SAP S/4HANA Delta for CO Configuration Espresso Tutorials GmbH  
SAP Certified Technology Associate - SAP Fiori System  
Administration These questions are similar to the ones asked in  
the actual Test. How should I know? I know, because although I  
have been working as an SAP Fiori Consultant for many years, I  
have myself recently certified with the latest version of the  
Technology Associate Certification test. Before you start here are  
some Key features of the SAP Certified Technology Associate -  
SAP Fiori System Administration Exam. This certification exam  
verifies that the candidate has the knowledge required in the

area of SAP Fiori System Admin. This certificate builds on the  
basic knowledge gained through related SAP Fiori training and  
preferably refined by practical experience within an SAP Fiori  
project team, whereby the consultant applies acquired knowledge  
in this specialist area practically in projects.. The exam is  
Computer based and you have three Hours to answer 80  
Questions. The Questions are (mostly) multiple choice type and  
there is NO penalty for an incorrect answer. Some of the  
Questions have more than one correct answer. You must get ALL  
the options correct for you to be awarded points. For questions  
with a single answer, the answers will have a button next to  
them. You will be able to select only one button. For questions  
with multiple answers, the answers will have a 'tick box' next to  
them. This allows you to select multiple answers. You are not

allowed to use any reference materials during the certification test (no access to online documentation or to any SAP system). Clearing the Certification will not automatically lead you to a job. However a Certification with some project experience will certainly open a lot of doors for you. So if you have little or no experience, you should get yourself certified, get some project experience, and then the whole of the SAP World open for you to explore. Helping you with the first step on your ladder to success is this book! Some UNIQUE features of this Book: - There is NO Other material in the market for the SAP Certified Technology Associate - SAP Fiori System Administration Exam. - The author has himself cleared the exam. - All questions are multiple choice format, similar the questions you will get in the actual exam. - Over 100 authentic questions, testing the exact same concepts that will be tested in Your exam!

Getting Started with SAPUI5 Espresso Tutorials GmbH

With their latest product, SAP S/4HANA, SAP is revolutionizing how we approach finance by re-architecting data persistency and merging accounts and cost elements. This book offers a fundamental introduction to SAP S/4HANA Finance. Dive into the three pillars of innovation including SAP Accounting powered by SAP HANA, SAP Cash Management, and SAP BI Integrated Planning. Find out about the new configuration options, updated data model, and what this means for reporting in the future. Get a first-hand look at the new user interfaces in SAP Fiori. Review new universal journal, asset accounting, material ledger, and account-based profitability analysis functionality. Examine the steps required to migrate to SAP S/4HANA Finance and walk through the deployment options. By using practical examples,

tips, and screenshots, this book helps readers to: - Understand the basics of SAP S/4HANA Finance - Explore the new architecture, configuration options, and SAP Fiori - Examine SAP S/4HANA Finance migration steps - Assess the impact on business processes

Seminar paper from the year 2017 in the subject Computer Science - Commercial Information Technology, grade: 1.7, Heilbronn University, language: English, abstract: Today almost every software and websites has a mobile compatible version and everyone can check anything on his mobile or tablet. This wasn't the case 7-8 years ago. For SAP, Graphical User Interface as known as GUI was very powerful at the time when SAP launched its ERP software. With time, many other software exists with the fleet of HTML5 based powerful and more appealing modern UI-technology. For this, the old GUI was not able to stand with it. As everyone knows, today are smartphones and tablets more powerful than pc's. So, it was very important for SAP to find a solution and its was SAP Fiori - "One UX for all SAP Products". Fiori is based on a framework known as SAPUI5 which is built on top of HTML5 and is compatible with any device and any screen size. The first announcement from SAP about Fiori was in May 2013 with the first release of 25 transactional Fiori apps for the most common business functions, such as self-services tasks which known as ESS/MSS. Today, there are more than 1140 true Fiori apps available in Fiori library. The number of apps can partially supplement the previous GUI transactions. SAP offers three types of Fiori apps with different database requirements. A

distinction is made between Transactional apps, Analytical apps and factsheets. Only Transactional apps can run on any database that supports SAP ERP. The other 2 types require SAP HANA as database. Since 2013, Fiori has made great progress and will continue in the coming years.

