A thought-provoking and penetrating account of the post-Cold war follies and delusions that culminated in the age of Donald Trump from the bestselling author of *The Limits of Power*. When the Cold War ended with the fall of the Berlin Wall, the Washington establishment felt it had prevailed in a world-historical struggle. Our side had won, a verdict that was both decisive and irreversible. For the world's "indispensable nation," its "sole superpower," the future looked very bright. History, having brought the

United States to the very summit of power and prestige, had validated American-style liberal democratic capitalism as universally applicable. In the decades to come, Americans would put that claim to the test. They would embrace the promise of globalization as a source of unprecedented wealth while embarking on wide-ranging military campaigns to suppress disorder and enforce American values abroad, confident in the ability of U.S. forces to defeat any foe. Meanwhile, they placed all their bets on the White House to deliver on the promise of their Cold War triumph: unequalled prosperity, lasting peace, and absolute freedom. In *The Age of Illusions*, bestselling author Andrew Bacevich takes us from that moment of seemingly ultimate victory to the age of

Trump, telling an epic tale of folly and delusion. Writing with his usual eloquence and vast knowledge, he explains how, within a quarter of a century, the United States ended up with gaping inequality, permanent war, moral confusion, and an increasingly angry and alienated population, as well, of course, as the strangest president in American history.

How far has the American Dream been accessible to black characters in African American literature? The answer to this question requires a deep probing of the emotional and ideological patterns delineated in Black American narratives. This book traces the African American journey from the plantation to the power

dome through multiple socio-artistic perspectives of Black American authorship. It captures numerous referential inventions ranging from the 'colored' to the 'Black American,' while throwing light on the transforming status of America's Native Son, the marked visibility of its Invisible Man, and endless aspirations hovering Just Above My Head. This book highlights how these narratives—despite their authors being fundamentally different in their respective approaches—are connected to each other.

The author met a man when he was aged 12 in Symphony Hall in Boston, MA. He met him again at the age of 23 due to a photographic accident in Alaska. He was the World's Greatest Traveler,

Burton Holmes. Holmes asked the author to join him. They became very close friends until Mr. Holmes died about 15 years later. The author learned about using his mind and why the givers not the takers are the happiest people. An open mind really helps all through life. It makes a game out of life and it makes the winning ever so sweet indeed. Short, happy stories are great to make a day brighter.

Bill Clinton, forty-second president of the United States, is the quintessential baby boomer: on the one hand blessed with a near-genius IQ, on the other, beset by character flaws that made his presidency a veritable soap opera of high ideals, distressing incompetence, model financial stewardship, and domestic misbehavior. In an era of cultural civil war, the Clinton administration fed the public an almost daily diet of scandal and misfortune. Who is Bill Clinton,

though, and how did this baby-boom saga begin? Clinton's upbringing in Arkansas and his student years at Georgetown, Oxford, and Yale universities help us to see his life not only as a personal story but as the story of modern America. Behind the closed doors of the house on the hill above Park Avenue in Hot Springs, the struggle between Clinton's stepfather and mother became ultimately unbearable, causing Virginia to move out and divorce Roger Clinton. Dreading confrontation, Bill Clinton excelled in almost every field save athletics. But the fabled success of the scholarship boy would be marred by the decisions he came to make regarding Vietnam and military service—choices that haunt him to this day. We watch with a mixture of alarm,

fascination, and awe as Bill Clinton does so much that is right—and so much that is wrong. He sets his cap for the star student at Yale, young Hillary Rodham, seducing her with his dreams of a better America and an aw-shucks grin. Wherever he goes, he charms and disarms—young and old, men and women...and more women. He becomes a law professor straight out of college; he contests a congressional election in his twenties—and almost wins it. He becomes attorney general of his state and within two years is set to become the youngest-ever governor of Arkansas, at only thirty-two. Yet, always, there is a curse, a drive toward personal self-destruction—and with that the destruction of all those who are helping him on his legendary path. His affair with

Gennifer Flowers strains his marriage and later nearly scuttles his bid for the presidency. He is thrown out of the governor's office after only one term and suffers a life-shaking crisis of confidence. Though with the stalwart help of a female chief of staff he regains his crown, it is clear that Bill Clinton's charismatic career is a ceaseless tightrope walk above the forces that threaten to pull him down—the most potent of them residing in his own being. Imbued with sympathy, deep intelligence, and the storyteller's art, this extraordinary biography helps us, at last, to understand the real Bill Clinton as he stumbles and withdraws from the 1988 presidential nomination race but enters it four years later, to make one of the most astonishing bids for the presidency

in the twentieth century: the climax of this gripping political, social, and scandalous journey.

