DWAYNE EVA

I Glanced Out the Window and Saw the Edge of the World Cornell University Press
George Leonard recounts his experiences as a reporter for Look magazine during the tumult, idealism, and passion of the 1960s. His memoir tells of his fascinating journey of self-discovery--from a traditional Southern upbringing to his journalistic accomplishments. Two 8-page photo inserts.

Close to the Edge Fawcett
Kaplan, winner of the Flannery O'Connor Award for Short Fiction, writes potent short stories in which she puts seemingly solid marriages to the test, pushing them to their breaking point by force of sorrow and

tragedy. Disease and accidents often drive couples to the brink of separation and her characters find themselves in emotional free fall.

Blue Clay People Columbia University Press

In *The Edge of Extinction*, Jules Pretty explores life and change in a dozen environments and cultures across the world, taking us on a series of remarkable journeys through deserts, coasts, mountains, steppes, snowscapes, marshes, and farms to show that there are many different ways to live in cooperation with nature. From these accounts of people living close to the land and close to the edge emerge a larger story about sustainability and the future of the planet. Pretty addresses not only current threats to natural and cultural diversity but also the unsustainability of modern lifestyles

typical of industrialized countries. In a very real sense, Pretty discovers, what we manage to preserve now may well save us later. Jules Pretty's travels take him among the Māori people along the coasts of the Pacific, into the mountains of China, and across petroglyph-rich deserts of Australia. He treks with nomads over the continent-wide steppes of Tuva in southern Siberia, walks and boats in the wildlife-rich inland swamps of southern Africa, and experiences the Arctic with ice fishermen in Finland. He explores the coasts and inland marshes of eastern England and Northern Ireland and accompanies Innu people across the taiga's snowy forests and the lakes of the Labrador interior. Pretty concludes his global journey immersed in the discrete cultures and landscapes embedded within the American landscape: the small farms

of the Amish, the swamps of the Cajuns in the deep South, and the deserts of California. The diverse people Pretty meets in *The Edge of Extinction* display deep pride in their relationships with the land and are only willing to join with the modern world on their own terms. By the examples they set, they offer valuable lessons for anyone seeking to find harmony in a world cracking under the pressures of apparently insatiable consumption patterns of the affluent.

Shots from the Edge Doubleday Canada South Africa is not an easy place in which to live. Soaring crime levels, xenophobia, rampant corruption and the rise to power of the controversial Jacob Zuma all signal the end of the dream years. A new personal resilience is needed to cope with a new political uncertainty. *Load Shedding* is a collection of non-fiction stories by some of South Africa's pre-eminent authors, journalists and commentators, including Imraan Coovadia, Achille Mbembe, Deborah Posel and Karina Magdalena Szczurek, that reveal how we live under pressure. Written during the nation's period of electricity blackouts, these personal accounts shine new light on our contemporary South African world.

At the Edge of the Pit Simon and Schuster

Connie Ramos, a woman in her mid-thirties, has been declared insane. But Connie is overwhelmingly sane, merely tuned to the future, and able to communicate with the year 2137. As her doctors persuade her to agree to an operation, Connie struggles to force herself to listen to the future and its lessons for today.... "From the Paperback edition."

Woman on the Edge of Time U of Nebraska Press

A sweeping, propulsive family saga set on a romantic and beautiful Italian island, for fans of Captain Corelli's Mandolin and Beautiful Ruins. On the tiny, idyllic island of Castellamare, off the coast of Sicily, lies The House at the Edge of Night, an ancient bar run by the Esposito family. There, over the course of three generations--from the eve of World War One to the aftershocks of the 2008 financial crisis--the Esposito women will fight to hold their family together against the threats that break across their shores. As lush and magical as the island at its centre, The House at the Edge of Night is a story of love and secrets, endurance, loss and, ultimately, triumph.

The Trouble With Evil SUNY Press

The author of Darwin's Black Box draws on new findings in genetics to pose an argument for intelligent design that

refutes Darwinian beliefs about evolution while offering alternative analyses of such factors as disease, random mutations, and the human struggle for survival. Reprint. 40,000 first printing.

