CAMERON CAMERON

The Metalanguage of Translation Psychology Press

The *Stylistique comparée du français et de l'anglais* has become a standard text in the French-speaking world for the study of comparative stylistics and the training of translators. This updated, first English edition makes Vinay & Darbelnet's classic methodology of translation available to a wider readership. The translation-oriented contrastive grammatical and stylistic analyses of the two languages are extensively exemplified by expressions, phrases and texts. Combining description with methodological guidelines for translation, this volume serves both as a course book and through its detailed index and glossary as a reference manual for specific translation problems.

Ideology, Censorship and Translation Bloomsbury Publishing

This book brings together an international team of leading translation teachers and researchers to address concerns that are central in translation pedagogy. The authors address the location and weighting in translation curricula of learning and training, theory and practice, and the relationships between the profession, its practitioners, its professors and scholars. They explore the concepts of translator competence, skills and capacities and two papers report empirical studies designed to explore effects of the use of translation in language teaching. These are complemented by papers on student achievement and attitudes to translation in programmes that are not primarily designed with prospective translators in mind, and by papers that discuss language teaching within dedicated translation programmes. The introduction and the closing paper consider some causes and consequences of the odd relationships that speakers of English have to other languages, to translation and ultimately, perhaps, to their "own" language.

The Beginning Translator's Workbook John Benjamins Publishing Company

The comparative analysis of Welsh and English found in this book is based on a translation corpus consisting of just over thirty

novels and autobiographies from the late nineteenth century up to the early twenty-first century. Many of the original Welsh texts contain stylistic features which, in a context of intense bilingualism with English, benefit from the deliberate discussion and analysis in this volume. However, the work is intentionally descriptive rather than prescriptive, laying out patterns that are observed in the corpus, and making them available to Welsh writers and translators to adopt if or as required. As similarly the classic work in the field by Vinay and Darbelnet, this book examines its topics through the lens of translation techniques such as transposition, modulation and adaptation.

The Routledge Companion to Translation Studies University Press of America

Translating Culture Specific References on Television provides a model for investigating the problems posed by culture specific references in translation, drawing on case studies that explore the translational norms of contemporary Italian dubbing practices. This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling, and on contemporary television series, rather than cinema. Irene Ranzato's research involves detailed analysis of three TV series dubbed into Italian, drawing on a corpus of 95 hours that includes nearly 3,000 CSR translations. Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural, pragmatic and ideological implications of audiovisual translation for the small screen.

Translation and Affect Psychology Press

This volume painstakingly formulates a composite model of translation procedures that covers both linguistic and cultural aspects inherent in translation. The model is based on an integration of three classic taxonomies of translation procedures proposed by influential translation scholars, namely Vinay and Darbelnet (1995), Newmark (1988), and Dickins, Hervey and Higgins (2002/2016). The book combines these three taxonomies into an integrated model and extends it, effectively, to identify patterns of translation procedures and overall strategies in English-Kurdish translation of journalistic texts. The book is a

breakthrough in the field of journalistic translation between the two languages. With a clear definition and exemplification of each translation procedure, the importance of the model is that it is replicable for future descriptive translation studies and can be carried out in other language pairs and on other genres.

Moreover, the model is comprehensive in nature, and covers almost all translational changes and shifts that may occur in the translation process. Thus, this model of translation procedures transcends previous frameworks in such a way that prospective translation researchers will not need to go back to these older models of translation procedures.

Manipulation in Translating British and American Press Articles in the People's Republic of Poland Peter Lang

Discourse on translation, at once a term referring to any text (works of translation included) that expresses the author's views, ideas and theorizations on translation – on its modes of operation, its dynamics, principles and methods, and/or on the philosophy, epistemology, ontology and hermeneutics of translation – and a term emphasizing the inseparable relation between power and knowledge, is an integral part of all translation traditions.

