BRIANNA BROOKLYNN

A Very, Very Noisy Tractor Lion Children's

Covering the Hellenistic and Imperial periods in both pagan polytheistic as well as Jewish monotheistic settings, this edited collection focuses on individuation in everyday religious practices across the ancient Mediterranean as identified in institutional developments and philosophical reflections on the self.

Unani Murielle Bourdon Auteur

George is taking pictures of wild animals and their tracks for his photo collection. While looking for the fawn his friend Bill spotted, he finds an unusual set of tracks. George thinks he has discovered dinosaur footprints—which would make the perfect addition to his collection! In hopes of getting a photo, he attempts to lure the dinosaur with food, but quickly remembers that some dinosaurs are not friendly. Eventually George discovers the real culprit behind the tracks and it's not what he

expects!

'I wish to remain single, for I have made a vow of virginity.'This is the remarkable story of the twelfth-century recluse Christina, who became prioress of Markyate, near St Albans in Hertfordshire. Determined to devote her life to God and to remain a virgin, Christina repulses the sexual advances of the bishop of Durham. In revenge he arranges her betrothalto a young nobleman but Christina steadfastly refuses to consummate the marriage and defies her parents' cruel coercion. Sustained by visions, she finds refuge with the hermit Roger, and lives concealed at

Markyate for four years, enduring terrible physical and emotional torment. EventuallyChristina is supported by the abbot of St Albans, and her reputation as a person of great holiness spreads far and wide.Written with striking candour by Christina's anonymous biographer, the vividness and compelling detail of this account make it a social document as much as a religious one. Christina's trials of the flesh and spirit exist against a backdrop of scheming and corruption and all-too-human greed.

Curious George Visits the Library Duke University Press

There was once a poor little girl called Karen. In summer, she walked barefoot and in winter, she

wore clogs that hurt her feet. She had no choice, it was all she had. Dame Shoemaker wanted to help her and sewed, as best she could, a pair of red shoes. When she wore them for the first time, Karen's life took an unexpected turn. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's literature, his birth date, April 2, is celebrated as International Children's Book Day.

The New York Times Bestseller '[An] earth-shaking exposé of clerical corruption' - National Catholic Reporter In the Closet of the Vatican exposes the rot at the heart of the Vatican and the Roman Catholic Church today. This brilliant piece of investigative writing is based on four years' authoritative research, including extensive interviews with those in power. The celibacy of priests, the condemnation of the use of contraceptives, the cover up of countless cases of sexual abuse, the resignation of Benedict XVI, misogyny among the clergy, the dramatic fall in Europe of the number of vocations to the priesthood, the plotting against Pope Francis - all these issues are clouded in mystery and secrecy. In the Closet of the Vatican is a book that reveals these secrets and penetrates this enigma. It derives from a system founded on a clerical culture of secrecy which starts in junior seminaries and continues right up to the Vatican itself. It is based on the double lives of priests and on extreme homophobia. The resulting schizophrenia in the Church is hard to fathom. But the more a prelate is homophobic, the more likely it is that he is himself gay. 'Behind rigidity there is always something hidden, in many cases a double life'. These are the words of Pope Francis himself and with them the Pope has unlocked the Closet. No one can claim to really understand the Catholic Church today until they have read this book. It reveals a truth that is extraordinary and disturbing.

"You want the dreams they dreamed of to come true-Then They Do." That line from one of country music's best songs in recent memory pretty much sums up the way millions of parents feel about their children. Many times as they are growing up and driving you crazy, you dream of when they will be out of the house-and you will have your life back again-and then they do. Then They Do is filled with heartwarming, and sometimes tear-inducing, stories from parents about cherishing the moments with your children and celebrating the fine young men and women they have become. This book will serve as a reminder to parents to seize those moments when their tiny ones are still underfoot, and will be a nostalgia-inducing keepsake for those whose children have moved upwards and onwards. A fine gift for parents young and old or for grown children in the midst of raising their own families.

