Healthcare is an industry that has seen great advancements in personalized services through big data analytics. Despite the application of smart devices in the medical field, the mass volume of data that is being generated makes it challenging to correctly diagnose patients. This has led to the implementation of precise algorithms that can manage large amounts of information and successfully use smart living in medical environments. Professionals worldwide need relevant research on how to successfully implement these smart technologies within their own personalized healthcare processes. Applications of Deep Learning and Big IoT on Personalized Healthcare Services is a pivotal reference source that provides a collection of innovative research on the analytical methods and applications of smart algorithms for the personalized treatment of patients. While highlighting topics including cognitive computing, natural language processing, and supply chain optimization, this book is ideally designed for network designers, analysts, technology specialists, medical professionals, developers, researchers, academicians, and post-graduate students seeking relevant information on smart developments within individualized healthcare.

### **Automating Records Services** Springer Nature

The Government Accounting (GAO) and the Defense Audit Survey (DAS) reports indicate that the lack of management control in food service has been associated with losses exceeding \$100 million. The US Army Natick Research, Development and Engineering center (NRDEC) was tasked to develop a concept for automating enlisted dining facility records in the Navy, Air Force, and Marine Corps. The Navy Automated Food Service Records (NAFSR) System was designed not only to automate many time-consuming calculations and report preparation procedures that burden a typical military food service staff but also to tighten the controls on inventory utilization and accountability. In addition, this prototype system tracks which individuals are entitled to

subsist at Government expense so that stricter access controls can be applied. The system also provides management with information necessary for an efficient food service operation. The system is an integration of new technology hardware and NRDEC-developed, state-of-the-art software. The functions that were addressed were Accounting, Menu Production, Inventory Control, Report Preparation/Archiving, Access Control, and File Maintenance. These functions were implemented into two environments: the ashore environment and the afloat environment. In addition to these functions, the afloat implementation addressed the issues of Private Dining Facilities, Stateroom Management, and more sophisticated remote terminal areas.

Gain the skills and knowledge to manage your core network services on Red Hat Enterprise Linux with help of self-tests and practical use cases Key Features Get the EX358 certification with this easy-to-follow guide while preparing for real-life challenges Learn everything you need to know about Linux system administration and automation using Ansible 2.9 Use practical use cases and exam-focused questions to prepare for the certification exam Book Description If you're ready to take the next step in your system engineering career with the EX358, then this book is for you. Packed with all the knowledge and skills that you need to configure and maintain services and applications on the Red Hat Linux 8 (RHEL OS 8) platform, this book will help you ace the exam and thrive at work. Red Hat Certified Specialist in Service Management and Automation will help you build a solid foundation of the most recent and up-to-date exam requirements and practice questions. Throughout the course of the book, you'll get hands-on experience with different technical processes needed to fully administer a Red Hat Enterprise Linux 8 system. This will include file storage, database management, direct configuration of applications, such as SMB shares, networking. You'll be well equipped with the configuration of essential components like firewall, SELinux, and iSCSI while learning how to automate these tasks using Ansible Automation 2.9 in order to

alleviate the burden of completing them by hand. By the end of this book, you'll have covered all essential topics to ace the Red Hat EX358 certification exam and add another feather to your career as a Red Hat Certified Specialist. What you will learn Attain the skills to take and pass the Red Hat EX358 certification exam Become familiar with the ways of leveraging Ansible Core 2.9 Gain deeper knowledge of the Red Hat Linux Networking with DNS, DHCP, and IP addressing Create your own link and master the networking domain through link aggregation creation Set up printers and email services through Linux servers Get up and running with MariaDB SQL databases Explore how to create and control web traffic Who this book is for This book is for you if you want to advance your career by adding the essential Red Hat certificate to your resume. It will be particularly useful for system administrators responsible for managing large enterprise environments, network services and Red Hat Certified Engineers interested in becoming a Red Hat Certified Architect (RHCA). Before reading this book, you must have a working knowledge of Red Hat Enterprise Linux and Ansible Automation and command line usage of Red Hat Enterprise Linux systems administration. General Services Administration Annual Report Packt Publishing Ltd

This is an overview of computer applications appropriate to small libraries - those institutions without the funding or staff to implement large, comprehensive systems. The author sketches out a general description of essential elements involved in automating aspects of library work as he describes the characteristics and capabilities of automated products and services in six broad application areas: circulation control, descriptive cataloging, online catalogue access, reference service, acquisitions and serials control, and library administration. The discussion briefly indicates the scope of automation and describes prevalent approaches in each area, citing examples of representative products and services where appropriate.

**Automating Ongoing Records Review** Packt Publishing Ltd  
Understanding Computers: An Overview for Records and Archives Staff should be read before the other computer-related modules in this programme, Automating Records Services and Managing

Electronic Records, as much of the basic information important to those modules is introduced here and so is not explained in those modules.

