String Processing and Information Retrieval Springer Nature

In this volume the relevance of fungi for agriculture is discussed in four sections. The first one 'Food and Fodder Production' concerns the application and potential of mushrooms, straw enrichment, and food or crop spoilage. The next section 'Mycotoxins and Detoxification' deals with the biosynthesis of mycotoxins and the use of fungi in organopollutant degradation. A large section entitled 'Disease Control, Diagnostic, and Management' covers various aspects of biological control (fungi, insects, and weeds), diagnostics with emphasis on the example of *Magnaporthe grisea*, and disease management with focus on the important fungal pathogens *Phoma*, *Fusarium*, rusts and powdery mildew. The last section 'Update on Host-Parasite Interactions' discusses signal transduction, avirulence determinants, phytotoxins, cell wall degradation, and the coevolution of pathogenic fungi and grass hosts.

Journal of Arboriculture BRILL

This book constitutes the refereed proceedings of the 29th International Symposium on String Processing and Information Retrieval, SPIRE 2022, held in Concepción, Chile, in November 2022. The 23 full papers presented in this volume were carefully reviewed and selected from 43 submissions. They cover topics such as: data structures; algorithms; information retrieval; compression; combinatorics on words; and computational biology.

Competition Science Vision (monthly magazine) is published by Pratiyogita Darpan Group in India and is one of the best Science monthly magazines available for medical entrance examination students in India. Well-qualified professionals of Physics, Chemistry, Zoology and Botany make contributions to this magazine and craft it with focus on providing complete and to-the-point study material for aspiring candidates. The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

Agricultural Applications by Mocktime Publication

This volume constitutes the proceedings of the 16th International Conference on Theorem Proving in Higher Order Logics (TPHOLs 2003) held September 8–12, 2003 in Rome, Italy. TPHOLs covers all aspects of theorem proving in higher order logics as well as related topics in theorem proving and verification. TPHOLs 2003 was co-located with TABLEAUX, the International Conference on Automated Reasoning with Analytic Tableaux and Related Methods, and with Calculemus, the Symposium on the Integration of Symbolic Computation and Mechanized Reasoning. There were 50 papers submitted to TPHOLs in the full research category, each of which was refereed by at least 3

reviewers, selected by the program committee.

Of these submissions, 21 were accepted for presentation at the conference and publication in this volume. In keeping with tradition, TPHOLs 2003 also offered a venue for the presentation of work in progress, where researchers - vite discussion by means of a brief preliminary talk and then discuss their work at a poster session. A supplementary proceedings containing associated papers for work in progress was published by the computer science department at the University at Freiburg. The organizers are grateful to Jean-Raymond Abrial, Patrick Lincoln, and Dale Miller for agreeing to give invited talks at TPHOLs 2003. The TPHOLs conference traditionally changes continent each year in order to maximize the chances that researchers from around the world can attend.

Ever since its original publication in Germany in 1938, Max Schweidler's *Die Instandsetzung von Kupferstichen, Zeichnungen, Buchern usw.* has been recognized as a seminal modern text on the conservation and restoration of works on paper. To address what he saw as a woeful dearth of relevant literature and in order to assist those who have 'set themselves the goal of preserving cultural treasures,' the noted German restorer composed a thorough technical manual covering a wide range of specific techniques, including detailed instructions on how to execute structural repairs and alterations that, if skilfully done, can be virtually undetectable. By the mid-twentieth century, curators and conservators of graphic arts, discovering a nearly invisible repair in an old master print or drawing, might comment that the object had been 'Schweidlerized.' This volume, based on the authoritative revised German edition of 1949, makes Schweidler's work available in English for the first time, in a meticulously edited and annotated critical edition. The editor's introduction places the work in its historical context and probes the philosophical issues the book raises, while some two hundred annotations

[The Calendar](#) University of Illinois Press

The book addresses a controversial current topic in language acquisition studies: the impact of frequency on linguistic structure in child language. A major strength of the book is that the role of input frequency in the acquisition process is evaluated in a large variety of languages, topics and the two major theoretical frameworks: UG-based and usage-based accounts. While most papers report a clear frequency effect, different factors that may be interacting with pure statistical effects are critically assessed. An introductory statement is made by Thomas Roeper who calls for caution as he identifies frequency as a non-coherent concept and argues for a precise definition of what can and cannot be explained by statistical effects.

Any attempt to homogenize Kashmiri society or the politico-cultural discourse on Kashmir is a dangerously flawed exercise. To that end, the chapters in this book address various aspects of the political, cultural, and socioeconomic life in Kashmir. These chapters are interdisciplinary interventions that could potentially bridge ethnic, religiocultural, and political divides in the region. The book is divided into three sections: the first section explores history and memory, offering a critical dialogue between these phenomena and fiction. The chapters in section two offer a critical dialogue between history, politics, and gender, analyzing historical and political discourses to underscore the agential capacities of Kashmiri women, which are, traditionally, subsumed within masculinist discourse. The sole chapter in section three foregrounds the complex relationship between history, trauma, and poetry. Taken together, this book is a nuanced attempt at giving readers the opportunity to engage with multiple subjectivities, historical understandings, and political opinions. It will be of interest to general readers, scholars, and advanced students of Literature, Politics, History, Human Geography and Sociology. This book was originally published as a special issue of the South Asian Review.

Harpo Speaks! Arihant Publications India limited

Newspapers were a key source for popular opinion in the nineteenth century, and *The Newspaper Indian* is the first in-depth look at how newspapers and newsmaking practices shaped the representation of Native Americans, a contradictory representation that carries over into our own time. John M. Coward has examined seven decades of newspaper reporting, journalism that perpetuated the many stereotypes of the American Indian. Indians were not described on their own terms but by the norms of the white, Anglo-Saxon, Protestant society that wrote and read about them. Beyond the examination of Native American representation (and, more often, misrepresentation) in the media, Coward shows how Americans turned native people into symbolic and ambiguous figures whose identities were used as a measure of American Progress. *The Newspaper Indian* is a fascinating look at a nation and the power of its press. It provides insight into how Native Americans have been woven with newsprint into the very fabric of American life.
