price This new book from

the NASA History Series
tackles an interesting duo
of biological problems
that will be familiar to
anybody who has seen
photos of Apollo
astronauts quarantined
after their return to
Earth. Namely, how do we
avoid contaminating
celestial bodies with
Earthly germs when we
send spacecraft to study

these bodies, and how do
we avoid spreading
foreign biological matter
from space when our
robotic and human
spacefarers return to
Earth? Biological matter
from an external system
could potentially cause an
unchecked epidemic
either on Earth or in space
so strict precautions are
necessary. Each time a

space vehicle visits another world it runs the risk of forever changing that extraterrestrial environment. We are surrounded on Earth by a melange of different microorganisms, and if some of these hitchhike onboard a space mission, they could contaminate and start colonies on a different planet. Such an occurrence would irrevocably alter the nature of that world, compromise all future scientific exploration of the body, and possibly damage any extant life on

it. By inadvertently carrying exotic organisms back to Earth on our spacecraft, we also risk the release of biohazardous materials into our own ecosystem. Such concerns were recognized by scientists even before the 1957 launch of Sputnik. This book presents the history of planetary protection by tracing the responses to the above concerns on NASA's missions to the Moon, Mars, Venus, Jupiter, Saturn, and many smaller bodies of our solar system. The book relates

the extensive efforts put forth by NASA to plan operations and prepare space vehicles that return exemplary science without contaminating the biospheres of other worlds or our own. To protect irreplaceable environments, NASA has committed to conducting space exploration in a manner that is protective of the bodies visited, as well as of our own planet." **New York Court of Appeals. Records and Briefs.** Springer Nature This book reflects the paradigm shift now

manifesting in Bangladesh's education system by highlighting recent empirical research. It shares essential insights by presenting research conducted on diverse aspects of current day education in Bangladesh, including policy and governance, equity, access and participation, curriculum and pedagogy, assessment, and education programs and projects run by NGOs. Further, it offers a platform for these unique studies to be showcased and disseminated to

scholars and researchers from developing and developed countries alike, and represents a unique reference resource for the education research community in Bangladesh, Asia and all over the world. With Foreword from Professor Serajul Islam Choudhury. United States Court of Appeals for the District of Columbia Circuit African Books Collective Intellectual property rights are essential for a firm's competitive edge and success and form the significant assets for

many firms. The authors of this book argue that intellectual property is a complex phenomenon, which inevitably requires a combination of both economic and legal considerations, because the lack of understanding of the mechanisms for the protection and preservation of IP can serve to undermine any of the potential economic benefits. The book outlines the opportunities that can be derived from the use of IP in business and also identifies the rules necessary for their

implementation. It offers a comprehensive, systemic research of intellectual property based on the most up-to-date legislation and cases of IP use in Russia. Such an approach will allow readers to fully understand the peculiarities of IP as a special phenomenon of the Russian market. There is a good balance between theoretical knowledge and practical implementation, and the plain language and unique approach to structuring information make the

book accessible and easy to understand. It contains a special glossary of terms to facilitate the understanding of the material presented in the book. Although the book looks specifically at the Russian case, it will have international appeal, since intellectual property, by its very nature, has become a transnational phenomenon. Moreover, the international regulatory framework provides for the similarity of legal regulation of IP. The book will find an audience among

researchers concerned with the economics and law of intellectual property, as well as, policymakers and practitioners involved in business IP.

DIANE Publishing

This handbook on services innovation is an invaluable tool for enhancing export profitability. It approaches innovation as a competitive strategy describing characteristics of services innovation and its relation with cultural

variables. It also outlines guidelines for establishing appropriate innovation; explains how to review quality assurance procedures; and clarify customer priorities.

Innovating for Success in the Export of Services also reviews the implementation cycle and examines innovation links to export readiness and export success. Practical exercises are included.

The Story of Bones

Dorrance Publishing
As part of its ongoing commitment to the nation's space program, NASA's medical leadership asked the Institute of Medicine (IOM) to review specific aspects of the scientific basis, policies, and procedures associated with the Longitudinal Study of Astronaut Health (LSAH). NASA created the LSAH in 1992 to address a variety of issues, including both the health of astronauts during space flight and the longer-term health

issues that might be associated with space flight and flight training. *Supreme Court Appeals Division* iUniverse
Derived from the renowned multi-volume International Encyclopaedia of Laws, this monograph on Cyprus not only describes and analyses the legal aspects of labour relations, but also examines labour relations practices and developing trends. It provides a survey of the subject that is both usefully brief and sufficiently detailed to

answer most questions likely to arise in any pertinent legal setting. Both individual and collective labour relations are covered in ample detail, with attention to such underlying and pervasive factors as employment contracts, suspension of the contracts, dismissal laws and covenant of non-competition, as well as international private law. The author describes all important details of the law governing hours and wages, benefits, intellectual property

implications, trade union activity, employers' associations, workers' participation, collective bargaining, industrial disputes, and much more. Building on a clear overview of labour law and labour relations, the book offers practical guidance on which sound preliminary decisions may be based. It will find a ready readership among lawyers representing parties with interests in Cyprus, and academics and researchers will appreciate its value in the study of comparative

trends in laws affecting labour and labour relations.