*Integrity in Government through Records Management* Chicago : Library Administration and Management Association, American Library Association

In line with the federal structure of the Nigerian State, tax administration in the country is multi-tiered. The Federal Inland Revenue Service is responsible for assessing, collecting and accounting for tax and other revenues accruing to the Federal Government. The States Boards of Internal Revenue and the Local Government Revenue Committees perform similar functions at the State and Local Government levels respectively. This book attempts to chronicle the changes that have been taking place within the Federal Inland Revenue Service since 2004 and how these activities have contributed to the reforms in the Nigerian tax system. Chapters include tax policy, tax legislation, judicial processes, modernisation, compliance and enforcement, taxpayer services and delivery standard, entrenching a strong ethical code, capacity building, asset management, security and safety management, cooperation and collaboration, international involvement, and tax treaty network and transfer pricing.

*Automating Media Centers and Small Libraries* HC Pro, Inc.

Leverage the low-code/no-code approach in IBM Cloud Pak for business automation to accelerate your organization's digital transformation Purchase of the print or Kindle book includes a free eBook PDF Key Features Get a comprehensive understanding of IBM Cloud Pak for Business Automation Take a deep dive into insights on RPA, workflow automation, and automated decisions Deploy and manage production-grade automated solutions for scalability, stability, and performance Book Description COVID-19 has made many businesses change how they work, change how they engage their customers, and even change their products. Several of these businesses have also recognized the need to make these changes within days as opposed to months or weeks. This has resulted in an unprecedented pace of digital transformation; and success, in many cases, depends on how quickly an organization can react to real-time decisions. This book begins by introducing you to IBM Cloud Pak for Business Automation, providing a hands-on approach to project implementation. As you progress through the chapters, you'll

learn to take on business problems and identify the relevant technology and starting point. Next, you'll find out how to engage both the business and IT community to better understand business problems, as well as explore practical ways to start implementing your first automation project. In addition, the book will show you how to create task automation, interactive chatbots, workflow automation, and document processing. Finally, you'll discover deployment best practices that'll help you support highly available and resilient solutions. By the end of this book, you'll have a firm grasp on the types of business problems that can be solved with IBM Cloud Pak for Business Automation. What you will learn Understand key IBM automation technologies and learn how to apply them Cover the end-to-end journey of creating an automation solution from concept to deployment Understand the features and capabilities of workflow, decisions, RPA, business applications, and document processing with AI Analyze your business processes and discover automation opportunities with process mining Set up content management solutions that meet business, regulatory, and compliance needs Understand deployment environments supported by IBM Cloud Pak for Business Automation Who this book is for This book is for robotic process automation (RPA) professionals and automation consultants who want to accelerate the digital transformation of their businesses using IBM automation. This book is also useful for solutions architects or enterprise architects looking for best practices to build resilient and scalable AI-driven automation solutions. A basic understanding of business processes, low-code visual modeling techniques, RPA, and AI concepts is assumed.

**ICT Developments in Nigerian Libraries** Facet Publishing Many organizations do not yet have a formal programme of records management, but increasingly they are recognizing the benefits of well managed records and the serious consequences of inadequate records systems. Establishing records management and maintaining an effective programme requires specialist expertise. This essential manual of practice provides a detailed guide to the concepts, skills and techniques of records management for organizational staff who have a responsibility for setting up, maintaining or restructuring a records management programme. It offers invaluable advice on the management of records in both electronic and traditional paper media, and focuses on the following areas: understanding records

management analysing the context for records management classifying records and documenting their context creating and capturing records; managing appraisal, retention and disposition maintaining records and assuring their integrity providing access implementing records management. The appendices provide a wealth of additional information including a list of standards for records management, an annotated bibliography and sources of further information, and details of professional and advisory bodies. Readership: This much needed manual is an indispensable purchase for organizations wishing to introduce better practices for managing their records. The book is intended to be of value to experienced records managers as well as LIS practitioners and newcomers to the field. It should be on the desk of every manager and every information professional with responsibility for records management.

**Recordfacts Update** Information Today Incorporated Published biennially since 1983, the Directory of Library Automation Software, Systems, and Services is recognized as the primary reference source for software packages used in automating libraries. This entirely new expanded edition provides detailed descriptions of hundreds of currently available microcomputer, minicomputer, and mainframe software packages and services. This new edition contains more comparative information on library applications software than is available from any other source.

Departments of State, Justice, Commerce, the Judiciary, and Related Agencies Appropriations for 1967 IGI Global

As a celebration of Anne Thurston's pioneering work on records and archives management as an essential basis for demonstrating integrity in government, this excellent volume brings together scholars and practicing archivists to discuss key issues around records as evidence for accountability, transparency and the protection of citizens' rights. Never before have authors from the developing and developed worlds come together to explore the intersection of records management, public administration and international development. The book covers Thurston's work, the importance of records management for effective governance and digital records management and preservation in developing countries. Case studies from across Africa enhance the theoretical and practical perspectives taken by the authors. This book is essential reading for scholars and

students interested in records management and good governance around the world.

Service Automation in the Public Sector John Wiley & Sons  
Covers the entire spectrum of steps and activities involved in the library automation process.

