### LANG LOPEZ

My Reminiscences of the Anglo-Boer War Springer

When it comes to implementing successful ecological restoration projects, the social, political, economic, and cultural dimensions are often as important as-and sometimes more important than-technical or biophysical knowledge. Human Dimensions of Ecological Restoration takes an interdisciplinary look at the myriad human aspects of ecological restoration. In twenty-six chapters written by experts from around the world, it provides practical and theoretical information, analysis, models, and guidelines for optimizing human involvement in restoration projects. Six categories of social activities are examined: collaboration between land manager and stakeholders ecological economics volunteerism and community-based restoration environmental education ecocultural and artistic practices policy and politics For each category, the book offers an introductory theoretical chapter followed by multiple case studies, each of which focuses on a particular aspect of the category and provides a perspective from within a unique social/political/cultural setting. Human Dimensions of Ecological Restoration delves into the often-neglected aspects of ecological restoration that ultimately make the difference between projects that are successfully executed and maintained with the support of informed, engaged citizens, and those that are unable to advance past the conceptual stage due to misunderstandings or apathy. The lessons contained will be valuable to restoration veterans and greenhorns alike, scholars and students in a range of fields, and individuals who care about restoring their local lands and waters.

We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

*Heart of a Game Ranger* Psychology Press

What started as a vision about the Olifants River Game Reserve has become the story of a game ranger's life He tells his story here and provides a wealth of lessons on conservation as well as stories of life in the bush, as it is enjoyed only by those fortunate enough to live on a 'Big Five' reserve. With a naturalist's eye for detail as well as the bigger picture of managing a fragile ecosystem through years of drought and plenty, Mario Cesare brings a storyteller's delight - and a dash of Italian passion - to sharing his world. Life-and-death encounters with lion, elephant and buffalo are balanced by rescues and interventions as these giants of the lowveld suffer the effects of human interference in their ecosystem. There are problems with poachers and with rapacious neighbors; then the delights of success - and in the case of the elephant population, the conundrums of too much success.

Rooibos limited is the world's biggest supplier of South Africa's most indigenous tea- Rooibos.

International research has shown that Rooibos is more than just a tea and contains a long list of health benefits that improve the quality of people's lives across the world.

**A Survey of Race Relations in South Africa** Bernan Press(PA)

This open access book explores the strategic importance and advantages of adopting multidisciplinary and multiscale approaches of inquiry and intervention with respect to the built environment, based on principles of sustainability and circular economy strategies. A series of key challenges are considered in depth from a multidisciplinary perspective, spanning engineering, architecture, and regional and urban economics. These challenges include strategies to relaunch socioeconomic development through regenerative processes, the regeneration of urban spaces from the perspective of resilience, the development and deployment of innovative products and processes in the construction sector in order to comply more fully with the principles of sustainability and circularity, and the development of multiscale approaches to enhance the performance of both the existing building stock and new buildings. The book offers a rich selection of conceptual, empirical, methodological, technical, and case study/project-based research. It will be of value for all who have an interest in regeneration of the built environment from a circular economy perspective.

*Special Needs Education* Routledge

Mozambique's civil war was inevitable given the tradition of conflict that has always characterized Frelimo, first as an independence movement, and then as a ruling party. Without disregarding the role played by both Rhodesia and South Africa in the war - in fact providing new and detailed information about it - Cabrita guides the reader through Frelimo's early days and gives a clear understanding of the pattern of internal dissent, persecution and physical elimination of members and opponents that remained the organization's hallmark.

