**Basic Clinical Massage Therapy** Simon and Schuster

Focusing on its therapeutic properties and capacity to enhance health and intimacy in all relationships, this book demystifies the medium of massage and makes it accessible for everyone in the family. Designed for the nonprofessional with simple step-by-step instructions, it teaches the three principles that make learning massage easy and fun. Also included are ideas for bringing home massage into daily life and how to use these principles to share massage with infants, children, adolescents, spouses, and the elderly. By emphasizing the innate healing power of touch to reduce stress and improve the immune system, this practical manual provides the tools for achieving health, relaxation, and connection with loved ones.

Combining Touch and Relaxation Skills for Cancer Care Elsevier Health Sciences

Written by the Director of the world-renowned Touch Research Institutes, this book examines the practical applications of important massage therapy research findings. Each chapter of this comprehensive resource provides a clear and authoritative review of what is reliably known about the effects of touch for a variety of clinical conditions such as depression, pain management, movement problems, and functioning of the immune system. Coverage also includes the benefits of massage to specific populations such as pregnant women, neonates, infants, and adolescents. This book is suitable for massage therapists (including Shiatsu practitioners), aromatherapists, chiropractors, osteopaths, physical therapists, and nurses. Provides a thorough yet concise review of recent research related to the importance of touch. Offers practical guidance to healthcare professionals whose work involves physical contact with patients.

*Medicine Hands Therapists Workbook and Journal* Lippincott Williams & Wilkins

This book offers a new sense of empowerment for the intimate partners of people living with serious health problems. Collinge draws on cutting-edge scientific research along with his experience counseling couples facing serious illness to offer a range of insights, strategies, and techniques that

caregivers can utilize to promote their partners' physical and emotional well-being—while also promoting their own. Topics include: • The importance of self-care for the caring partner • Ways of involving family and friends in a network of support • Simple massage and touch techniques to bring comfort and reduce symptoms • How open, affirmative communication can contribute to healing • Basic energy-healing techniques to promote well-being

Mosby's Pathology for Massage Therapists - E-Book Jones & Bartlett Learning

Education is undergoing a vast transformation through the creation of new technologies. While the workbook/journal format might seem low-tech by comparison, it has an important place in acquiring knowledge and skills. A workbook is the original self-paced learning system. Whether a practitioner is beginning to study massage for people affected by cancer or is deepening their practice, learning occurs through a number of directions: self-study, guided clinical lessons with an experienced teacher, supervised hands-on practice with clients, mentoring, and peer support via group interactions. "Medicine Hands", the textbook, addresses the knowledge needed to work safely with these clients. "Medicine Hands Therapist Workbook and Journal" focuses on practicing with the information so that it becomes more ingrained. The workbook and journal uses the following types of activities to build practitioner knowledge: \* quizzes \* supplemental activities \* awareness exercises \* reflective questions \* ethical dilemmas \* touch exercises \* case studies. Like "Medicine Hands", the workbook and journal continues the use of the pressure, site and position framework as a core tenet.

*Healing Massage* Lippincott Williams & Wilkins

The field of oncology massage is maturing into a discipline with a deeper and deeper body of knowledge. The 3rd edition of *Medicine Hands* reflects this maturation. Every chapter contains updated information and insights into massaging people affected by cancer. New chapters have been added to cover each stage of the cancer experience: treatment, recovery, survivorship, side effects from the disease, and end of life. These new chapters and organizational structure will make it easier for the reader to find the information needed to plan the massage session for a given client. In addition, a new chapter has been added that focuses on the Pressure/Site/Positioning framework. This is the clinical framework around which the massage session is planned.

*Theory & Practice of Therapeutic Massage* C.X. Cruz

Massage, aromatherapy, reflexology and a variety of relaxation techniques are frequently used in hospices, supportive care settings and some hospitals. However, there are still gaps and limitations in the choices offered to patients. HEARTS (Hands-on, Empathy, Aromas, Relaxation, Textures, Sound) was devised to bridge this gap for complementary therapists, patients, carers and health care professionals. HEARTS can be used either on its own, or integrated with a conventional complementary therapy. It can also be used easily by health care workers (and carers) who are not qualified in any therapies. By discussing principles which may influence the effectiveness of touch and relaxation therapies, the book emphasises that there are 'easy' approaches that can be utilised when working with distressed and vulnerable patients. By developing an understanding of touch, aromas and the sound of the human voice, *Combining Touch and Relaxation Skills for Cancer Care*

guides practitioners in helping their patients achieve a state of relaxation and calm as quickly and easily as possible.

#### **Deep Tissue Massage Treatment** Findhorn Press

The Fascial Distortion Model (FDM) was introduced by the American physician Stephen Typaldos (1957-2006). In this model all injuries and other conditions causing pain or disability are seen as arising from specific distortions of the connective tissue. This highly illustrated and very practical text and manual covers in detail the theoretical framework of the model, and approaches to manual therapy treatment based on an understanding of the FDM. The authors systematically cover all

disorders likely to be encountered by the therapist, and provide comprehensive guidance about when it is appropriate to use FDM and how best to employ these approaches in treatment. The book is therefore of interest and value to all practitioners who want to understand the FDM and to incorporate its techniques into their therapeutic practice. This is also a comprehensive textbook and manual for anyone studying on FDM courses and for specific qualifications.

*The Journey Through Cancer* is an essential guide for all cancer patients, their families, and their loved ones. As a board-certified oncologist, with more than ten years of experience serving as physician, guide, mentor, coach, and friend to thousands of cancer patients and their families, Dr. Jeremy Geffen has learned how cancer often challenges the mind, heart, and spirit of patients and their families as deeply --- if not more deeply --- than it challenges the physical body. Yet this simple truth is often overlooked by Western medicine as it aggressively pursues the best ways to diagnose and treat cancer. Too often physicians focus almost exclusively on the physical dimensions of the disease, rather than caring for the whole person who has the disease. Dr. Geffen presents a groundbreaking seven-level program, used at his cancer center in Florida, that addresses every dimension of the person with cancer--physical, mental, emotional, and spiritual: Education and Information, giving patients answers to questions about their disease and their treatment options. Psychosocial Support, focusing on the need for and benefits of a strong support network. The Body as Garden, exploring the vast array of alternative and complementary therapies. Emotional Healing, helping patients and families deal with the often overwhelming emotional challenges of cancer. The Nature of Mind, exploring how patients' thoughts and beliefs profoundly influence their journey. Life Assessment, showing patients how to discover their life's deepest meaning and purpose. The Nature of Spirit, connecting patients to the profoundly healing spiritual aspect of life we all share. In *The Journey Through Cancer*, Dr. Geffen presents a revolutionary model of healing based on the best treatments available from every culture and paradigm of medicine, one that respects and explores every possible avenue and resource for healing and transformation, blending East and West, body and mind, heart and technology, science and spirit.