**Automating the Small Library** Libraries Unlimited  
Focused content on automating the user authentication and authorization tool for Windows environments Automation helps make administration of computing environments more manageable. It alleviates the repetition of repeating frequent tasks and automates just about any task for Active Directory, Windows PowerShell 2.0. Focused on everyday and frequently performed tasks, this indispensable guide provides you with the PowerShell solutions for these tasks. Solutions are presented in a step-by-step format so that you can fully grasp how the new Active Directory module for PowerShell provides command-line scripting for administrative, configuration, and diagnostic tasks. Walks you through the processes and tools required to automate everyday tasks Offers PowerShell solutions for maintaining a Windows Server 2008 R2 environment Includes real-world examples, explanations of concepts, and step-by-step solutions This unique book allows you to work more efficiently and effectively and keep up with the ever-increasing demands from businesses.

Records Administration Training IGI Global  
In recent years, automation has played a vital role in library systems that handle tasks of acquisition, cataloging, serials, and circulation. The automation of these operations has, in turn, minimized the demand for human interaction. *Robots in Academic Libraries: Advancements in Library Automation* provides an overview on the current state of library automation, addresses the need for changing personnel to accommodate these changes, and assesses the future for academic libraries as a whole. This book is essential for library leaders, technology experts, and library vendors interested in the future of library automation and its impact on the decline of human interaction in libraries.

*Robots in Academic Libraries: Advancements in Library Automation* White Plains, NY : Published for American Society for Information Science by Knowledge Industry Publications  
This edited volume highlights the latest advances in and findings from research on service automation in public sector

organizations. The contributing authors use a mix of social and technological approaches to increase readers' understanding of public service automation. The respective chapters discuss the automation of services in public organizations from a conceptual standpoint, present empirical examples of automation applications in public organizations, and consider the implementation-related challenges that can arise. The book's overall goal is to aid and inspire researchers and practitioners to expand their knowledge of service automation in public organizations, while also providing a foundation for policy development and future research. Following a brief introductory chapter, the book addresses major gaps in our current understanding of service automation in public organizations, and provides suggestions for future research. Moreover, it argues that there is a continued need to observe and learn from empirical examples, and a need for more critical studies on the social and societal consequences of increased service automation in public organizations.

This book constitutes the refereed proceedings of the 5th Iberoamerican Conference on Applications and Usability of Interactive TV , jAUTI 2016, held in conjunction with the III International Congress on Information Engineering and Information Systems, in La Habana, Cuba, in November 2016. The 11 full papers presented were carefully reviewed and selected from 30 submissions. The papers are organized in topical sections on IDTV content production and recommendation; video consumption and preservation; social TV; IDTV interaction techniques; IDTV user experiences.

*Interagency Training Program Catalog* White Plains, NY : Published for American Society for Information Science by Knowledge Industry Publications

Annotation Nigeria seems to be behind in a lot of areas North American, European, Australasian and even S.E. Asian librarians will say been there, done that long ago but that does not negate the fact that articles about the experience of placing computers in libraries, automation of processes, use of CD-ROMs, introduction of the Internet and so on are just as valid from people doing it now, today for the first time, as they were from when many of us did it 20 or 30 years ago.

**Red Hat Certified Specialist in Services Management and Automation EX358 Exam Guide** Emerald Group Publishing  
Published biennially since 1983, the "Directory of Library Automation Software, Systems, and Services is recognized as the primary reference source for software packages used in automating libraries. This entirely new and expanded edition includes information on software for library automation, information management, text retrieval, and citation management. Library automation tools, retrospective conversion products and services, Internet resources on the topic of library automation, database hosts, CD-ROM distributors, library automation books and serials, and over 100 important meetings and conferences are also covered. This new edition contains more comparative information on library applications software than is available from any other source.

Managing Records Chicago, Ill. : Society of American Archivists  
Information and records management has been an important part of society for establishing procedures to effectively manage information. As technology has increased in society, this essential function has been impacted as well. With the onset of technological tools brought upon by the fourth industrial revolution, technologies such as artificial intelligence, the internet of things, big data, and more have changed the face of information and records management. These technologies and tools have paved new ways for security, efficiency in timely processes, new ways to create and process records, and other beneficial traits. Along with these advancements come new contemporary issues, leading to the need for research on how exactly information records management is functioning in modern times, the technologies brought on by the fourth industrial revolution, and both the benefits and challenges to this transition. *The Handbook of Research on Information and Records Management in the Fourth Industrial Revolution* showcases contemporary issues and demonstrates the value of information and records management in the fourth industrial revolution. The book provides a summary of the key activities undertaken by information and records managers as they seek to make records and information management more visible in the modern knowledge-driven society. The chapters highlight innovation, the use of information and communication technology in information and records management, best practices, challenges

encountered, and how they are overcome. The target audience of this book will be composed of professionals, librarians, archivists, lecturers, and researchers working in the field of library and

information science, along with practitioners, academicians, and students interested in information and records management in the 21st century.
