Lives of the Irish saints : with special
festivals, and the commemorations of
holy persons, compiled from calendars,
martyrologies, and various sources,
relating to the ancient church history of
Ireland.

The New American Cyclopaedia e-artnow

From 1725 until his death in 1741, Vitus
Bering commanded two of the most
ambitious journeys of exploration in the
18th century. Each required years of
overland travel across Asia to reach
desolate Kamchatka and the Pacific
coast of Siberia, where the crews had to
build their own ships. Only then could
the search for the mythical Northeast
Passage and the northwestern coastline
of America begin. During the last
decade, the discovery of forgotten
documents in Russian archives has
revitalised the study of these classic
expeditions, and the contributors to this
volume are all part of the new

scholarship. Here they examine such
topics as expedition historiography, the
participants' daily life, the beginnings of
scientific ethnography and the
connection between the expeditions'
scientific objectives and their political
ends. These political goals included the
colonisation of northern Pacific islands
and the North American coast, and
manifested themselves in two sets of
instructions - one genuine, one false.

Lives of the Irish Saints Princeton
University Press

Germany's imperial era (1871-1918)
continues to attract both scholars and
the general public alike. The American
historian Roger Chickering has referred
to the historiography on the Kaiserreich
as an 'extraordinary body of historical
scholarship', whose quality and diversity
stands comparison with that of any other
episode in European history. This
Companion is a significant addition to
this body of scholarship with the
emphasis very much on the present and
future. Questions of continuity remain a
vital and necessary line of historical
enquiry and while it may have been
short-lived, the Kaiserreich remains
central to modern German and European
history. The volume allows 25 experts,
from across the globe, to write at length
about the state of research in their own
specialist fields, offering original insights
as well as historiographical reflections,
and rounded off with extensive
suggestions for further reading. The

chapters are grouped into five thematic sections, chosen to reflect the full range of research being undertaken on imperial German history today and together offer a comprehensive and authoritative reference resource. Overall this collection will provide scholars and students with a lively take on this fascinating period of German history, from the nation's unification in 1871 right up until the end of World War I.

The Authority of the Word Routledge
Prepare yourself for discoveries and new adventures with this incredible book about the true origin of wanderlust. This edition forms a complete history of the earliest start and progress of navigation, discovery, and commerce, by sea and land, from the earliest ages to the early 19th century. First part of the work covers voyages and travels of discovery in the middle ages; from the era of Alfred, King of England, in the ninth century to that of Don Henry of Portugal at the commencement of the fourteenth century. Second part deals with general voyages and travels chiefly of discovery; from the era of Don Henry, in 1412, to that of George III. in 1760. The rest of the work has some particular voyages and travels arranged in systematic order, Geographical and Chronological, and studies voyages during the era of George III conducted upon scientific principles, by which the Geography of the globe has been nearly perfected.

During the nineteenth and early twentieth centuries, the tourism industry of Bavaria consistently promoted an image of 'grounded modernity'. This romanticized version of the present reconciled continuity with change, tradition with progress, and nature with science. In an era of rapid and unprecedented change, simultaneously nostalgic and progressive grounded modernity produced an illusion of continuity. It helped make the experience of modernity more tangible by linking impersonal and abstract ideas, like national identity, with familiar experiences and concrete sights. Bavarian Tourism and the Modern World, 1800-1950 examines the connections between Bavarian tourism and the turbulent experience of German modernity during this period. It gauges Germany's long and often unsettling journey to modernity using Bavarian tourism and travel as a lens. Closely examining guidebooks, brochures, postcards and other tourist propaganda, Adam Rosenbaum argues that by pointing visitors to the past, tourism

illuminated the present, and produced signposts to the future.

Richard Wagner (1813-1883) aimed to be more than just a composer. He set out to redefine opera as a "total work of art" combining the highest aspirations of drama, poetry, the symphony, the visual arts, even religion and philosophy.

Equally celebrated and vilified in his own time, Wagner continues to provoke debate today regarding his political legacy as well as his music and aesthetic theories. *Wagner and His World* examines his works in their intellectual and cultural contexts. Seven original essays investigate such topics as music drama in light of rituals of naming in the composer's works and the politics of genre; the role of leitmotif in Wagner's reception; the urge for extinction in *Tristan und Isolde* as psychology and symbol; Wagner as his own stage director; his conflicted relationship with pianist-composer Franz Liszt; the anti-French satire *Eine Kapitulation* in the context of the Franco-Prussian War; and responses of Jewish writers and musicians to Wagner's anti-Semitism. In addition to the editor, the contributors are Karol Berger, Leon Botstein, Lydia Goehr, Kenneth Hamilton, Katherine Syer, and Christian Thorau. This book also includes translations of essays, reviews, and memoirs by champions and detractors of Wagner; glimpses into his domestic sphere in Tribschen and Bayreuth; and all of Wagner's program

notes to his own works. Introductions and annotations are provided by the editor and David Breckbill, Mary A. Cicora, James Deaville, Annegret Fauser, Steven Huebner, David Trippett, and Nicholas Vazsonyi.

The Ashgate Research Companion to Imperial Germany e-artnow

Franconia, the stretch of Germany between the Spessart and the Fichtelgebirge, is captured in this striking guide. Rich in scenery from the raw climes of low mountains to the idyllic Fränkische Schweiz, from the gentle curves of the River Main to the glittering lakes of the Fränkisches Seenland, and from the dense forest of the Steigerwald to the open fields of the Ochsenfurter Gau, the region is showcased here for its diverse landscape as well as its artistic and cultural monuments, telling of Franconia's turbulent past. Its impressive churches are investigated along with its magnificent pilgrimage chapels, such as those at Vierzehnheiligen and Gößweinstein, depicting the legacy of a people deeply rooted in religion. The free cities of Nuremberg, Rothenburg ob der Tauber, and many others are portrayed, still effusing a sense of civic pride through its countless castles and palaces, illustrating a thirst for representation and power. The margravian residences of Ansbach and Bayreuth, medieval strongholds on the peaks of the Fränkische Schweiz, and the Schönborn dynasty's palace in Pommersfelden also grace this guide. Showcasing Franconia in all its glorious variety, this handbook also contains additional features on its culinary delights, traditional festivals, artists and architects, and the intriguing case of Kaspar Hauser.

This book examines scriptural authority and its textual and visual instruments, asking how words and images interacted to represent and by representing to constitute authority, both sacred and

secular, in Northern Europe between 1400 and 1700.
