipment and music, discarded industrial frameworks, and a nomadic lifestyle, rooted in ancient history, all come together.

Funny Fingers Wentworth Press

When did life first appear on Earth and what form did it take? The answer to this intriguing and fundamentally important question lies somewhere within the early Archean rock record. The young

Earth was, however, a very different place to that we know today and numerous pitfalls await our interpretation of these most ancient rocks. The first half of this practical guide equips the reader with the background knowledge to successfully evaluate new potentially biological finds from the Archean rock record. Successive steps are covered, from locating promising samples in the field, through standard petrography and evaluation of antiquity and biogenicity criteria, to the latest state of the art geochemical techniques. The second half of the guide uniquely brings together all the materials that have been claimed to comprise the earliest fossil record into an easily accessible, fully illustrated format. This will be a handbook that every Archean geologist, palaeobiologist and astrobiologist will wish to have in their backpack or on their lab-bench.
