Many societies assign sharply distinguished roles to men and women. Personality differences, as well as physical differences, between men and women are used to justify these different sex roles, and women are seen as more emotionally

and interpersonally sensitive than men, while men are said to be more competent, achievement oriented, and assertive than women. A widely held view is that not only do men and women differ but that possession of "masculine" characteristics precludes possession of "feminine" characteristics. This bipolar conception has led to the definition of masculinity and femininity as opposites.

Acceptance of this idea has caused social scientists and laypersons to consider men and women who possess cross-sex personality characteristics as less emotionally healthy and socially adjusted than those with sex-appropriate traits. Previous research by the authors and others, done almost exclusively with college students, has shown, however, that masculinity and femininity

do not relate negatively to each other, thus supporting a dualistic rather than a bipolar conception of these two psychological dimensions. Spence and Helmreich present data showing that the dualistic conception holds for a large number of groups, varying widely in age, geographical location, socioeconomic status, and patterns of interest, whose psychological masculinity

and femininity were measured with an objective instrument, the Personality Attributes Questionnaire, devised by the authors. Many individuals are shown to be appropriately sex-typed; that is, men tend to be high in masculinity and low in femininity and women the reverse. However, a substantial number of men and women are androgynous—high in both masculine and

feminine characteristics—while some are not high in either. Importantly, the authors find that androgynous individuals display more self-esteem, social competence, and achievement orientation than individuals who are strong in either masculinity or femininity or are not strong in either. One of the major contributions of the work is the development of a new,

multifaceted measure of achievement motivation (the Work and Family Orientation Questionnaire) , which can be used successfully to predict behavior in both males and females and is related to masculinity and femininity in both sexes. In addition to investigating the correlates of masculinity and femininity, the authors attempt to isolate parental factors that contribute to the

development of these characteristics and achievement motivation. The book includes analyses of data from students on their perception of their parents, which enable the authors to examine the influence of parental masculinity and femininity and parental behaviors and child-rearing attitudes on the development of masculinity and femininity and achievement motivation

characteristics in their children. The important implications of these findings for theories of sex roles, personality development, and achievement motivation are examined.

Dion Wheeler, an

experienced high school and college coach and parent of two successfully recruited student-athletes, shares his secrets of success in this comprehensive guide. This book provides the tools, devices, and strategies to give your student-athlete the best opportunity to continue an athletic career in college and to receive financial aid (scholarships, grants, low-interest loans) based upon

athletic ability. Wheeler leads you step-by-step through the tangled web of recruiting confusion, duplicity, and unfairness. By following the program, your prospect will gain an advantage over other equally qualified student-athletes who dream of college athletics and a scholarship based on athletic ability. A detailed appendix includes complete

contact information for colleges and universities that offer athletic scholarships.

The term behavior modification refers to the systematic analysis and change of human behavior and the principal focus is on overt behavior

and its relationships to environmental variables. Behavior modification can be applied in many settings, the nature of which helps to define its subsets. Thus, applied in clinical settings, toward clinical goals, it encompasses the subset behavior therapy. In *Behavior Therapy with Children, Volume 2*, Anthony M. Graziano focuses on behavior therapy--

specifically, the behavioral treatment of children's clinical problems. The field of behavior modification encompasses an astonishingly wide and varied spectrum of concepts about and approaches to education, clinical problems, social programming, and rehabilitation efforts. A conceptually and technologically rich medium, it has been

nourished by the psychology laboratory, the school, and the psychiatric clinic. It is an area with diffuse boundaries surrounding a highly active center, within which apparently solid landmarks have already been worn away by the dissolving action of corrective self-criticism--immeasurably aided by the catalysts stirred in by the field's many critics. The activity continues, the

dynamic field boils, and the medium enriches itself. There appears to be a tendency, particularly among new behavior therapists, to limit their focus too narrowly to the client's systems of overt behavior. In this project, psychological therapy begins with a personal, interactive social situation in which the generally expected human response of interest,

sympathy, and support, is the minimum condition. Graziano maintains that these clinical sensitivity skills must be preserved in behavior therapy and enhance its important contribution to advancing the therapeutic endeavor. Anthony M. Graziano is professor emeritus in the Department of Psychology, State University of New York at Buffalo. He has published a number of

articles in journals on subjects such as teaching machine programs, behavior therapy with children, diagnostic testing, the history of psychology, and evaluations of the contemporary mental health professions. He has been on the editorial board of Behavior Modification and on the board of directors for the Eastern Psychological Association. Wide scope, questionable

These events

bring with them a plethora of challenges, particularly in the areas of program design and educational practices. Developing and Evaluating Educational Programs for Students with Autism offers systematic, evidence-based guidelines—as well as tools, checklists, and other resources—for creating effective learning environments for students across the autism

spectrum and the grade span. Planning, development, implementation, and continuous evaluation are examined in detail in this practical volume, which features: An overview of the ASDs, with an emphasis on effective educational practice. In-depth discussion of the ASD Program Development and Evaluation Protocol. A staff training model for personnel working with

students with ASD. A detailed framework for student support teams and family-school collaboration. Specific guidelines for conducting needs assessments and student evaluations. • Case examples of applications of the protocol on the program, school, and regional levels. Developing and Evaluating Educational Programs for Students with Autism is a

uniquely rigorous and thorough reference benefiting school psychologists and special education professionals as well as those in allied educational and mental health fields, including clinical child, school, and developmental psychologists, psychiatrists, and other professionals working with children with autism.