Bulletin ... U. S. National Aeronautics & Space Administration

This book explores diverse parent-child relationships from around the world, drawing on connections between culture and parenting values and challenges. It identifies parenting practices within various countries' unique historical, political, and cultural backgrounds, reframing parenting as a cultural process whose

goals are to encourage culturally-specific child behaviors and outcomes. Chapters focus on parenting research in a range of countries, such as Australia, Bolivia, China, Egypt, Guatemala, India, Rwanda, Namibia, Saudi Arabia, and the United States. Chapters also discuss social, emotional, and physical developmental topics throughout the lifespan, including infancy, early childhood, adolescence, emerging adulthood, and adulthood. Topics featured in this book

include: The link between cultural differences in academic success to parents' academic socialization practices. The impact of culturally-specific parental engagement in positive developmental outcomes in children. Transgender children and their parents. The relationship between religious and secular values and their influence on creating polygamous teenagers. How to implement a micro-cultural lens to studying parent-child relationships during emerging

adulthood. Differences and similarities in grandparenting among different cultures. *Parents and Caregivers Across Cultures* is a must-have resource for researchers, professors, graduate students as well as clinicians, professionals, and policymakers in the fields of developmental and cross-cultural psychology, parenting and family studies, social work, and related disciplines. *Parents and Caregivers Across Cultures* Routledge The Evidence Act, 2011,

repealed the old Evidence Act. In doing so, the new Act introduced some changes in the Law of Evidence. Ever since, there has been an urgent need for scholastic guidance, in the proper approach to the interpretation of the provisions embodying those changes. This is particularly so, as the courts have been issuing contradictory interpretations of these provisions. In his new book, *Law of Evidence in Nigeria: Practice and Procedure*, the veteran

author and urbane man of letters, Professor Simon Uchenna Ortuanya, masterfully plumbs the intention of the draft's persons of the Act. The result is a five-hundred-and-forty-page treatise of redoubtable erudition. The succinct titles of the different chapters are quite captivating just as the logical presentations of ideas are very illuminating. The book bears the imprints of the erudite author's versatility in the Law of Evidence - a course he has taught, admirably, in two public

universities years.

RDA Around the World
Kluwer Law International
B.V.

This book provides a snapshot of the implementation in various countries around the world of the international cataloging standard RDA: resource description and access. All stages of implementing a new standard are covered, from initial assessment and impact analysis through translation, staff training, and data migration, to implementation and user

orientation. Contributions include the results of detailed research into awareness of the standard in professional groups, differences between catalog metadata produced using RDA and current local standards, and the effect of RDA on the presentation of catalog displays to the end user. The contributions cover aspects of RDA implementation in Canada, China, German-speaking countries, Iran, Israel, Mexico, the Philippines, Singapore,

and Turkey, and French, German and Spanish translation activity. The information contained will be relevant for many years to come, for those who are intending to implement RDA, review the quality of legacy data, measure the impact of the globalization of cataloguing data, or prepare for education and orientation in international bibliographic standards. This book was published as a special double issue of *Cataloging and Classification Quarterly*.

Report of the ... Session of the Joint Scientific Committee United Nations Informed by critical race theory and based on a wide range of sources, including official sources, memoirs, and anthropological studies, this book examines multiple forms of racial discrimination in Jamaica and how they were talked about and experienced from the end of the First World War until the demise of democratic socialism in the 1980s. It also pays attention to practices devoid of racial

content but which equally helped to sustain a society stratified by race and colour, such as voting qualifications. Case studies on the labour market, education, the family and legal system, among other areas, demonstrate the extent to which race and colour shaped social relations in the island in the decades preceding and following independence and argue that racial discrimination was a public secret - everybody knew it took place but few dared to openly discuss or criticise

it. The book ends with an examination of race and colour in contemporary Jamaica to show that race and colour have lost little of their power since independence and offers some suggestions to overcome the silence on race to facilitate equality of opportunity for all.

Dominion Law Reports

Government Printing Office

It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting

the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative

approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions. (3) Notes - Author's notes before and after each caselaw or

topic fulfil four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application. *Records & Briefs New York State Appellate Division* National Academies Press Grounded in the grandeur

of the sub-Saharan wilderness, *The Story of Bones* traces a remarkable boy's journey from a hardscrabble cassava farm to the rarified world of a private African safari camp. Bones comes of age facing heartache, deprivation, and formidable human adversaries—the most dangerous creatures in Africa. His path to love and fulfillment awakens a passion for imperiled animals while forging loyalties that force him to make a wrenching

decision. The narrative pulses with tension and unforeseen twists. Provocative and moving, *The Story of Bones* builds to a powerful appeal for the preservation of Africa's most endangered species. An author at the peak of her storytelling powers, Donna Cousins transports readers to the sights, sounds, smells, and realities—both harsh and beautiful—of the African bush. Foreword

Reports of Planetary Geology and Geophysics Program - 1988 Springer

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential

mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Labour Law in Cyprus
Wolters Kluwer India Pvt. Ltd.
Rearview Perspective (HB)

By: Dr. Vincent Conville
Orphaned at an early age in his native Jamaica, Dr. Conville looks back on a life beset with obstacles he managed to overcome to become a successful educator. Rearview Perspective follows his story as he wandered from pillar to post, exploited and abused by family and strangers alike. Through determination, hard work, and a few caring educators, he broke free from the chains of poverty to become a passionate educator who inspired his so-called

underprivileged students to appreciate their innate value and ability and to strive to realize their potential. Dedicating himself to a life of service, Dr. Conville hopes his story will serve as an inspiration to others, especially his grandchildren: there is no obstacle that cannot be overcome; where there is a will, there is indeed a way.