When Kobie Krüger, her game-ranger husband and their three young daughters moved to one of the most isolated corners of the world - a remote ranger station in the Mahlangeni region of South Africa's vast Kruger National Park - she might have worried that she would become engulfed with loneliness and boredom. Yet, for Kobie and her family, the seventeen years spent in this spectacularly beautiful park proved to be the most magical - and occasionally the most hair-raising - of their lives. Kobie recounts their enchanting adventures and extraordinary experiences in this vast reserve - a place where, bathed in golden sunlight, hippos basked in the glittering waters of the Letaba River, storks and herons perched along the shoreline, and fruit bats hung in the sausage trees. But as the Krugers settled in, they discovered that not all was peace and harmony. They soon became accustomed to living with the unexpected: the sneaky hyenas who stole blankets and cooking pots, the sinister-looking pythons that slithered into the house, and the usually placid elephants who grew foul-tempered in the violent heat of the summer. And one terrible day, a lion attacked Kobus in the bush and nearly killed him. Yet nothing prepared the Krugers for their greatest adventure of all, the raising of an orphaned prince, a lion cub who, when they found him, was only a few days old and on the verge of death. Reared on a cocktail of love and bottles of fat-enriched milk, Leo soon became an affectionate, rambunctious and adored member of the family. It is the rearing of this young king, and the hilarious endeavours to teach him to become a 'real' lion who could survive with his own kind in the wild, that lie at the heart of this endearing memoir. It is a memoir of a magical place and time that can never be recaptured.

The World's Water: The Report on Freshwater Resources (from the Pacific Institute) is the pre-eminent publication regularly addressing global freshwater challenges and solutions. The first volume was published in 1998 and the current volume - the ninth - continues the tradition of tackling timely, critical freshwater problems in a fresh, easy-to-read style. Information on the previous volumes and important water data can be found online at [www.worldwater.org](http://www.worldwater.org). When the first volume of The World's Water was published in 1998, the United Nations' Millennium Development Goals (MDGs) for 2015 had not even been established. The concepts of water "footprints," "virtual water," "corporate water stewardship," "peak water," and other now-central topics had not yet been put forward or were mostly unknown. Yet today, the MDGs have been replaced with a new set of comprehensive environmental and social targets, the Sustainable Development Goals (SDGs) for 2030. A wide variety of research, academic, advocacy, and policy groups are addressing water problems in new and innovative ways. And the demand for good water analysis is greater than ever. This new volume continues to offer insights into critical global water problems, overviews of data and analysis around water use and management, and case studies of some of the greatest water challenges around the world. The chapters in the current volume include the issue of corporate water stewardship, the human right to water and sanitation, water-use trends in the United States, an assessment of the water footprint of California energy, the consequences of the severe five-year California drought, a review of water markets and economic strategies for water management, and a summary of the cost of alternative water supply and demand strategies. The current volume also includes the regular update on the Pacific Institute's unique Water Conflict Chronology, with historical examples of conflicts related to water going back to 2500 BC and new entries through early 2017; a summary of the 2017 Pontifical Academy of Sciences Vatican meeting on the human right to water; and a review of critical issues around public access to water through drinking fountains. The World's Water has always been about more than just bad news. There is plenty of good news and there are many innovative efforts underway to identify and implement sustainable water solutions. The latest volume continues the tradition of bringing these solutions to students, the public, policy makers, and scientists working to understand the world of water.

Co-operatives provide a different approach to organizing business through their ideals of member ownership and democratic practice. Every co-operative member has an equal vote regardless of his or her own personal capital investment. The contemporary significance of co-operatives was highlighted by the United Nations declaration of 2012 as the International Year of Co-operatives. This book provides an international perspective on the development of co-operatives since the mid-nineteenth century, exploring the economic, political, and social factors that explain their varying fortunes and transformation into different forms. By looking at what co-operatives are; how they have changed; the developments as well as the persecutions of the co-operative movement; and how it is an important force in promoting development and self-sufficiency in non-industrialized areas, this book provides valuable insight not only to academics, but also to practitioners and policy makers.

