From the New York Times bestselling authors of *Sprint* comes a simple 4-step system for improving focus, finding greater joy in your work, and getting more out of every day. "A charming manifesto—as well as an intrepid do-it-yourself guide to building smart habits that stick. If you want to achieve more (without going nuts), read this book."—Charles Duhigg, bestselling author of *The Power of Habit* and *Smarter Faster Better* Nobody ever looked at an empty calendar and said, "The best way to spend this time is by cramming it full of meetings!" or got to work in the morning and thought, "Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned "design sprint," Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. *Make Time* is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. *Make Time* isn't about productivity, or checking off more to-dos. Nor does it propose

unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, "If only there were more hours in the day..." *Make Time* will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Love Her or Lose Her Rodale Books

New York Times Bestseller Stop—and even reverse!—age-related weight gain and muscle loss with the first-ever weight-loss plan specifically designed to shrink your belly, extend your life, and create your healthiest self at mid-life and beyond. You don't have to gain weight as you age. That's the simple yet revolutionary promise of *The Whole Body Reset*, which uncovers why standard diet and exercise advice stops working for us as we approach midlife—and reveals how simple changes to the way we eat can halt, and even reverse, age-related weight gain and muscle loss. *The Whole Body Reset* presents stunning new evidence about the power of "protein timing" for people at midlife—research that blows away current government guidelines, refutes the myth of slowing metabolisms and "inevitable" weight gain, and changes the way people in their mid-forties and older should think about food. *The Whole Body Reset* explains in simple, inspiring terms exactly how our bodies change with age, and how eating to accommodate those changes can make us respond to exercise as if we were twenty to thirty years younger. Developed by AARP, tested by a panel of more than 100 AARP employees, and approved by an international board of doctors, nutritionists, and fitness experts, *The Whole Body Reset* doesn't use diet phases, eating windows, calorie restriction, or other trendy gimmicks. Its six simple secrets and scores of recipes are easy to follow, designed for real people living in the real world. A dining guide even shows how to follow this program in popular restaurants from McDonald's to Starbucks to Olive Garden. And best of all: It works!

Keep the Memories, Lose the Stuff Galvanized Media

A deeply-reported examination of why "doing what you love" is a recipe for exploitation, creating a new tyranny of work in which we cheerily acquiesce to doing jobs that take over our lives. You're told that if you "do what you love, you'll never work a day in your life." Whether it's working for "exposure" and "experience," or enduring poor treatment in the name of "being part of the family," all employees are pushed to make sacrifices for the privilege of being able to do what we love. In *Work Won't Love You Back*, Sarah Jaffe, a preeminent voice on labor, inequality, and social movements, examines this "labor of love" myth—the idea that certain work is not really work, and therefore should be done out of passion instead of pay. Told through the lives and experiences of workers in various industries—from the unpaid intern, to the overworked teacher, to the nonprofit worker and even the professional athlete—Jaffe reveals how all of us have been tricked into buying

into a new tyranny of work. As Jaffe argues, understanding the trap of the labor of love will empower us to work less and demand what our work is worth. And once freed from those binds, we can finally figure out what actually gives us joy, pleasure, and satisfaction.

With more and more people realizing the need to exercise, gyms are cropping up at every nook and corner, roads are occupied by recreational runners and yoga schools have an enviable waiting list. But along with this has grown the number of injuries and disillusionment at not getting 'results'. This leads to fads. It's the exact same place 'diet' was five years ago when Rujuta wrote her first book *Don't Lose Your Mind, Lose Your Weight*. The basic problem is the complete lack of understanding about exercise, how it works and how to make it work for you. Through this book, Rujuta tackles pretty much every myth and fad to do with exercise, demystifies exercise for everyone and presents it as not a brainless activity but a science which has the potential to combat all lifestyle disorders including diabetes and obesity, way better than any drug. Strength training, Cardio and Yoga get a detailed chapter each along with their pre- and post workout meals, an often neglected but crucial aspect. So whether you are a beginner or want to take your workouts to the next level, the sample training schedules and real life workout examples with analysis and modifications will bridge the gap between knowing and doing and ensure that you are in a position to start and/or progress with a sensible, doable and a wholesome exercise plan.
