This volume, the fifth in the series Case and Grammatical Relations across Languages, is devoted to

genitive constructions in a range of Indo-European languages (Russian, French, Romanian, German and Swedish), as well as Finnish, Bantu languages and Northern Akhvakh (Northeast Caucasian). Definitions of genitives typically start out from the notion of an inflectional marker, often suffixal, that marks dependency relations of a noun phrase with respect to another noun phrase and conveys possessive meaning. The contributions in this volume demonstrate a huge range of variation in genitives, semantically (from possessive meaning to generalized dependency), morphologically (from affixes to different types of clitics) and syntactically (from adnominal uses to argument relations and adjunct uses). The volume contains both general surveys of genitives and case studies of the semantics, pragmatics and historical development of specific genitive constructions. It will be of interest to scholars and students in syntax, semantics, morphology, typology, and historical linguistics.

A celebrated social psychologist offers a radical new perspective on cultural differences that reveals why some countries, cultures, and individuals take rules more seriously and how following the rules influences the way we think and act. In *Rule Makers, Rule Breakers*, Michele Gelfand, “an engaging writer with intellectual range” (The New York Times Book Review), takes us on an epic journey through human cultures, offering a startling new view of the world and ourselves. With a mix of brilliantly conceived studies and surprising on-the-ground discoveries, she shows that much of the diversity in the way we think and act derives from a key difference—how tightly or loosely we adhere to social norms. Just as DNA affects everything from eye color to height, our tight-loose social coding influences much of what we do. Why are clocks in Germany so accurate while those in Brazil are frequently wrong? Why do New Zealand’s women have the highest number of sexual partners? Why are red and blue states really so divided? Why was the Daimler-Chrysler merger ill-fated from the start? Why is the driver of a Jaguar more likely to run a red light than the driver of a plumber’s van? Why does one spouse prize running a tight ship while the other refuses to sweat the small stuff? In search of a common answer, Gelfand spent two decades conducting research in more than fifty countries. Across all age groups, family variations, social classes, businesses, states, and nationalities, she has identified a primal pattern that can trigger cooperation or conflict. Her fascinating conclusion: behavior is highly influenced by the perception of threat. “A useful and engaging take on human behavior” (Kirkus Reviews) with an approach that is consistently riveting, *Rule Makers, Ruler Breakers* thrusts many of the puzzling attitudes and actions we observe into sudden and surprising clarity.

The Ultimate History of Video Games, Volume 1 Vertical Inc

Just when we thought the darkness menacing the town had been identified, named, and tamed, clear and unclear mysteries of seasons past looming or surfacing, then resolving, not without tears, not without bittersweetness, of course, but satisfyingly, in a tripartite finale, all loose ends tied up into, or at least with, a bow...

The End Tale continues—if only for one last time, in a bonus stage for the ages, as our softie of a protagonist who wished for all parties involved, including himself, maturely enough, to end up happy, sees his reflected image freeze in a mirror and regretfully, regrettably, reaches for it to find himself through the looking glass.

In an alternate reality where bits of the world have been flipped around, the hero comes face to face with the hidden side(s) of familiar faces, along with author NISIOISIN, whose bravura attempt to reimagine character possibilities concludes, with signature flair, the MONOGATARI series proper—thank you for reading.