Curious George Goes to a Costume Party Houghton Mifflin Harcourt

"An essential read for anyone interested in the stories of the animals in our home or on our plate."—BBC Focus Without our domesticated plants and animals, human civilization as we know it would not exist. We would still be living at subsistence level as hunter-gatherers if not for domestication. It is no accident that the cradle of civilization—the Middle East—is where sheep, goats, pigs, cattle, and cats commenced their fatefully intimate association with humans. Before the agricultural revolution, there were perhaps 10 million humans on earth. Now there are more than 7 billion of us. Our domesticated species have also thrived, in stark contrast to their wild ancestors. In a human-constructed environment—or man-made world—it pays to be domesticated.

Domestication is an evolutionary process first and foremost. What most distinguishes domesticated animals from their wild ancestors are genetic alterations resulting in tameness, the capacity to tolerate close human proximity. But selection for tameness often results in a host of seemingly unrelated by-products, including floppy ears, skeletal alterations, reduced aggression, increased sociality, and reduced brain size. It's a package deal known as the domestication syndrome. Elements of the domestication syndrome can be found in every domesticated species—not only cats, dogs, pigs, sheep, cattle, and horses but also more recent human creations, such as domesticated camels, reindeer, and laboratory rats. That domestication results in this suite of changes in such a wide variety of mammals is a fascinating evolutionary story, one that sheds much light on the evolutionary process in general. We humans, too, show signs of the domestication syndrome, which some believe was key to our evolutionary success. By this view, human evolution parallels the evolution of dogs from wolves, in particular. A natural storyteller, Richard C. Francis weaves history, archaeology, and anthropology to create a fascinating narrative while seamlessly integrating the most cutting-edge ideas in twenty-first-century biology, from genomics to evo-devo.

Sophie is Scarlet Cuento de Luz

Sophie is entering her last year of college, and is doing all the normal things. Taking classes.

Dating. Thinking about a Masters Degree. Helping in her community. Being a Witch. You know, the usual. But when an ordinary student paper gets her embroiled in a life or death game with one of the largest Tech Conglomerates in the world, Sophie must choose. Will she follow in the occult traditions passed down to witches over the centuries, and back out of the fray? Or will she fight for what's right, even going to lengths she knows are wrong? And, when the dust settles, just which sort of witch will she end up being? Trigger Warnings: Discussion of rape, suicide. Depiction of self-harm.

As a result of her own experience with many kind of loss, Stephanie Ericsson offers an intimate, profoundly touching guide for those in grief, legitimizing the complex and often taboo emotions we all feel when loss transforms our lives. In *Companion Through the Darkness*, Stephanie Ericsson defines grief as "the constant reawakening that things are now different." Using a very simple format -- which combines excerpts from her own diary writings with brief essays -- she vividly speaks the language of loss and captures the contradictory, wrenching, and chaotic emotions of grief. The book can be opened at any point to chapters no more than a few pages long on such themes as: Abandonment: The sudden state I am forced into. I no longer belong to you. I no longer belong to anyone. Rage: The state I use to survive seemingly moments of intolerable pain. Humor: The backside of agony. Pity: The look on people's faces when they haven't a clue what to say to me. Transition: The moments, strung out over months, when I know I am no longer the woman I

was, but not quite the woman I am becoming. The result is compelling, intimate, and heartbreakingly truthful -- a book that promises to be enormously sought-after support and touchstone for all those making their own journey through grief.

Companion Through The Darkness Lindhardt og Ringhof

The cat with boots. (Le Maître Chat ou le Chat bottand, in Frenchands) is a European folk tale compiled, in 1695, by Charles Perrault and published in 1697 in his book *Tales of Antañor* (Histoires ou contes du temps passand. Avec des moralitands). as Master Cat or Puss in Boots. 3. It tells the story of a cat that, based on cunning and deceitñYou, get the fortune and the hand of a princess for your master, totally poor. The 1695 handwritten book istodedicated to Mademoiselle, niece of Louis XIV. Puss in Boots was a hit from its first publication and remains popular, despite its ambiguous morals. The character is inspired by at least two stories previously written: the novel *The Pleasant Nights* by Gianfrancesco Straparola (1550, the first part and 1553, the second part) . and the *Pentamerorn* (The tale of tales), collectionorn of stories by Giambattista Basile published in five volumes, from 1634 to 1636. Puss in Boots has inspired designers, composers, choreographers, and just about every type of artist. It appears in the third act of the ballet *The Sleeping Beauty* of Tchaikovsky. In addition, the adaptations of the story have been multiple, from theater to cinema and comics, through opera, parodies ...

"Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture.