The Edge of Evolution Verso Books

Odette Larson vividly recounts her adolescence on the edge of Las Vegas before it became the Disneyfied centre of family entertainment that it is today.

Living on the Edge Oxford University Press, USA

Nestled in the southern section of modern-day Nigeria are the remnants of a civilization so vast that one of its crowning achievements has never been matched by any civilization that has ever existed on the planet--including all modern societies.

Archeologically known as the Ancient Linear Earthworks of Benin and Ishan, the Great Wall of Africa, also known as the Great Wall of Benin is almost 10,000 miles long and at some points reaches more than 60 feet in height. Even though it holds a place in the 1982 Guinness Book of World Records as the most massive structure that has ever been constructed, almost no one outside of a select few archeologists and specialists has heard of its enormous breadth. This book attempts to change that forever. The Great Wall of Africa or Great Wall of Benin actually consists of a series of linear earthworks, many of them circular, some straight, some which stand on their own, and others that interconnect across a large area of Southern Nigeria. The Great Wall of Africa, like the Great Wall of China, is not a single wall, but a series of separate walls. Until the writing of this book, and another that I authored called: *From Man To Superman: Dr. John Henrik Clarke vs. Herman Cain, the Great Wall of Africa*, which stretches 9,941 miles long, was known popularly among African scholars as the Walls of Benin. However, as I shall show, like the Great Wall of China, they were created by a single civilization, and therefore, constitute one major wall system. Surprisingly, Benin is an area that cultural anthropologists, known as ethnographers have taken time to study and have written about extensively.

However, as Dr. Ivan Van Sertima pointed out in one of his lectures, one of the great flaws of scholarship on Africa is that:

"Anthropology has for a long time had a love affair with the primitive... man living on the edge of the world... The Great Wall of Africa consists of the Great Walls of Benin which are called Iya by the Beni people. To understand the enormity of The Great Wall of Africa, one must consider the magnitude of earth displaced to construct it. The Great Wall of Benin contains more

than 100 times the material of the Great Pyramid of Egypt (Pharaoh Khufu's Pyramid). This is no minor feat because the Great Pyramid is a massive structure, containing more stone than 30 Empire State buildings. In all, more than 9.1 billion cubic feet of earth was used to build the Great Wall of Benin over an 800-year time period. The average height of each wall is 3 meters or just under 10 feet high, however, some of the Iya tower almost 60 feet in height (18 meters). The Iya cover more than 2,500 square miles of land area. This massive effort took more than 150 million man-hours to construct. Simply put, if all of the material was taken from all of the buildings on New York City's borough of Manhattan, there would not be enough substance to build the Great Wall of Africa. The Great Wall of Africa contains more material than all of the financial district's buildings, all of midtown Manhattan's buildings and all of uptown Manhattan's buildings (Harlem) combined. The ancient Bini and Ishan people, the people of the Benin Empire, who built their wall, had no bulldozers, cranes or other equipment from the Caterpillar Corporation. They had no backhoe loaders, articulated trucks, or asphalt pavers... What they had was in many ways more impressive than all of these things. They were standing on the history of a continent that built 4,500 year-old pyramids that were 48 stories high, smelted carbon steel 2,000 years before the present, sent 2,400 ships to America 181 years before Christopher Columbus, produced the first universities in the world, understood how to perform surgery on the eye to remove cataracts 700 years ago, and that had charted star systems that were not discovered by Europeans and Americans until the Einstein Orbiting Satellite observed them in 1996.

South Africa is not an easy place in which to live. Soaring crime levels, xenophobia, rampant corruption, and the rise to power of the controversial Jacob Zuma all signal the end of the dream years. A new personal resilience is needed to cope with a new political uncertainty. "Load Shedding", successor to "At Risk", is a collection of non-fiction stories by some of South Africa's pre-eminent authors, journalists and commentators that reveal how we live under pressure. They cover subjects as diverse as love and family, death and dying, ethnic panic, war envy, sexual abuse and being Zulu in the time of Zuma. Written during the nation's period of load shedding, both electrical and psychological, these personal accounts shine new light on our contemporary South African World.

