Twice-told Tales

Beacon Press (MA)
Lavishly illustrated with a wealth of rare photos and drawings, this is the first and only fully authorized, comprehensive companion to seven seasons of the television show "TV Guide" called "the best acted, written, produced, and altogether finest of the four "Trek" series".

Short Stories

Springer

The twelve award winning translations of short stories by master storytellers from the first All India Katha Translation Contest are testimony to this most variegated literary form.

Real-Time Image and Video Processing Katha

The Hortas of Janus VI are the greatest miners in the galaxy, capable of burning through

solid rock the way humanoids move through air. Recruited to help rebuild Bajor's devastated mining industry, the Hortas could provide new hope for the planet's struggling economy. But when Cardassian raiders abduct the Mother Horta, Commander Sisko finds himself stuck with twenty Horta eggs -- and then the eggs begin to hatch... While Major Kira leads a desperate rescue mission deep into Cardassian space, Commander Sisko faces a ravaging mass of newborn Hortas -- uncontrollable, indestructible, and eager to consume Deep Space Nine™ itself!
Princess Rose And The Golden Bird Springer
This open access

volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development

(ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address

critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

Vascular Surgery

Springer Nature

An improved understanding of the interactions between nanoparticles and plant retorts, including their uptake, localization, and activity, could

revolutionize crop production through increased disease resistance, nutrient utilization, and crop yield. This may further impact other agricultural and industrial processes that are based on plant crops. This two-volume book analyses the key processes involved in the nanoparticle delivery to plants and details the interactions between plants and nanomaterials. Potential plant nanotechnology applications for enhanced nutrient uptake, increased crop productivity and plant disease management are evaluated with careful consideration regarding safe use, social acceptance and ecological impact of these technologies. Plant Nanobionics:

Volume 1, *Advances in the Understanding of Nanomaterials Research and Applications* begins the discussion of nanotechnology applications in plants with the characterization and nanosynthesis of various microbes and covers the mechanisms and etiology of nanostructure function in microbial cells. It focuses on the potential alteration of plant production systems through the controlled release of agrochemicals and targeted delivery of biomolecules. Industrial and medical applications are included. Volume 2 continues this discussion with a focus on biosynthesis and toxicity.

Dark Web Investigation

Simon and Schuster This carefully selected collection of Vaikom Muhammad Basheer's short stories are characterised by a variety in theme and tone. He has enshrined in them every kind of experience from the pangs of hunger and sex to the rapture of mystic vision. Its range includes stark realistic pictures of the material world as well as the realm of fantasy haunted by ghosts and spirits. Basheer has written on love and hate, on politicians and pickpockets, on the fancies of childhood and on the disillusionments of adult life with an intense sense of the tragedy of life and at the same time an irrepressible sense of humour.

Saline Soil-based Agriculture by Halotolerant Microorganisms Simon and Schuster
Revised and expanded edition How do you turn a paper mill into a gin distillery? Let every country in the Olympic Games take part in making and lighting the Olympic Cauldron? Design a building using an electron microscope? Produce a new bus for London that uses less fuel? Make someone eat your business card? Develop a new kind of mosque? Turn the back door of a hospital into its front door? Grow a meadow in the center of a city? Generate the form of a building in less than a minute? Use saliva as an ingredient of a Christmas card? Create a piece of architecture

that represents a nation? This is the definitive publication on one of the world's most exceptional designers. More than 600 pages, 140 projects and hundreds of photographs, illustrations, and sketches, this revised and expanded monograph will excite, inspire, and serve as an invaluable resource for creative solutions and the joy of making for many years to come.

The relatively new technique of solid phase microextraction (SPME) is an important tool to prepare samples both in the lab and on-site. SPME is a "green" technology because it eliminates organic solvents from analytical laboratory and can be used in environmental, food and fragrance, and forensic and drug analysis. This handbook offers a thorough background of the theory and practical implementation of SPME. SPME protocols are presented outlining each stage of the method and providing useful tips and potential pitfalls. In

addition, devices and fiber coatings, automated SPME systems, SPME method development, and In Vivo applications are discussed. This handbook is essential for its discussion of the latest SPME developments as well as its in depth information on the history, theory, and practical application of the method. Practical application of Solid Phase Microextraction methods including detailed steps Provides history of extraction methods to better understand the process Suitable for all levels, from beginning student to experienced practitioner
Division Street Kube Publishing Ltd
The olive (*Olea europaea*) is increasingly recognized