[The Kruger National Park](#) MIT Press

The problems related to the process of industrialisation such as biodiversity depletion, climate change and a worsening of health and living conditions, especially but not only in developing countries, intensify. Therefore, there is an increasing need to search for integrated solutions to make development more sustainable. The United Nations has acknowledged the problem and approved the "2030 Agenda for Sustainable Development". On 1st January 2016, the 17 Sustainable Development Goals (SDGs) of the Agenda officially came into force. These goals cover the three dimensions of sustainable development: economic growth, social inclusion and environmental protection. The Encyclopedia of the UN Sustainable Development Goals comprehensively addresses the SDGs in an integrated way. The Encyclopedia encompasses 17 volumes, each one devoted to one of the 17 SDGs. This volume addresses SDG 17, namely "Strengthen the means of implementation and revitalize the global partnership for sustainable development" and contains the description of a range of terms, which allows a better understanding and fosters knowledge. The approval of the SDGs by the 194 countries of the UN General Assembly implies that issues such as combating climate change; distributing resources fairly; providing security and protection; generating employment; and ensuring quality health care and education need the concerted efforts of everyone. SDG 17 seeks to dismantle structures and procedures built on inequality of access and develop strategies that ensure collaboration and sharing of resources and opportunities. The topics covered concern finance, technology, capacity-building, trade and systemic issues: Domestic resource mobilization Domestic capacity for tax and other revenue collection Long-term debt sustainability for developing countries Debt financing, debt relief, debt restructuring Global technology facilitation mechanism Technology, bank and science, technology and innovation capacity-building mechanism Enhanced information and communications technology Universal, rules-based, open, non-discriminatory and equitable multilateral trading system under WTO Increased exports of developing countries Global macroeconomic stability Policy coordination and policy coherence Promotion of effective public, public-private and civil society partnerships Editorial Board Carolina Collaro, Sonja Rewhorn, Elena Shabliy, Monica Thiel, Marco Tortora, Tony Wall *Breaker Morant* Nsw National Parks & Wildlife Service

This volume explores sporting mega-events, their social, political, and cultural characters, the value systems that they inscribe and draw on, the claims they make on us and the claims the organisers make for them, the spatial and ethical relationships they create, and the responses of civil societies to them.

A Dictionary of South African English is the fullest ever study of the English language in South Africa. The result of 25 years of work, this dictionary has been researched and written according to

historical principles. However, as well as recording examples of South African English going back to the sixteenth century, the dictionary also provides an insight into the dramatic political and cultural changes in South Africa's history by examining the country's ever changing language right up to the present day. Research into language has involved the contributions of hundreds of individual South Africans, as well as extensive research into all other forms of the written and spoken language. Diverse and informative entries include robot (a traffic light), bakkie (a small truck), bond (a mortgage), and brinjals (aubergines). The dictionary includes such areas as children's slang, the vocabulary of soldiers, the mines, local music terms, the townships, food, and a detailed look at the complex language of apartheid. English words originating from all the country's groups are recorded, including words from Dutch/Afrikaans, the Malayo-Indonesian languages, the Indian, Khoisan, Nguni, and Sotho languages.

[Archaeological Heritage Management](#) A&C Black

'They say a man has only dog in his lifetime, only one dog with which he will share that special bond ...' Mario Cesare was twenty-five years old and managing a game reserve in the rugged Tuli Block in Botswana when he first took possession of a shy black pup that he named Shilo. The pup attached himself to Mario almost immediately and very soon he became known by the locals as 'The Man with the Black Dog'. Very few dogs that live in Africa's big game country die of old age, but Shilo was the exception that proved the rule. Shilo's incredible versatility ranged from skilfully tracking big game in the hot arid bushveld to retrieving wild fowl in the icy wetlands of South Africa. He was also a constant companion, a devoted protector and for more than fourteen years he and Mario, had innumerable adventures together, encountering crocodiles, buffalo, lion, leopard, baboons and poachers. The Man with the Black Dog is permeated with the same love and empathy that made Jock of the Bushveld a classic and it too is a very South African story. Seldom has an account of a man and his dog revealed so much of the flavour of life in such a wild location and although over a century has passed since the transport wagons carved their trails to and from Delagoa Bay, the scent evoked of dust and rain remains the same and the grey ghosts of kudu and elephant still melt into the bush.