*First Steps in Crystal Reports for Business Users* GRIN Verlag  
 SAP's latest product, SAP S/4HANA, is revolutionizing how we approach finance by re-architecting data persistency and by merging accounts and cost elements. This book offers a fundamental introduction to SAP S/4HANA Finance, explaining how Accounting and Controlling have merged, and how they integrate with planning and group reporting. Learn about the new con-figuration options, updated data models, and what this means for reporting in the future. Obtain a first-hand look at the new user interfaces in SAP Fiori. Review the new universal journal, asset accounting, material ledger, and margin analysis functionality. Examine the steps required to migrate to SAP S/4HANA Finance and walk through the deployment options. Explore the new possibilities for reporting and analysis. Learn how to set up roles and business catalogs to provide users with access to the Fiori applications, and gain an understanding of the various types of applications. By using practical examples, tips, and screenshots, this book helps readers to: - Understand the basics of SAP S/4HANA Finance - Explore the new architecture, updated configuration options, and SAP Fiori - Examine SAP S/4HANA Finance migration steps - Understand alternative deployment options, such as a central finance deployment  
Decision-Maker's Guide to SAP S/4HANA Cloud, essentials edition  
 Espresso Tutorials GmbH

Dive into this expertly written introduction to embedded analytics in SAP. Get quickly up to speed on the most-important embedded analytics concepts and tools available in SAP S/4HANA. Walk through project activities and get the answer to the question-how much of SAP standard can I use? Obtain an overview of front-end tools including KPIs, multidimensional reporting client, and view/query browser. Learn how to build your own KPIs and reports. Explore custom query options, including those based on CDS technology and BW modeling tools. Get practical advice for managing roles and authorizations. Dive into a list of the most-frequently asked questions. - Explore SAP S/4HANA Embedded Analytics - Look at front-end tools including multidimensional clients - Learn how to build your own KPIs and reports - Identify custom query options

Basics in Business Informatics Espresso Tutorials GmbH

Dive into agent determination in SAP Business Workflow in this comprehensive guide. Explore the types of workflow agents and how each agent type is defined. Discover how agent types can be defined within the task and workflow definition. Explore workflow rules and clarify the various options for defining rules. Obtain expert advice on the functionality available to agents for processing work items and how to support them as a workflow administrator. Walk through the available reports that focus on the agents of workflow instances and learn how to identify errors, pinpoint areas for improvement, and reveal bottlenecks in workflow processes. Learn about best practices for agent administration and troubleshoot common errors. Examine detailed workshops exploring rule definition, modeled deadlines, ad hoc agents, and release procedures.

- Fundamentals of SAP Business Workflow agent types and agent determination
- Example rules defined using responsibilities, ABAP, evaluation paths, organizational data, and BRF+
- Agent administration and reporting
- Deep dive workshops exploring rule definition, modeled deadlines, ad hoc agents, and release procedures

*First Steps in SAP SuccessFactors - Performance and Talent Management* Espresso Tutorials GmbH

Are you wondering what SAP Fiori is all about? Dive into SAP's new user interface and gain an understanding of core SAP Fiori concepts and get quickly up to speed SAP Fiori functionality, architecture, prerequisites, and technical components. Walk through key configuration and get examples of what has gone well (and not so well) on real SAP Fiori implementation projects. Take a technical deep dive into the types of Fiori apps including transactional apps, analytics apps, and fact sheets and walk through custom development and enhancements. By using practical examples, tips, and screenshots, the author brings technical and non-technical readers alike up to speed on SAP Fiori. - SAP Fiori fundamentals and core components - Instructions on how to create and enhance an SAP Fiori app - Installation and configuration best practices - Similarities and differences between SAP Fiori and Screen Personas