as a crop of great economic and health importance world-wide. Olive growing in Italy is very important, but there is still a high degree of confusion regarding the genetic identity of cultivars. This book is a source of recently accumulated information on olive trees and on olive oil industry. The objective of this book is to provide knowledge which is appropriate for students, scientists, both experienced and inexperienced horticulturists and, in general, for anyone wishing to acquire knowledge and experience of olive cultivation to increase productivity and improve product quality. The book is divided into two parts: I) the olive cultivation, table olive and olive oil

industry in Italy and II) Italian catalogue of olive varieties. All chapters have been written by renowned professionals working on olive cultivation, table olives and olive oil production and related disciplines. Part I covers all aspects of olive fruit production, from site selection, recommended varieties, pest and disease control, to primary and secondary processing. Part II contains the chapter on the description of Italian olive varieties. It is well illustrated and includes 200 elaiographic cards with colour photos, graphs and tables.

The Indian Listener

(fortnightly programme

journal of AIR in English) published by The Indian State Broadcasting Service, Bombay, started on 22 december, 1935 and was the successor to the Indian Radio Times in english, which was published beginning in July 16 of 1927. From August, 1937 onwards, it was published by All India Radio, New Delhi. In 1950, it was turned into a weekly journal. Later, The Indian listener became "Akashvani" in January 5, 1958. It was made a fortnightly again on July 1, 1983. It used to serve the listener as a bradshaw of broadcasting, and give listener the useful information in an interesting manner about programmes, who writes them, take part

in them and produce them along with photographs of performing artistS. It also contains the information of major changes in the policy and service of the organisation. NAME OF THE JOURNAL: The Indian Listener

Ghost Stories Katha Vascular surgery has experienced remarkable growth and diversification in the last decade, especially with its embracing the disruptive endovascular technological revolution. Vascular surgeons remain the only group of specialists capable of total treatment of patients with vascular disease, providing medical, minimally invasive, and surgical therapy. Although vascular surgeons practice in all areas of the world, practice patterns in different areas naturally have both similarities and differences that reflect

both regional patterns of disease, genetic characteristics of local peoples, cultural preferences for treatment, local political and economic situations, different access to resources and devices, as well as different training paradigms. Thus, the practice of vascular surgery has diversified and evolved in parallel in many areas, converging and diverging in many ways. Vascular Surgery: A Global Perspective provides the first review and comparison of the diversity of vascular surgery practice around the world. The book is grouped according to common vascular diseases such as aneurysmal and occlusive arterial disease, as well as

venous and lymphatic disease and dialysis access. Each major disease topic includes multiple chapters written by expert specialists from around the world, each discussing their local approach to the disease and its treatment. Similarly, the status of vascular surgery practice is addressed, including discussion of the influence of payment systems on practice, patient access to the internet for information, training paradigms, and the legal system including malpractice. This textbook provides the first worldwide summary of the care of patients with vascular disease and will be of interest to a wide audience including vascular surgeons,

vascular medical specialists, cardiologists, radiologists, internists, and family practice physicians.

The Bell and Other Stories D C Books

Everybody knows about Snow White. Now let's get to know about one more enchantress, Princess Rose and her story with Golden Bird.

Jumped in Morgan & Claypool Publishers
Interdisciplinary volume considers how nine arid/semi-arid river basins with irrigated agriculture will survive future climate change, siltation, and decreased flow.

Olive Germplasm

Simon and Schuster
A new collaboration by M.I.T and Harvard Medical School trained Neuroscientist and