On the Razor's Edge Rodale Books

Breathtaking photographs of the Great Plains show the grandeur of prairie and sky, the sometimes subtle, sometimes brilliant colors of earth in the evening light, the enormous scale of the clouds and sun and horizon, and the wild creatures that live in this remarkable environment.

The Edge of Campus Jonathan Ball Publishers

This book is about WAR--not the causes and results, not the planning and the campaigns, not the artillery and the bombs. It is about the heinous crimes committed by the combatants, the horrifying experiences of civilians, the devastation of cities and villages, the killing and the dying, the glory leading to revulsion and guilt, and the assimilation of suffering that either ends in death or in the triumph of the soul. It looks at the

struggle of the church to remain faithful and the servants of the church who seek to bring sense and solace to the victims. It discusses antisemitism, racism, and war itself from biblical perspectives. It reveals the unjustifiable reasons for engaging in war and how this brings catastrophic results for all peoples--the mental instability of the survivors and the loss and grief of those on the home front. In war, how can men and women carry out the actions that they do? As Viktor Frankl writes: "After all, man is that being who has invented the gas chambers of Auschwitz; however, he is also that being who has entered those gas chambers upright, with the Lord's Prayer or the Shema Yisrael on his lips."

Funworld Bloomsbury Publishing USA

"A haunting account of one man's determination and the struggles of a people living in a deeply troubled country."-Booklist When William Powers went to Liberia as a fresh-faced aid worker in 1999, he was given the mandate to "fight poverty and save the rainforest." It wasn't long before Powers saw how many obstacles lay in the way, discovering first-hand how Liberia has become a "black hole in the international system"-poor, environmentally looted, scarred by violence, and barely governed. *Blue Clay People* is an absorbing blend of humor, compassion, and rigorous moral questioning, arguing convincingly that the fate of endangered places such as Liberia must matter to all of us.

Unusual Africa Verso

A discussion of the foreign relations of the United States relating especially to Japan and Mexico, and the question of Panama canal tolls.

The Edge of Doom Penguin Random House South Africa

In the Namibian harbour town of Lüderitz, a liminal space where desert meets ocean, a terrible history is made intimate and personal when filmmaker Henry van Wyk must confront a childhood tragedy that has moulded his life. Having returned to his birthplace in an attempt to get his career back on track, Henry struggles to complete a documentary he is working on. He whiles away his mornings swimming in a nearby tidal pool on Shark Island, and finds himself increasingly drawn to the small town and its romantic possibilities.

But the tranquil land hides a bloody history: Shark Island was once the site of a concentration camp, and a law firm is suing the German government for their role in the genocide of Namibia's indigenous people. When Henry begins to interview the survivors' descendants, their testimonies compel him to search the desert for a mass grave. *At the Edge of the Desert* is a meditation on loss, isolation and love, which asks us to consider the implications of telling someone else's story.

The Great Wall of Africa: the Empire of Benin's 10,000 Mile Long Wall Penguin Random House South Africa

Life contains innumerable mysteries, but none is more striking than when two young people begin questioning the possibility of the concept of predestination. How else, they eventually reason, would they, total strangers, find themselves boarding the same bus for a three-day journey, and sitting next to each other during the entire trip while headed to the same destination? Most young people, in their development, do not begin to consider very many profound mysteries of life, until they have accumulated certain profound life experiences after becoming mature adults. These two young people are forced to deal with these questions while in a state of innocence. In the end, perhaps an answer to certain mysteries will be resolved as a result of their exchanges and conclusions.

At the Edge of the Desert Knopf

At its rhythmic, beating heart, *Close to the Edge* asks whether hip hop can change the world. Hip hop—rapping, beat-making, b-boying, deejaying, graffiti—captured the imagination of the teenage Sujatha Fernandes in the 1980s, inspiring her and politicizing her along the way. Years later, armed with mc-ing skills and an urge to immerse herself in global hip hop, she embarks on a journey into street culture around the world. From the south side of Chicago to the barrios of Caracas and Havana and the sprawling periphery of Sydney, she grapples with questions of global voices and local critiques, and the rage that underlies both. An engrossing read and an exhilarating travelogue, this punchy book also asks hard questions about dispossession, racism, poverty and the quest for change through a microphone.