**First Steps in SAP second edition** Espresso Tutorials GmbH  
Core Data Services (CDS) is SAP's method of defining persistent data models in the database layer. CDS is a key piece of the SAP HANA landscape, speeding up data retrieval by pushing database processing to the database engine. This books provides a

practical introduction to the SQL-based functionality and methods. Learn how to use SAP HANA Studio to utilize perspectives to create objects in the SAP HANA database, including the SAP HANA development perspective. Use syntax to create non-CDS database artifacts via SAP HANA Studio development perspective using SAP HANA XS Classic. Explore CDS artifacts, how to use SAP HANA XS to define an artifact, and dive into a detailed example of how to create objects using a CDS concept. Learn how to create CDS objects using SAP HANA web-based development workbench, SAP Web IDE for SAP HANA, and SAP HANA Studio ABAP Workbench. Explore two methods to extract data from CDS views using ABAP. - Get an introduction to CDS and SAP HANA Studio - Create CDS views and code new structures in ABAP - Use templates, associations, and annotations - Explore select clauses and aggregate functions

With the conversion from SAP ERP to SAP S/4HANA, the concept of classic customers and vendors is a thing of the past. SAP

Business Partner is now the leading object for processing master data information for customers and vendors. Transactions such as FD01/FK01, FD02/FK02 and XK01/XK02 are automatically redirected to the leading transaction BP. In this practical guide, learn step by step how to work with SAP Business Partner, including primary customization settings, and the creation of an SAP business partner with single and grouped roles. Specialized topics such as search help, field attributes, and authorizations are also covered. A comparison of greenfield and brownfield approaches is an essential aspect of this book. For readers who want, or need, to migrate their current data, guidance is provided on business partner conversion types. This guide pays special attention to master data synchronization via the CVI Cockpit, including the assignment of number ranges and intervals. - The SAP Business Partner concept - SAP Business Partner integration in SAP ERP and SAP S/4HANA - SAP Business Partner synchronization and Customer-Vendor Integration (CVI) - Overview of customization settings and master data maintenance

**First Steps in SAP S/4HANA Embedded Analytics** Espresso Tutorials GmbH

SAPUI5 has quickly become the open-source programming language with the best options for responsive and versatile SAP app development. So how well do you speak SAPUI5, and what can you do with it? Learn to develop next-generation UIs for mobile-ready, data source-agnostic, client-side SAP applications. First review basic HTML5 and CSS3, JavaScript, and jQuery concepts as a foundation for working with SAPUI5, and then explore the development and runtime environments, tools, and controls that you'll use throughout the design process. Use step-

by-step instructions, sample code listings, and a full-scale model application to develop and customize your own apps with advanced functionality from the SAP system. The future of app development has arrived--make sure you can speak its language.

1. Basic Concepts Learn the standards of SAPUI5--HTML5, CSS3, JavaScript, and the jQuery library--so you don't have to reinvent the wheel every time  
 2. SAPUI5 Runtime Environment Use bootstrapping, data binding, and theming elements to ensure that your applications run smoothly on operating systems and that the software modules can be reused.  
 3. SAPUI5 in SAP HANA Develop your own application on the XS Engine in SAP HANA. Then construct a calculation view and use it as an OData service.  
 4. UI Components and Controls Implement the SAPUI5 controls and elements you've learned in a detailed employee portal example.  
 5. Mobile Development Explore the mobile capabilities of SAPUI5 and SAP Fiori by developing your own cross-platform Hybrid Web Container applications for multiple devices.

Highlights: HTML5 and CSS3 JavaScript and jQuery SAP Gateway and OData SAPUI5 IDE SAPUI5 libraries Model, view, and layout types Application architecture SAPUI5 file optimization Model-view-controller paradigm Customization SAP HANA views SAPUI5 for mobile devices Eclipse