Journalistic Translation John Benjamins Publishing

At a time when information technology has become a regular tool of specialised translators in all aspects of their work, it is useful to place the activity of technical translation into its appropriate environment and to describe it from the point of view of its role in the broader context of communication in which it occurs. The advent of automated alternatives to human translation has fundamentally affected the profession, its products and the relationship between translators and their clients. This book presents and discusses the process of translation against this background. The context in which translation is normally studied is widened in order to re-examine the process of translation as part of interlingual text production and to analyse the manner in which the new tools affect the product of translation. This book is of particular relevance in modern translator training courses.

Contents 1. The language industry and translation, 2. Aspects of language, 3. Elements of communication theory, 4. A theory of text types and messages, 5. The nature of translation, 6.

Specifications: Factors influencing the translation, 7. Preparation for translation, 8. Steps in translation, 9. Human and Machine Translation, 10 Pragmatic circumstances of automation, 11. Translation in an information technology environment. Bibliography + Index.

The Legend of the Thousand Bulls University of Wales Press
This introductory textbook provides an accessible overview of the key contributions to translation theory. Jeremy Munday explores each theory chapter-by-chapter and tests the different approaches by applying them to texts. The texts discussed are taken from a broad range of languages - English, French, German, Spanish, Italian, Punjabi, Portuguese and English translations are provided. A wide variety of text types are analyzed, including a tourist brochure, a children's cookery book, a Harry Potter novel, the Bible, literary reviews and translators' prefaces, film translation, a technical text and a European Parliament speech. Each chapter includes the following features: a table introducing key concepts an introduction outlining the translation theory or theories illustrative texts with translations a chapter summary discussion points and exercises. Including a general introduction, an extensive bibliography, and websites for further information, this is a practical, user-friendly textbook that gives a balanced and comprehensive insight into translation studies.

Comparative Stylistics of Welsh and English Cambridge Scholars Publishing

This volume makes an important intercultural and interdisciplinary contribution to intercultural communications in Europe. The publication links linguistic aspects with psychological, social, economic, political, and cultural issues and creates a wide perspective encompassing the European heterogeneity of languages, cultures, traditions, and developments.

Translation and Language George Grace

Drawing on the expertise of over 90 contributors from more than 30 countries, this work offers a detailed overview of translation studies.

Chinese Discourses on Translation John Benjamins Publishing
Machine translation (MT) is the area of computer science and applied linguistics dealing with the translation of human languages such as English and German. MT on the Internet has become an important tool by providing fast, economical and useful translations. With globalisation and expanding trade,

demand for translation is set to grow. Translation Engines covers theoretical and practical aspects of MT, both classic and new, including: - Character sets and formatting languages - Translation memory - Linguistic and computational foundations - Basic computational linguistic techniques - Transfer and interlingua MT - Evaluation Software accompanies the text, providing readers with hands on experience of the main algorithms.

Introducing Translation Studies Routledge

The Handbook of Spanish-English Translation is a lively and accessible book for students interested in translation studies and Spanish. This book details the growth of translation studies from Cicero to postcolonial interpretations of translation as rewriting. It examines through examples the main issues involved in translation and interpretation, such as text types, register, interference, equivalence and untranslatability. The chapters on interpretation and audiovisual translation and the comparative analysis of Spanish and English are especially significant. The second part of the book offers a rich compilation of diverse Spanish and English texts (academic, literary, and government writings, comic strips, brochures, movie scripts and newspapers) and their published translations, each with a brief introduction by Professor Aranda.

Routledge Encyclopedia of Translation Studies Routledge

Key Terms in Translation Studies gives a comprehensive overview of the concepts which students of translation studies are likely to encounter during their study, whether at undergraduate or postgraduate level. The book includes definitions of key terms within the discipline, as well as outlines of the work of key thinkers in the field, including Eugene A. Nida, Gideon Toury, Hans J. Vermeer, and Lawrence Venuti. The list of key readings is intended to direct students towards classic articles, as well providing a springboard to further study. Accessibly written, with complicated terms and concepts explained in an easy to understand way, Key Terms in Translation Studies is an essential resource for students.

Intercultural Europe Routledge

Let the meta-discussion begin, James Holmes urged in 1972. Coming almost forty years later years filled with fascinating and often unexpected developments in the interdiscipline of Translation Studies this volume offers the reader a multiplicity of meta-perspectives, while also moving the discussion forward.

