Teaching History with Big Ideas Princeton Review

Learn from the Engagement Masters Education is a battle for attention. Whether you are a teacher trying to reach a classroom full of students or a parent trying to prepare your child for the world to come, getting our audience to just listen can be a real challenge. When students have access to personalized entertainment sitting in their pockets, anything that doesn't jump

out and grab their attention right away is easily drowned out. But there is a place where even today all those modern distractions melt away--Disneyland. When you're there, you're not only in a different world, you're in Walt Disney's world. Whether you are Peter Pan flying over London in Fantasyland or a rebel fighter struggling against the First Order in Galaxy's Edge, you are 100% engaged. Sights, sounds and even smells ensure that your brain is locked into the experience. If we can bring those techniques into our teaching, we can create engaging experiences for our students, grab their attention, and boost their learning. You'll improve your teaching and create a place students want to visit. In this book we'll learn from the world's greatest engagement masters--the Disney Imagineers. Through narrative visits to attractions throughout Disneyland and Disney California Adventure, you'll experience a visit to the park as we share memories and see how the Imagineers make it all work. We'll be guided by Imagineering icon Marty Sklar's Mickey's 10 Commandments of Theme Park Design as we turn our classrooms into the most engaging places on Earth!

In the case studies that make up the bulk of this book, middle and high school history teachers describe the decisions and plans and the problems and possibilities they encountered as they ratcheted up their instruction through the use of big ideas.

Framing a teaching unit around a question such as 'Why don't we know anything about Africa?' offers both teacher and students opportunities to explore historical actors, ideas, and events in ways both rich and engaging. Such an approach exemplifies the construct of ambitious teaching, whereby teachers demonstrate their ability to marry their deep knowledge of subject matter, students, and the school context in ways that fundamentally challenge the claim that history is 'boring.'

Institutes of the Christian Religion is John Calvin's original work of systematic theology. Regarded as one of the most influential works of Protestant theology, it was published in Latin in 1536 (at the same time as Henry VIII of England's Dissolution of the Monasteries) and in his native French language in 1541, with the definitive editions appearing in 1559 (Latin) and in 1560 (French). The book was written as an introductory textbook on the Protestant creed for those with some previous knowledge of theology and covered a broad range of theological topics from the doctrines of church and sacraments to justification by faith alone and Christian liberty. It vigorously attacked the teachings of those Calvin considered unorthodox, particularly Roman Catholicism, to which Calvin says he had been "strongly devoted" before his conversion to Protestantism. The Institutes is a highly regarded secondary reference for the system of doctrine adopted

by the Reformed churches, usually called Calvinism.

A world forever changed... In 1450, all of western Europe's books were hand-copied and amounted to no more than are in a modern public library. By 1500, printed books numbered in the millions. Johann Gutenberg's invention of movable type ignited the explosion of art, literature, and scientific research that accelerated the Renaissance and led directly to the Modern Age. In Gutenberg, you'll meet the genius who fostered this revolution, discover the surprising ambitions that drove him, and learn how a single, obscure artisan changed the course of history. "His story is one of genius very nearly denied. A few records less, and we would not now be revering the Gutenberg Bible as his. All we would have would be the results: an idea that changed the world and a book that is amongst the most astonishing objects ever created—a jewel of art and technology, one that emerged fully formed, of a perfection beyond anything required by its purpose. It is a reminder that the business Gutenberg started . . . contains elements of the sublime—that at the heart of the mountains of printed dross there is gold." —From the Introduction to Gutenberg
