Heralded as the greatest living Arab poet, Syrian-born Adonis is also a staunch critic of violence and despotism in the Islamic world. In this book Adonis explores the nature of political power in Islam by focusing on the figure of the prophet Mohammed as both a political and a mythical leader. In conversation with Houria Abdelouahed, he examines the Qu'ranic intervention in establishing the prophet's power, especially when the text is read based on faith and not reason. The authors discuss the historical developments before and after the prophet's death which established the power of the Caliph or the leader as absolute. The second part of the book examines the consequences of these developments in the Arab and Islamic world today, where this 'tyrannical' understanding of power continues to hold sway. In chapters on women, the notion of love and the relationship between East and West, they examine the ways in which this notion of power operates in the Arab and Islamic world as well as how it continues to inform the Muslim world's relationship to and interaction with others. The authors conclude with a call for secularism in the Arab world and a passionate plea for the separation of religion from the political, legal and social spheres. Building on the earlier volume *Violence and Islam*, this new book by one of the greatest literary figures in the world today will be of interest to a wide general readership.

Second World War fighter pilot Eric Carter is one of only four surviving members of a secret mission, code-named 'Force Benedict'. Sanctioned by Winston Churchill in 1941 Force Benedict was dispatched to defend Murmansk, the USSR's only port not under Nazi occupation. If Murmansk fell, Soviet resistance against the Nazis would be hard to sustain and Hitler would be able to turn all his forces on Britain... Force Benedict was under the command of New Zealand-born RAF Wing Commander Henry Neville Gynes Ramsbottom-Isherwood, who led two squadrons of Hurricane fighters, pilots and ground crew which were shipped to Russia in total secrecy on the first ever Arctic Convoy. They were told to defend Murmansk against the Germans 'at all costs'. 'We all reckoned the government thought we'd never survive' - but Eric Carter did, and was threatened with Court Martial if he talked about where he'd been or what he'd done. Now he reveals his experiences of seventy years ago in the hell on earth that was Murmansk, the largest city north of the Arctic Circle. It will also include previously unseen photos and documents, as well as exploring - for the first time - other intriguing aspects of Force Benedict.

Hailed as a breakthrough in the understanding of human evolution, *The History and Geography of Human Genes* offers the first full-scale reconstruction of where human populations originated and the paths by which they spread throughout the world. By mapping the worldwide geographic distribution of genes for over 110 traits in over 1800 primarily aboriginal populations, the authors charted migrations and devised a clock by which to date evolutionary history. This monumental work is now available in a more affordable paperback edition without the myriad illustrations and maps, but containing the full text and partial appendices of the authors' pathbreaking endeavor.

This is the true story of Captain Fletcher E. Adams and the famous 357th Fighter Group. Known collectively as the "Yoxford Boys" the 357th was the first P-51 Mustang fighter group in the history of the "Mighty" 8th Air Force. Although active for less than two years during World War II, the group

set many records and became one of the greatest fighter outfits the U. S. Air Force would ever send into combat. Between February 1944 and April 1945 the 357th produced more aces than any other American fighter group. They also shot down more German jets than any other group in the Army Air Corps during the Second World War. On January 14, 1945, a day that will forever be known as "The Great Rat Race" and "The Big Day", the 357th Fighter Group shot down 55 1/2 German fighters in just over two hours setting a record in military aviation that has never and probably will never be broken. Among the members of this amazing group of fighter pilots were: Chuck Yeager, Bud Anderson, Kit Carson, John England, and others destined for fame. So was Captain Fletcher E. Adams, a native son of the small village of Ida, Louisiana. Then, on May 30, 1944, Adams, the leading ace of the 357th Fighter Group with 9 kills to his credit, was shot down over Tiddische, Germany and murdered by civilians on the ground. This is their story as told by the pilots through their books, diaries, and interviews with the author. Theirs was an adventure never to be matched again in the annals of aviation history. Find out what it was really like to go "to war with the Yoxford Boys"! "This book gives us the best insight into a tragic causality of WW II and the mystery of what happened to Captain Fletcher E. Adams. Joey Maddox's use of other voices, quotes and investigative interviews make the story interesting. You'll not only learn about Fletcher Adams but also the history of the 357th Fighter Group. I found the use of Adams' personal diary, an illegal practice in wartime, particularly interesting to learn of his personal feelings during his training and combat." Clarence E. "Bud" Anderson Colonel, USAF Ret.