A Step-by-

Step Guide to Implementing a Successful ANTI-BullyING Program

Bullying can be found in every school system, school, and classroom. It is destructive to the well-being of students, creates unsafe schools, and impacts learning.

School personnel, parents, and others are increasingly realizing the importance of putting effective anti-bullying strategies and policies in place that will

create safe, caring, and peaceful schools where all students feel a sense of belonging and acceptance.

Based on Allan L. Beane's proven Bully Free7reg; Program, Bullying Prevention for Schools is a step-by-step guide to implementing an anti-bullying program in individual schools or throughout a district. In Bullying Prevention for Schools, Dr. Beane details how to: Implement

training for school personnel and volunteers and awareness sessions for students, parents, and the community. Establish policies, rules, behavioral expectations, discipline rubrics, and response plans. Prepare intervention and prevention strategies. Develop a plan to actively include, involve, and empower students, parents, and the

community. And much more. *Bullying Prevention for Schools* also contains a wealth of reproducible documents and forms, such as surveys, statement sheets, and intervention questionnaires.

The Food Stamp Certification Handbook Solution Tree Press Churches have always sought to be a safe haven for children and families, but

many today are dealing with the tragic reality of child sexual abuse. For the first time in history, this issue is finally being acknowledged by churches and faith communities. But the task of developing a policy to keep children safe can seem too overwhelming—it feels like an impossible task to plan for every contingency. This results in churches neglecting to put working safety plans in place, leaving themselves,

and the children they care for, vulnerable. This handbook, supported by a multidisciplinary team of child abuse experts, is designed to help churches and faith communities formulate policies and procedures to protect children and deal with possible child abuse in their ministries, school, and church. By walking through a wide range of scenarios, this book will

assist churches and ministries to assess their current child abuse policies and guide them through each step they should take to address the safety of children under their care. Covering vitally important topics including the warning signs of abuse, how to respond to abuse allegations and care for victims, and the legal implications and requirements for churches and Christian

ministries, working through this book will guide churches and Christian ministries in creating and implementing policies to protect children in a Christian environment from child abuse. This handbook is an invaluable resource for Christians who are seeking to educate themselves and others about child abuse and how they can best protect the little ones under their care.

This book is

the longest standing and most widely adopted text in the field of social work research and evaluation. As stated in the book's preface, it is intended for advanced undergraduate and beginning graduate social work students in a one-semester research

methods course. Since the first edition in 1981, this edition is designed to provide social work students with the basic methodological foundation they need in order to successfully complete more advanced research courses that focus on single-system designs or program evaluations. With its customarily straightforward user-friendly writing style by renowned educators, this

edition will continue to maintain its notoriety as the premier social work research methods text. Thoroughly revised and updated, the chapters offer a wealth of new research examples and references, accessible diagrams of essential concepts and processes, and extended coverage of core social work research methods and recent developments. For example, with the inclusion of four new

chapters on the evidence-based approach to social work practice, the book emphasizes how important this approach has become, and provides a rock-solid foundation for understanding how to evaluate and interpret research findings that have been derived from research studies-the minimal skills needed for evidence-based social work practitioners. The Achieving- Behaving- Caring (ABC) Program is an evidence-based approach to addressing the needs of elementary students at risk for

emotional and behavioral difficulties and promoting successful home-school collaboration. This practical guide demonstrates how classroom teachers and parents can work together to boost individual children's strengths, reduce problems that interfere with learning, and provide classwide social skills training. The use of trained parent liaisons is a special feature of the program.

Detailed, step-by-step instructions for implementing ABC are accompanied by many useful case illustrations and tips. The book includes more than two dozen reproducible handouts and forms, in a convenient large-size format with lay-flat binding. This book is in The Guilford Practical Intervention in the Schools Series, edited by T. Chris Riley-Tillman.

By concentrating on the parents, who usually bring the youth into the legal or mental health system, the book provides numerous unique insights into the nature of problems among urban youths. It describes how certain legal and psychological problems often coexist, examines the reasons for these problems, and shows how this knowledge

can be used to improve the delivery of youth and family services. Based on an extensive study of the parents of youth in trouble, this book describes and analyzes how urban parents view the problems of their adolescent children, and how they have tried to cope with and to seek help for them. Focusing on parents as third-party help-seekers, the authors shed light on

the types of problems experienced by adolescents in urban communities.