Indeed, the (re)production and (re)use of metalinguistic metaphors frame and partly determine our views on research, so such a discussion is vital -as it is in any scholarly discipline. Among other questions, the eleven contributors draw the reader's attention to the often puzzling variations of usage and conceptualization in both the theory and the practice of translation. First published as a special issue of *Target* 19:2 (2007), the volume runs the gamut of metalinguistic topics, ranging from terminology, localization and epistemological questions, through the Chinese perspective, to the conceptual mapping of the online Translation Studies Bibliography."

Translation Routledge

Over the past few decades, the book series *Linguistische Arbeiten* [Linguistic Studies], comprising over 500 volumes, has made a significant contribution to the development of linguistic theory both in Germany and internationally. The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses. To this end, we invite submission of high-quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions, discuss new data and advance the development of linguistic theory.

Studies in Contrastive Linguistics John Benjamins Publishing

Many "translation solutions" (often called "procedures," "techniques," or "strategies") have been proposed over the past 50 years or so in French, Chinese, Russian, Ukrainian, English, Spanish, German, Japanese, Italian, Czech, and Slovak. This book analyzes, criticizes and compares them, proposing a new list of solutions that can be used in training translators to work between many languages. The book also traces out an entirely new history of contemporary translation studies, showing for example how the Russian tradition was adapted in China, how the impact of transformational linguistics was resisted, and how scholarship has developed an intercultural metalanguage over and above the concerns of specific national languages. The book reveals the intensely political nature of translation theory, even in its most apparently technical aspects. The lists were used to advance the agendas of not just linguistic nationalisms but also

state regimes – this is a history in which Hitler, Stalin, and Mao all played roles, Communist propaganda and imperialist evangelism were both legitimized, Ukrainian advances in translation theory were forcefully silenced in the 1930s, the Cold War both stimulated the application of transformational grammar and blocked news of Russian translation theory, French translation theory was conscripted into the agenda of Japanese exceptionalism, and much else.

Dictionary of Translation Studies Lexington Books

Challenging theoretical concepts, this study of translation extends the field of inquiry to cross-cultural factors and ideology. The corpus spans across languages and literatures, highlighting themes across multimodal genres. It accounts for the universalistic view of interjections, and conversely their linguistic specificity as identity markers.

Beyond Borders Springer Nature

Drawing together some of the leading authors in tourism, this text

provides state-of-the-art reviews of research in fields of tourism. The text also revisits classic reviews which first appeared in *Progress in Tourism, Recreation and Hospitality Management* series, over a decade before the publication of this title. Topics covered include gender, alternative tourism, urban tourism, heritage tourism and environmental auditing.

Introducing Corpus-based Translation Studies Routledge

This highly engaging book presents a comprehensive analysis of the key traditional and contemporary paradigms of translation theory. With examples from a range of languages and a wealth of tasks and activities, it is ideal for students at home and in class. *Language Engineering and Translation* University Press of America

Published at a time of unprecedented growth of interest in translation, the *Dictionary of Translation Studies* aims to present the insights of a number of different approaches to translation in an unbiased, non-partisan way. With more than 300 articles, this

essential volume provides the reader with a snapshot of a rapidly developing discipline, based on work produced in several languages. With a clear, easy-to-follow layout, the *Dictionary* provides a comprehensive and highly accessible survey of key terms and concepts (such as Abusive Translation, Equivalence, Informationsangebot, Minimax Principle, Texteme and Thick Translation), types of activity (Autotranslation, Dubbing, Signed Language Interpreting), and schools and approaches (Leipzig School, Manipulation School, Nitra School). Each term is presented within the context in which it first occurred and is given a definition which is both clear and informative. Major entries include a discussion of relevant viewpoints as well as comments on how the usage and application of the term have developed subsequent to its coining. In addition, all entries provide suggestions for further reading, and there is an extensive bibliography included at the end. This is an indispensable tool for anyone studying or teaching translation at university level.
