This textbook

offers students a comprehensive and well written introduction to the scope and financial reporting disclosures of Australian accounting standards issued by the Australian Accounting Standards Board. The text incorporates extracts from the 2011 annual report of Billabong International, as well as media articles profiling its recent corporate events, in all chapters to

illustrate how a corporate entity measures, recognises, reports and discloses financial information required under Australian accounting standards. The integration of the Billabong International annual report will enable students to look beyond the numbers to develop interpretative and critical evaluation skills of accounting information. The integration of

the Billabong 2011 annual report, with its disclosure notes, will provide students with a deep understanding of the financial reporting and business activity associated with the financial performance of a well-known company. Featuring new translations, this volume differs from most texts on classical myth by putting the divine myths and principal legends of the Greeks in the contexts- anthropological, historical, religious, sociological, and economic- from which they emerged, including their debt to the Near East. Interspersed are short

essays on the later history of the myths and their importance to writers, artists, musicians, and philosophers down to our times. The many illustrations from ancient works of art show how the myths are visualized. The book concludes with a history of later ideas on classical myth, demonstrating their importance for us today. -- from Back Cover. AQA GCSE

This handbook engages key debates in Australian and New Zealand criminology over the last 50 years. In six sections, containing 56 original chapters, leading researchers and practitioners investigate topics such as the history of criminology; crime and justice data; law reform; gangs; youth crime; violent, white collar and rural crime;

cybercrime; terrorism; sentencing; Indigenous courts; child witnesses and children of prisoners; police complaints processes; gun laws; alcohol policies; and criminal profiling. Key sections highlight criminological theory and, crucially, Indigenous issues and perspectives on criminal justice. Contributors examine the implications of past and current trends in official data

collection, crime policy, and academic investigation to build up an understanding of under-researched and emerging problem areas for future research. An authoritative and comprehensive text, this handbook constitutes a long-awaited and necessary resource for dedicated academics, public policy analysts, and university students. Accounting in Organisations Text Publishing In its ninth

edition, The Human Species continues to provide a comprehensive approach to biological anthropology, especially the relationship between biology and culture, behavior in an evolutionary context, and humans as a species within the primate order. With its lively narrative and emphasis on the most current topics and findings in the field, The Human Species explores the major

questions that concern biological anthropologists about our species.

Classical Myth Prentice Hall The objective of Off-Balance Sheet Activities is to gain insights into, and propose meaningful solutions to, those issues raised by the current proliferation of off-balance sheet transactions. The book has

its origins in a New York University conference that focused on this topic. Jointly undertaken by the Vincent C. Ross Institute of Accounting Research and New York University's Salomon Center for the study of Financial Institutions at the Stern School of Business, the conference brought together academic researchers and practitioners in the field of accounting and finance to

address the issues with the broad-mindedness requisite of a group whose approaches to solutions are as different from each other as their respective theoretical and applied approaches to the disciplines of finance and accounting. The essays are divided into two sections. The first covers issues surrounding OBS activities and banking and begins with a brief introduction that places the essays

into context. OBS activities and the underinvestment problem, whether loan sales are really OBS, and money demand and OBS liquidity are examined in detail. Section two, which also begins with a brief introduction, focuses on issues of securitized assets and financing. A report on recognition and measurement issues in accounting for securitized assets is followed by

three separate discussion essays. Other subjects covered include contract theoretic analysis of OBS financing, the use of OBS financing to circumvent financial covenant restrictions, and debt contracting and financial contracting. The latter two contributions are also followed by discussion essays. This unique collection of papers will prove to be an interesting and valuable

tool for accounting and finance professionals as well as for academics involved in these fields. It will also be an important addition to public, college, and university libraries. Off-balance Sheet Activities CRC Press
