Current management accounting techniques have not been widely accepted as a means to develop a competitive advantage. The information obtained from the literature reviewed and the results from an empirical study that involved a sample of forty respondents from Equity Bank found that the modern management accounting practices provide very important skills and techniques in building competitiveness. The practices play an important role in the planning, developing, implementing and evaluating strategic competitive policies that result in a competitive advantage. The study outlines the importance of management accounting practices in providing strategies that lead to the creation of a competitive advantage in an organisation. However, the conclusions are drawn on a conceptual level and a future empirical investigation is needed to substantiate these claims further. The study also sets a foundation for more focused research into the importance of modern management accounting practices in developing a competitive advantage especially in the banking sector.

It identifies the three functions managers must perform within their organizations—plan operations, control activities, and make decisions—and explains what accounting information is necessary for these functions, how to collect it, and how to interpret it. Managerial Accounting 8ce focuses, now as in the past, on three qualities: Relevance, Balance and Clarity. The authors' steady focus on these core elements has led to tremendous results! As seafarers look to the lighthouse for direction along unfamiliar shore, so too can Garrison act as a compass for students seeking to master this course.