The present work, the result of some forty years of investigative research, is a logical progression from my previous books: the expose of the international control of monetary issue and banking practices in the United States; a later work revealing the secret network of organizations through which these alien forces wield political power-the secret committees, foundations, and political parties through which their hidden plans are implemented; and now; to the most vital issue of all, the manner in which these depredations affect the daily lives and health of American citizens. Despite the great power of the hidden rulers, I found that only one group has the power to issue life or death sentences to any American-our nation's physicians. I discovered that these physicians, despite their great power, were themselves subjected to very strict controls over every aspect of their professional lives. These controls, surprisingly enough, were not wielded by any state or federal agency, although almost every other aspect of American life is now under the absolute control of the bureaucracy. The physicians have their own autocracy, a private trade association, the American Medical Association. This group, which is headquartered in Chicago, Illinois, had gradually built up its power until it assumed total control over medical schools and the accreditation of physicians. The trail of these manipulators led me straight to the same lairs of the international conspirators whom I had exposed in previous books. I knew that they had already looted America, reduced its military power to a dangerously low level, and imposed bureaucratic controls on every American. I now discovered that their conspiracies also directly affected the health of every American. This conspiracy has resulted in a documented decline in the health of our citizens. We now rank far down the list of civilized nations in infant mortality and other significant medical statistics. I was able to document the shocking record of these cold-blooded tycoons who not only plan and carry out famines, economic depressions, revolutions and wars, but who also find their greatest profits in their manipulations of our medical care. The cynicism and malice of these conspirators is something beyond the imagination of most Americans. They deliberately mulct our people of millions of dollars each year through "charitable" organizations and then use these same organizations as key groups to bolster their Medical Monopoly. Fear and intimidation are the basic techniques by which the conspirators maintain their control over all aspects of our health care, as they ruthlessly crush any competitor who challenges their profits. As in other aspects of their "behavioural control" over the

American people, their most constantly used weapon against us is their employment of federal agents and federal agencies to carry out their intrigues. The proof of this operation may be the most disturbing revelation of my work.

A new edition of what is commonly seen as the legendary Norwegian writer's masterpiece, this story tells the tale of Siss and Unn, two friends who have only spent one evening in each other's company. But so profound is this evening between them that when Unn inexplicably disappears, Siss's world is shattered. Siss's struggle with her fidelity to the memory of her friend and Unn's fatal exploration of the strange, terrifyingly beautiful frozen waterfall that is the Ice Palace are described in prose of a lyrical economy that ranks among the most memorable achievements of modern literature.

Benjamin Malauss-ne, the Belleville scapegoat, and his family of half sisters and brothers are once again the target for a series of increasingly catastrophic mishaps which culminate in his imprisonment on 21 counts of murder. Meanwhile, the real serial killer remains at large. In this sprawling novel, which brings the Belleville Quintet to a close, Pennac has allowed his unique imagination to run riot. The result is an increasingly huge cast of unforgettable characters and a series of inter-related plot lines which curl around one another before finally unravelling. Since publication over ten years ago, The Translator's Invisibility has provoked debate and controversy within the field of translation and become a classic text. Providing a fascinating account of the history of translation from the seventeenth century to the present day, Venuti shows how fluency prevailed over other translation strategies to shape the canon of foreign literatures in English and investigates the cultural consequences of the receptor values which were simultaneously inscribed and masked in foreign texts during this period. The author locates alternative translation theories and practices in British, American and European cultures which aim to communicate linguistic and cultural differences instead of removing them. In this second edition of his work, Venuti: clarifies and further develops key terms and arguments responds to critical commentary on his argument incorporates new case studies that include: an eighteenth century translation of a French novel by a working class woman; Richard Burton's controversial translation of the Arabian Nights; modernist poetry translation; translations of Dostoevsky by the bestselling translators Richard Pevear and Larissa Volokhonsky; and translated crime fiction updates data on the current state of translation, including publishing statistics and translators' rates. The Translator's Invisibility will be essential reading for students of translation studies at all levels. Lawrence Venuti is Professor of English at Temple University, Philadelphia. He is a translation theorist and historian as well as a translator and his recent publications include: *The Scandals of Translation: Towards an Ethics of Difference* and *The Translation Studies Reader*, both published by Routledge.

For Merini, it seems, the Holy Land is not the Promised Land of Canaan, but the forty years spent getting there, coming to terms with the terrifying atrocities of hell, the mystical ecstasies of paradise, and the "intense pain...of plunging back into the banality of daily living." Merini's wandering may be understood as the poet's search for the obscure laws which govern her visions, metamorphoses, and creations."--BOOK JACKET.

A replacement of the author's well-known book on Translation Theory, *In Search of a Theory of Translation* (1980), this book makes a case for Descriptive Translation Studies as a scholarly activity as well as a branch of the discipline, having immediate consequences for issues of both a theoretical and applied nature. Methodological discussions are complemented by an assortment of case studies of various scopes and levels, with emphasis on the need to contextualize whatever one sets out to focus on. Part One deals with the position of descriptive studies within TS and justifies the author's choice to devote a whole book to the subject. Part Two gives a detailed rationale for descriptive studies in translation and serves as a framework for the case studies comprising Part Three. Concrete descriptive issues are here tackled within ever growing contexts of a higher level: texts and modes of translational behaviour [] in the appropriate cultural setup; textual components [] in texts, and through these texts, in cultural constellations. Part Four asks the question: What is knowledge accumulated through descriptive studies performed within one and the same framework likely to yield in terms of theory and practice? This is an excellent book for higher-level translation courses.