[The Mobile Workshop](#) Springer

The report presents the latest assessment of global trends in wildlife crime. It includes discussions on illicit rosewood, ivory, rhino horn, pangolin scales, live reptiles, tigers and other big cats, and European eel. The COVID-19 (coronavirus) pandemic has highlighted that wildlife crime is a threat not only to the environment and biodiversity, but also to human health, economic development and security. Zoonotic diseases - those caused by pathogens that spread from animals to humans - represent up to 75% of all emerging infectious diseases. Trafficked wild species and the resulting products offered for human consumption, by definition, escape any hygiene or sanitary control, and therefore pose even greater risks of infection.

[The World's Water Volume 9](#) Routledge

'Don't make a mess of it.' Of such stuff are legends built, heroes made, and plays written. The popularity of Harry 'Breaker' Morant survives still, in this play written by Kenneth Ross. Here Ross, in theatrical terms, has created the last days of 'Breaker' Morant based on what is known of the characters involved, the circumstances leading up to the arrests, and a number of events known to have occurred at the time. Originally performed by the Melbourne Theatre Company at the Athenaeum Theatre on 2 February 1978. The script of the film Breaker Morant, produced by the S.A. Film Corporation was adapted from Kenneth Ross's play.

[Partnerships for the Goals](#) Good Press

How the presence of the tsetse fly turned the African forest into an open laboratory where African knowledge formed the basis of colonial tsetse control policies. The tsetse fly is a pan-African insect that bites an infective forest animal and ingests blood filled with invisible parasites, which it carries and transmits into cattle and people as it bites them, leading to n'gana (animal trypanosomiasis) and sleeping sickness. In *The Mobile Workshop*, Clapperton Chakanetsa Mavhunga examines how the presence of the tsetse fly turned the forests of Zimbabwe and southern Africa into an open laboratory where African knowledge formed the basis of colonial tsetse control policies. He traces the pestiferous work that an indefatigable, mobile insect does through its movements, and the work done by humans to control it. Mavhunga's account restores the central role not just of African labor but of African intellect in the production of knowledge about the tsetse fly. He describes how European colonizers built on and beyond this knowledge toward destructive and toxic methods, including cutting down entire forests, forced "prophylactic" resettlement, massive destruction of wild animals, and extensive spraying of organochlorine pesticides. Throughout, Mavhunga uses African terms to describe the African experience, taking vernacular concepts as starting points in writing a narrative of ruzivo (knowledge) rather than viewing Africa through foreign keywords. The tsetse fly became a site of knowledge production—a mobile workshop of pestilence.

[The Second Isaiah](#) Island Press

This is a detailed description of the possession of a young girl by Satan and her struggle to be free of his Kingdom of Darkness. She is made free by accepting Jesus Christ as her personal savior, becoming born again, confessing her sins and obtaining redemption.

[The Bantu-speaking Tribes of South Africa](#) William Jenkins

Predictability isn't a word you will find in any Bushveld dictionary, and the life of wildlife guardian Mario Cesare has been anything but. After years as warden of Olifants River Game Reserve, his feet are firmly planted in this magnificent slice of Big Five country to the west of the Kruger Park, where he has experienced a rich life packed full of incidents far from routine. In *Heart of a Game Ranger*, Cesare recounts some of these hair-raising, heart-breaking and heart-warming moments: a buffalo calf reunited with its pining mother, injured lions given second chances and rhinos lost, one by one, to poaching. Nestled among these tales, Cesare pays homage to the brave, dedicated and curious personalities engaged in a deadly combat on the most majestic of battlefields. Yet, while rhino poaching is by far the reserve's biggest problem, Cesare reveals how the daily struggles of a game ranger are so much broader - and the rewards, when they come, immense. *Heart of a Game Ranger* is a story of extremes, one of fierce loyalty and devastating betrayal where spectacular days that end in exhausted satisfaction and achievement are balanced by those that leave behind only despair and frustration. Seen through his eyes and spoken from the heart, Cesare tells a deeply personal story - not only of a life lived wild, but of the joy of Africa's incredible natural world.
