In the spring of 1966, while the war in Vietnam was still popular, the US military decided to reactivate the 9th Infantry Division as part of the military build-up. Across the nation, farm boys from the Midwest, surfers from California and city-slickers from Cleveland opened their mail to find greetings from Uncle Sam. Most American soldiers of the Vietnam era trickled into the war zone as individual replacements for men who had become casualties or had rotated home. Charlie Company was different as part of the only division raised, drafted and trained for service. From draft to the battlefields of South Vietnam, this is the unvarnished truth from the fear of death to the chaos of battle, told almost entirely through the recollections of the men themselves. This is their story, the story of young draftees who had done everything that their nation had asked of them and had received so little in return – lost faces of a distant war.

“This is a definitive account of the United Nations for a general audience, told by a master.” —Jim Hoagland, chief foreign correspondent, *The Washington Post* United Nations: A History begins with its creation in 1945. Although the organization was created to prevent war, many conflicts have arisen, ranging from The Korean War, to The Six Day War, to genocide in Bosnia and Rwanda. Stanley Meisler’s in-depth research examines the crises and many key political leaders. In this second edition, Meisler brings his popular history up to date with accounts of the power struggles of the last fifteen years, specifically spotlighting the terms of secretaries-general Boutros Boutros-Ghali, Kofi Annan and Ban Ki-moon. This is an important, riveting, and impartial guide through the past and recent events of the sixty-five-year history of the United Nations. “Balanced and insightful, this book is a must for anyone who wants to understand where the U.N. has been and, more importantly, how we might best use its potential for the future.” —Thomas R. Pickering, former US ambassador to

This volume makes available for the first time in English two of the most important novels of Japanese colonialism: Yuasa Katsuei’s *Kannani* and *Document of Flames*. Born in Japan in 1910 and raised in Korea, Yuasa was an eyewitness to the ravages of the Japanese occupation. In both of the novels presented here, he is clearly critical of Japanese imperialism. *Kannani* (1934) stands alone within Japanese literature in its graphic depictions of the racism and poverty endured by the colonized Koreans. *Document of Flames* (1935) brings issues of class and gender into sharp focus. It tells the story of Tokiko, a divorced woman displaced from her Japanese home who finds herself forced to work as a prostitute in Korea to support herself and her child. Tokiko eventually becomes a landowner and oppressor of the Koreans she lives amongst, a transformation suggesting that the struggle against oppression often ends up replicating the structure of domination. In his introduction, Mark Driscoll provides a nuanced and engaging discussion of Yuasa’s life and work and of the cultural politics of Japanese colonialism. He describes Yuasa’s sharp turn, in the years following the publication of *Kannani* and *Document of Flames*, toward support for Japanese nationalism and the assimilation of Koreans into Japanese culture. This abrupt ideological reversal has made Yuasa’s early writing—initially censored for its anticolonialism—all the more controversial. In a masterful concluding essay, Driscoll connects these novels to larger theoretical issues, demonstrating how a deep understanding of Japanese imperialism challenges prevailing accounts of postcolonialism.

Following the Inchon landings and the breakout from the Pusan Perimeter, UN forces crossed the North Korean border on 9 October and moved on the capital Pyongyang. Many in America believed the war would be over by Christmas, but some Washington diplomatic, military, and intelligence experts continued to raise dire warnings that the People's Republic of China might intervene. Nevertheless, General MacArthur decided to push on to the Chinese/North Korean border, the Yalu River. On 25 October, Communist Chinese Forces unexpectedly attacked Republic of Korea forces near Unsan. Then, on 25 November, the day after MacArthur announced a 'final offensive to end the war', the Chinese 13th Army Group struck in mass against the Eighth Army in the north-west corner of North Korea, overrunning the US 2nd and 25th Infantry Divisions. The Chinese attacks quickly shattered Truman's dream of a unified Korea. American, UN, and ROK forces could not hold a successful defensive line against the combined CCF and NKPA attacks. At the Chosin Reservoir, US Marine Corps and Army units retreated south whilst MacArthur's forces withdrew from Pyongyang and X Corps later pulled out of Hungnam. Using expert research, bird's-eye views, and full-colour maps, this study tells the fascinating history of the critical Yalu

campaign, including the famous retreat past the 38th Parallel.

Remembered Prisoners of a Forgotten War 2Dans

The Korean War POW remains the most maligned victim of all American wars. For nearly half a century, the media, general public, and even scholars have described hundreds of these prisoners as "brainwashed" victims who uncharacteristically caved in to their Communist captors or, even worse, as turncoats who betrayed their fellow soldiers. In either case, these boys apparently lacked the "right stuff" required of our brave sons. Here, at long last, is a chance to hear the true story of these courageous men in their own words-- a story that, until now, has gone largely untold. Dr. Carlson debunks many of the popular myths of Korean War POWs in this devastating oral history that's as compelling and moving as it is informative. From the Tiger Death March to the paranoia here at home, Korean POWs suffered injustices on a scale few can comprehend. More than 40 percent of the 7,140 Americans taken prisoner died in captivity, and as haunting tales of the survivors unfold, it becomes clear that the goal of these men was simply to survive under the most terrible conditions. Each survivor's story is a unique and personal experience, from missionary teacher Larry Zeller's imprisonment in the death cells of P'yongyang and his first encounter with the infamous killer known as The Tiger, to Rubin Townsend's daring escape from a death march by jumping off a bridge in a blinding snowstorm. From capture to forced marches, isolation, permanent camps, and torture, *Remembered Prisoners of a Forgotten War* is one of the most fascinating and disturbing books on the Korean War in years-- and a brutally honest account of the Korean POW experience, in the survivors' own words.