Clinical Audiologist Dr. Keith N. Darrow - one of the top specialists in his field who continues to reach great heights of quality health care and treatment in audiology -- and Dr. Melinda 'Sunni' McBride a leading woman in hearing healthcare treatment, is a brilliantly informative and profoundly practical book about hearing loss which reveals an innovative approach to medically treating the cognitive aspects of hearing loss for individuals of all ages. In this day and age of modern medicine, approximately 48 million people suffer from hearing loss and the associated cognitive impairments which go along with it. Yet, it doesn't need to

be this way! Drs. Darrow and McBride have now joined the ranks of successful authors who care about your physical and mental health as you age. They always say, "Aging is inevitable, but decline is optional." The Hearing Transformation is set to be a game changer as those affected by hearing loss learn the correlation between it and the mind-robbing diseases of dementia, depression, social isolation and a sedentary lifestyle. These authors, between their numerous years of continuing education, practice in their field and research, are determined to reveal the science to maintaining independence and

increasing social engagement by bettering your hearing. Their passion, training and determination have led them to teach you about the proven benefits of NeuroTechnology(tm). In this groundbreaking book, Dr. Keith N. Darrow and Dr. Melinda McBride, AuD, document ways to reduce the risks of developing dementia and exposes the devastating impacts of hearing loss if left unchecked. He presents a comprehensive, step-by-step guide to better hearing, increasing cognitive function, increasing socialization and maximizing your quality of life. They offer the value behind NeuroTechnology(tm), which is at the heart of a more comfortable,

healthier way of living with the daily challenges of aging and hearing loss. And, they challenge some common myths about aging and dementia in correlation to hearing loss. This book is packed with information for those who want to learn how to live a better, more active, more engaged lifestyle regardless of age. Hearing is what connects us to others. It is the building block to communication in our personal and professional lives. You and your loved ones can break free from the stresses of hearing loss and avoid the unnecessary consequences of leaving it untreated. As science is helping us to live longer lives, we need to be best prepared for the

challenges that hearing loss and dementia can have on our golden years. Using Drs. Darrow and McBride's information and proven methods, you can once again achieve peak performance in your life. *Transform Your Life* is the only book you will ever need to learn all you need to know about this subject.

Drones for Biodiversity Conservation and Ecological Monitoring
Springer Nature

The Masterpieces of World Fiction series brings together the best-loved short stories by the great masters of the genre - from Chekov and Maupassant, Kipling and Wilde, to O. Henry and Saki and Tolstoy and Conrad. Thoughtfully compiled by the bestselling

author Terry O' Brien, this series is a great way for readers to revisit old favourites and for introducing literary masterpieces to newer, younger readers

Devil in the Sky Pen and Sword Military

This volume describes the identification of emerging organic pollutants, mainly from industrial sources, their associated toxicological threats, and the latest green methods and biotechnological solutions to abate harmful impacts on people and the environment. The chapters present reviews on current applied toxicology research, occupational health hazards and green remedial solutions for pollution control in terrestrial

and aquatic environments, with the aim of raising public awareness of these issues and providing chemists, toxicologists and environmental scientists with the knowledge to combat organic pollutants through sustainable means. Readers will learn about the multi-dimensional applications of materials and processes which harvest energy out of environmental remediation technologies, as well as the roles of biotechnology and nanotechnology in addressing high pollutant load. Specific attention is paid to technologies that draw energy through wastewater remediation, as this covers the primary

means by which organic pollutants are introduced into the environment from industry and other sources. The book will be of use to pollution control boards, industry regulators, and students and researchers in the fields of biotechnology, biomedical science, hydrology and water chemistry.

Warchild Springer

The emergence of the World Wide Web, smartphones, and Computer-Mediated Communications (CMCs) profoundly affect the way in which people interact online and offline. Individuals who engage in socially unacceptable or outright criminal acts increasingly utilize technology to connect with one another in ways that are not

otherwise possible in the real world due to shame, social stigma, or risk of detection. As a consequence, there are now myriad opportunities for wrongdoing and abuse through technology. This book offers a comprehensive and integrative introduction to cybercrime. It is the first to connect the disparate literature on the various types of cybercrime, the investigation and detection of cybercrime and the role of digital information, and the wider role of technology as a facilitator for social relationships between deviants and criminals. It includes coverage of: key theoretical and methodological perspectives, computer hacking and digital

piracy, economic crime and online fraud, pornography and online sex crime, cyber-bullying and cyber-stalking, cyber-terrorism and extremism, digital forensic investigation and its legal context, cybercrime policy. This book includes lively and engaging features, such as discussion questions, boxed examples of unique events and key figures in offending, quotes from interviews with active offenders and a full glossary of terms. It is supplemented by a companion website that includes further students exercises and instructor resources. This text is essential reading for courses on cybercrime, cyber-deviancy, digital forensics, cybercrime investigation and the

sociology of
technology.