“An enjoyable read that provides a substantial amount of detail on the biology, ecology, and distribution of these fantastic animals . . . Highly recommended.” —Choice More than 10,000 years ago spectacularly large mammals roamed the pampas and jungles of South America. This book tells the story of these great beasts during and just after the Pleistocene, the geological epoch marked by the great ice ages. Megafauna describes the history and way of life of these animals, their comings and goings, and what befell them at the beginning of the modern era and the arrival of humans. It

places these giants within the context of the other mammals then alive, describing their paleobiology—how they walked; how much they weighed; their diets, behavior, biomechanics; and the interactions among them and with their environment. It also tells the stories of the scientists who contributed to our discovery and knowledge of these transcendent creatures and the environment they inhabited. The episode known as the Great American Biotic Interchange, perhaps the most important of all natural history “experiments,” is also an important theme of the book, tracing the biotic events of both North and South America that led to the fauna and the ecosystems discussed in this book. “Collectively, this book brings attention to the discovery and natural

history of ancient beasts in South America while providing a broader temporal and geographic background that allows readers to understand their evolution and potential immigration to South America.” —Quarterly Review of Biology “An excellent volume . . . This book is likely to facilitate progress in the understanding of fossil mammals from the Americas.” —Priscum

The U.S. is notoriously ethno- and Eurocentric, often unaware of the rich contributions that are available to it from its own hemisphere. Pazmino addresses that failing and, for people interested in theology and Christian education, explores the wealth of the Latin American experience. From there he poses a model of Christian education influenced by the Latin American viewpoint.

For decades Americans have turned to LIFE to see, understand, and remember the most important events and people of our time. Just as LIFE once opened up the glittering Kennedy White House, LIFE now focuses its lens on Barack Obama. The American Journey of Barack Obama covers the candidate from his childhood and adolescence to his time as editor of The Harvard Law Review and his Chicago activist years, culminating with the excitement and fervor of the historic 2008 Democratic National Convention. The unfolding drama of Obama's life and political career is cinematic in scope, and never has it been presented so compellingly. In addition to a powerful array of photographs that were taken by

many of the country's greatest photographers (and some that were snapped, in the quiet moments, by Obama family members themselves), this book also includes a Foreword by Senator Edward M. Kennedy, an incisive narrative biography and original essays by some of our finest writers, including Gay Talese, Charles Johnson, Melissa Fay Greene, Andrei Codrescu, Fay Weldon, Richard Norton Smith, Bob Greene and several others. Many readers will find a new understanding of Obama. All readers will feel that they are bearing witness to a singular, undeniably American story.

The #1 bestseller that tells the remarkable story of the generations of American artists, writers, and doctors who traveled to Paris, the intellectual, scientific, and artistic capital of the western world, fell in love with the city and its people, and changed America through what they learned, told by America's master historian, David McCullough. Not all pioneers went west. In *The Greater Journey*, David

McCullough tells the enthralling, inspiring—and until now, untold—story of the adventurous American artists, writers, doctors, politicians, and others who set off for Paris in the years between 1830 and 1900, hungry to learn and to excel in their work. What they achieved would profoundly alter American history. Elizabeth Blackwell, the first female doctor in America, was one of this intrepid band. Another was Charles Sumner, whose encounters with black students at the Sorbonne inspired him to become the most powerful voice for abolition in the US Senate. Friends James Fenimore Cooper and Samuel F. B. Morse worked unrelentingly every day in Paris, Morse not only painting what would be his masterpiece, but also bringing home his momentous idea for

the telegraph. Harriet Beecher Stowe traveled to Paris to escape the controversy generated by her book, *Uncle Tom's Cabin*. Three of the greatest American artists ever—sculptor Augustus Saint-Gaudens, painters Mary Cassatt and John Singer Sargent—flourished in Paris, inspired by French masters. Almost forgotten today, the heroic American ambassador Elihu Washburne bravely remained at his post through the

Franco-Prussian War, the long Siege of Paris, and the nightmare of the Commune. His vivid diary account of the starvation and suffering endured by the people of Paris is published here for the first time. Telling their stories with power and intimacy, McCullough brings us into the lives of remarkable men and women who, in Saint-Gaudens' phrase, longed "to soar into the blue."