"With its surging storyline, extraordinary events, and depth of character, this gripping tale of 120 Chinese boys sent to America...reads more like a novel than an obscure slice of history." —Publishers Weekly, starred review In 1872, China—ravaged by poverty, population growth, and aggressive European armies—sent 120 boys to America to learn the secrets of Western innovation. They studied at New England's finest schools and were driven by a desire for progress and reform. When anti-Chinese fervor forced them back home, the young men had to overcome a suspicious imperial court and a country deeply resistant to change in technology and culture. *Fortunate Sons* tells a remarkable story, weaving together the dramas of personal lives with the fascinating tale of a nation's endeavor to become a world power.

The Korean War lasted for three years, one month, and two days, but armistice talks occupied more than two of those years, as more than 14,000 Chinese prisoners of war refused to return to Communist China and demanded to go to Nationalist Taiwan, effectively hijacking the negotiations and thwarting the designs of world leaders at a pivotal moment in Cold War history. In *The Hijacked War*, David Cheng Chang vividly portrays the experiences of Chinese prisoners in the dark, cold, and damp tents of Koje and Cheju Islands in Korea and how their decisions

derailed the high politics being conducted in the corridors of power in Washington, Moscow, and Beijing. Chang demonstrates how the Truman-Acheson administration's policies of voluntary repatriation and prisoner reindoctrination for psychological warfare purposes—the first overt and the second covert—had unintended consequences. The "success" of the reindoctrination program backfired when anti-Communist Chinese prisoners persuaded and coerced fellow POWs to renounce their homeland. Drawing on newly declassified archival materials from China, Taiwan, and the United States, and interviews with more than 80 surviving Chinese and North Korean prisoners of war, Chang depicts the struggle over prisoner repatriation that dominated the second half of the Korean War, from early 1952 to July 1953, in the prisoners' own words.

A person could write a history story every day for the rest of his life and not come close to covering all the history of America. The history of America in the last five hundred years reflect every human experience that man possesses. The stories selected for this book depict men, women and events of every possible description. Most of these stories are not found in high school history books, yet are influential in the development of America. Kit Carson fought Indians, but also guided Fremont through the West. Elizabeth Blackwell became the first woman to receive a medical degree in America at a time when women were not even thought of as citizens. Then, there is the innovative genius of the Burma-Shave signs that sold shaving cream all over the country. History is a very delicate subject. The reader is at the mercy of the eye witness account of a person's actions or an event taking place. The eye witness from one side will see it one way while the person recording the event from the other side may see it differently. It is then up to the historian to decipher these varying

accounts and determine what really happened. It is possible that both sides were wrong. Historians have the task of inspecting as many versions of the same story as possible to come to some reasonable expectation of what actually took place. A case in point would be the story of the Alamo. Texans tell the story as they wanted it, while the Mexicans tell a story that is completely opposite (See Dequello inside). The stories in this book have been compared and researched as honestly as it is possible to do remembering that there are precious few eye witnesses left.

During his years as a POW in North Korea, "Doc" Boysen endured hardships he never intended to pass along, especially to his family. Men who refused to eat starved; his children would clean their plates. Men who were weak died; his children would develop character. They would also learn to fear their father, the hero. In a memoir at once harrowing and painfully poignant, Catherine Madison tells the stories of two survivors of one man's war: a father who withstood a prison camp's unspeakable inhumanity and a daughter who withstood the residual cruelty that came home with him. Doc Boysen died fifty years after his ordeal, his POW experience concealed to the end in a hidden cache of documents. In *The War Came Home with Him*, Madison pieces together the horrible tale these papers told—of a young captain in the U.S. Army Medical Corps captured in July 1950, beaten and forced to march without shoes or coat on icy trails through mountains to camps where North Korean and Chinese captors held him for more than three years. As the truth about her father's past unfolds, Madison returns to a childhood troubled by his secret torment to consider, in a new light, the telling moments in their complex relationship. Beginning at her father's deathbed, with all her questions still unspoken, and ending with their final conversation, Madison's dual memoir offers a powerful, intimate perspective on the suppressed grief and thwarted love that forever alter a family when a wounded soldier brings his war home.

American Wars Bloomsbury Publishing

Since the Korean War ended in 1953, a number of books and articles have been written about the air-to-air battles between the American F-86s and Russian MiGs. Some parts of the stories that appear in those publications are probably true, but many of them contain fantasies, exaggerations and even lies that are both preposterous and demeaning to the Air Force. Unfortunately much of what survives in the West as the history of those epic air battles is found in those partially flawed publications. I was in a position to know what was going on there since I spent a year observing the scene as an F-86 pilot fighting the MiGs with the 51st Fighter Wing. I have written this book because I want to leave history a more complete and honest picture of what went on there. I have been retired for more than fifty years, but my love for the Air Force and loathing for anything that reflects shame or dishonor on that great organization has compelled me to act. Feeling the way I do, writing in an effort to correct and enhance the record is an easy task since I enjoy writing and was reared to place real value in truth, honor and integrity and hate dishonesty, dissembling and deceit.
