In the second edition of *Reading with Meaning*, Debbie Miller shares her new thinking about comprehension strategy instruction, the gradual release of responsibility instructional model, and planning for student engagement and independence. It has been ten years since the first edition, in which Debbie chronicled a year in her own classroom. *Reading with Meaning, Second Edition* supports that work and expands her vision of strategy instruction and intentional teaching and learning. Debbie believes that every child deserves at least a full year of growth during each classroom year and offers planning documents with matching assessments to ensure that no child falls through the cracks. The second edition also provides new book recommendations that will engage and delight students, and current picture books for reading aloud and strategy instruction. This new edition reflects Debbie's professional experiences and judgment, her work in classrooms and collaboration with colleagues, and the current research in the field, showcasing her newest, best thinking.

Reading with Meaning Pembroke Publishers Limited

What's the big idea? That's a question students are asked all the time in papers, assessments, and standardized writing tests of every sort. Whether summarizing research sources or synopsising the plot of a two-hundred page novel, the ability to cut through extraneous details and describe the major themes and highlights of a text is key to success in school and in life. Until now, however,

summarization has been difficult to teach and learn, but with *Summarizing, Paraphrasing, and Retelling*, you'll discover a powerful and practical way to teach these vital skills. *Summarizing, Paraphrasing, and Retelling* is a slim, do-it-all guide that presents everything you need for teaching kids to separate out trivial items in their reading and then identify and communicate the main ideas and crucial details. Emily Kissner breaks summarization down into smaller, more manageable skills—such as paraphrasing, writing synopses, retelling, and restating the main-idea—illustrating what good summarization looks like and how to adjust your teaching to fit your students' needs. She offers not only methods for individual and group instruction, but also handy, reproducible resources, such as assessment checklists, forms for group work, peer-response sheets, and sample passages for students to practice with. Best of all, Kissner's approach is a student-centered alternative to more traditional skill-and-drill preparations. Supported by research and tested in classrooms, *Summarizing, Paraphrasing, and Retelling* gives you both big ideas for powerful teaching and important particulars to help you plan instruction and analyze your students' progress. What's the big idea behind teaching summarizing? Read *Summarizing, Paraphrasing, and Retelling* and find out. *40 Graphic Organizers That Build Comprehension During Independent Reading* Teaching Resources Weaving together the latest knowledge and best practices for teaching children to read, this indispensable text and professional resource provides a complete guide to differentiated instruction for diverse learners. Uniquely integrative, the book places the needs of English language learners and students with disabilities front and center instead of treating them as special topics. Accessible chapters on each of the core components of literacy clearly demonstrate how to link formal and informal assessment to evidence-based instruction. Special features include Research Briefs, Tech Tips, Internet Resources, Reflection and Action Questions, and dozens of reproducible student activities and assessment tools.

Research question and sub-questions: How will second grade students who are performing below grade level in reading benefit from using stuffed animals and graphic organizers during homogeneous group instruction to aid them in retelling with beginning, middle, and end? (1) How will student's discussion with others about a book lead to increased motivation and retelling skills in reading? (2) Will students be able to use character names and correct pronouns when retelling the story using tangible figures to represent the characters during retelling? (3) Will having students

explain the events of the story to a peer or family member, increase their retelling abilities?

Research activities: Context: This intervention took place in a self-contained second grade classroom of 18 students. The research focused on four students, three of which were English Language Learners. These four below grade level readers struggled with comprehension, specifically retelling. Methods and data: Students were taught about basic story structure: beginning, middle, and end. They were taught how to retell the events of the story using both stuffed animals and a graphic organizer to represent the characters in the story. After practicing this strategy, students worked in their homogeneous reading group, read a book at their level, and manipulated the stuffed animals to retell the story. As homework, students were asked to share the story with their siblings, parents, or friends. The following day, students told the story to a peer using the figures to help them. Data sets included collection of reading levels, comprehension scores, retelling scores, as well as attitudinal data about reading. Results: Comparisons of baseline and outcome data indicate that the stuffed animals and graphic organizers did positively aid in retelling. The graphic organizer allowed students to organize their thoughts of the events that occurred using first, then, next, and last. The graphic organizer also provided all students, especially the English Learners, with a visual aid to see that the story could be divided into sections such as beginning, first middle, second middle, and then last. It also provided vocabulary reminders by having the words first, next, then, and last in the separate boxes. By using stuffed animals and building the foundation of relating and representing the character with the stuffed animals, students were able to use correct pronouns and character names with more accuracy. The homogenous grouping allowed students to have less anxiety and focus on the task while increasing both their retelling and motivation. Grade level: Second Grade. Data collection methods: Oral Summaries, Observation-Student Engagement/Behavior Tallies, Reading Assessment, Survey-Attitude. Curriculum areas: Reading, English Language Arts. Instructional approaches: Graphic Organizers, Reading Comprehension, Reading Fluency.
