"A compelling, important addition to Hill Harper's bestselling series, inspired by the numerous young inmates who write to him seeking guidance After the publication of the bestselling *Letters to a Young Brother*, accomplished actor and speaker Hill Harper began to receive an increasing number of moving letters from inmates who yearned for a connection with a successful role model. With disturbing statistics on African-American incarceration on his mind (one in six black men were incarcerated as of 2001, and one in three can now expect to go to

prison some time in their lifetimes), Harper set out to address the specific needs of inmates. A powerful message from the heart, *Letters to an Incarcerated Brother* provides advice and inspiration in the face of despair along with encouraging words for restoring a sense of self-worth. As the founder of Manifest Your Destiny, a nonprofit outreach program for at-risk teens, Harper has seen firsthand the transformative effect of mentorship and the power of a positive role model. This latest addition to Hill Harper's *Letters* series delivers visionary, compassionate responses to the real-life circumstances of inmates. As with the other *Letters* books, Harper includes moving contributions from top educators, activists, thought leaders, and entertainers. Uplifting and insightful, *Letters to an Incarcerated Brother* provides the hope and inspiration inmates

and their families need"--

For Introduction to Business courses. This best-selling text by Ricky Griffin and Ronald Ebert provides students with a comprehensive overview of all the important functions of business. Each edition has introduced cutting-edge firsts while ensuring the underlying principles that guided its creation, *Doing the Basics Best*, were retained. The seventh edition focuses on three simple rules- Learn, Evaluate, Apply. - NEW- Chapter 2: Understanding the Environments of Business - This new chapter puts business operations in contemporary context, explaining the idea of organizational boundaries and describing the ways in which elements from multiple

environments cross those boundaries and shape organizational activities. This chapter sets the stage as an introduction to some of the most important topics covered in the rest of the book, for example: - The Economics Environment includes the role of aggregate output, standard of living, real growth rate; GDP per capita; real GDP; purchasing power parity; and the Consumer Price Index. - The Technology Environment includes special attention to new tools for competitiveness in both goods and services and business process technologies, plus e

Make the right decisions with Horngren/Sundem/Stratton! Horngren/Sundem/Stratton's best-selling texts emphasize decision-making throughout each chapter. Decision-making is introduced in the early text chapters and also appears in many of the text features: "Making Managerial Decisions" boxes, critical thinking exercises, and more. As always, students develop a solid understanding of costs and cost behavior and the use of cost information for planning and control decisions, not just

inventory valuation. Two text versions enable faculty to select a text that only covers management accounting concepts (Chs. 1-14) or one that includes three chapters of financial accounting review (Chs. 1-17). New OneKey provides the convenience of having all text resources in a single location and available in your choice of course management platform: BlackBoard, WebCT, and CourseCompass. OneKey also includes PH Grade Assist online homework with automatic grading and infinite practice for students).

HUMAN GENETICS AND SOCIETY engages students and demonstrates the relevance of genetics with an integrated case-based approach. Written for non-science majors, this text grabs student attention and shows them the importance of genetics by placing concepts within real-life contexts that students can appreciate throughout every chapter. Not just relegated to features, boxes, and the end of chapters, this book's real-world cases and intriguing questions are woven throughout the chapter narrative, vividly showing students how and why the concepts of human genetics are vital to their personal lives and to society at large. *Personnel Management* Simon and Schuster  
Griffin/VanFleet, MANAGEMENT SKILLS: ASSESSMENT AND DEVELOPMENT, 1E, offers a comprehensive, real world approach to mastering the skills needed for a career in management. Because instructors often express the difficulty of creating an active learning environment, this text offers an active, not passive, way for students to learn management skills by challenging students to be self-reflective and asking them to complete numerous assessments, exercises, cases, and other activities. The authors also address

another major concern instructors have about students being visual learners by providing a unique Visualize the Skill section not found in any other text. To better enable students to learn about management, chapters are organized in an easy-to-follow format that contains: Assessing Your Skills (pre-assessment scales); Learning About the Skills (concept portion of the text); Practicing Your Skills (exercises); Using Your Skills (case analysis); Extending Your Skills (group and individual exercises); Visualizing the Skills (video exercises); Your Skills Now (assessing skills after working through the chapter); and Interpretations (scoring keys and comparison data). Pia Melody creates a framework for identifying codependent thinking, emotions and behaviour and provides an effective approach to recovery. Melody sets forth five primary adult symptoms of this crippling condition, then traces their origin to emotional, spiritual, intellectual, physical and sexual abuses that occur in childhood. Central to Melody's approach is the concept that the codependent adult's injured inner child needs healing. Recovery from codependence, therefore, involves clearing up the toxic emotions left over from these painful childhood experiences.

This volume provides comprehensible, strength-based perspectives on contemporary research and practice related to navigating mistakes, errors and failures across cultures. It addresses these concepts across cultural contexts and explores any or all of these three concepts from a positive psychology or positive organisational perspective, highlighting their potential as resources. The volume

further discusses the consequences of errors and failures at individual, organisational and societal levels, ranging from severe personal problems to organisational and collective crises, perspectives how those can be turned into opportunities for contingent and sustainable improvement processes. The book shows that there are significant cultural differences in the understanding, interpretation and handling of errors and failures. This volume provides practical guidance for transcultural understanding of mistakes, errors and failure through new models, ideas for self-reflection, therapeutic and counselling interventions and organisational change management processes. This book is a must for researchers and practitioners working on mistakes, errors and failures across cultures and disciplines!

The first step in any research is defining the problems to be studied and the questions to be asked. Campbell and his associates review and evaluate the kinds of problems currently being studied in organizational and industrial settings. The authors hope not to lay down impossible research ideals, but to describe a variety of strategies to enhance the probability of developing interesting and useful research.

Does the stability of personality vary by gender or ethnicity? Does a particular therapy work better to treat clients with one type of personality disorder than those with another? Providing a solution to thorny problems such as these, Aguinis shows readers how to better assess whether the relationship between two variables is moderated by group membership through the use of a statistical technique, moderated multiple regression (MMR). Clearly written, the book requires only basic knowledge of inferential statistics. It helps students, researchers, and practitioners determine whether a particular intervention is likely to yield dissimilar outcomes for members of various groups. Associated computer programs and data sets are available at the author’s website (<http://mypage.iu.edu/haguinis/mmr>).
