Regenerating Urban Land World Bank Publications

Globalisation and the rapid increase in world trade in the past decade have contributed to greater demand for international transport and logistics and, consequently, the expansion of the maritime industry. The dramatic changes in the mode of world trade and cargo transportation make it more important than ever to have a clear understanding of the way in which freight is transported by sea and the role of ports in this exchange. At the cutting edge in its assessment of the industry, Maritime Logistics covers the whole scope of maritime logistics and examines latest logistical developments within the port and shipping industry. With a range of new international contributors, this new edition has been thoroughly revised and updated. There are new chapters on port centric logistics, hinterland logistics and global supply chains, maritime transport and logistics as a trade facilitator, and future trends and developments. Written by a team of international experts with over fifty years' experience in the field, Maritime Logistics provides a truly global perspective. The book covers everything that students of logistics, as well as those working within the industry, need to know about maritime logistics, including shipping lines, containers, tankers, dry bulk, port-centric logistics, and much more.

Putting a Price on Energy Asian Development Bank

In the late 1990s, economic and financial crises raged through East Asia, devastating economies that had previously been considered among the strongest in the developing world. The crises eventually spread to Russia, Turkey, and Latin America, and impacted the economies of many

industrialized nations as well. In today's increasingly interdependent world, finding ways to reduce the risk of future crises—and to improve the management of crises when they occur—has become an international policy challenge of paramount importance. This book rises to that challenge, presenting accessible papers and commentaries on the topic not only from leading academic economists, but also from high-ranking government officials (in both industrial and developing nations), senior policymakers at international institutions, and major financial investors. Six non-technical papers, each written by a specialist in the topic, provide essential economic background, introducing sections on exchange rate regimes, financial policies, industrial country policies, IMF stabilization policies, IMF structural programs, and creditor relations. Next, personal statements from the major players give firsthand accounts of what really went on behind the scenes during the crises, giving us a rare glimpse into how international economic policy decisions are actually made. Finally, wide-ranging discussions and debates sparked by these papers and statements are summarized at the end of each section. The result is an indispensable overview of the key issues at work in these crises, written by the people who move markets and reshape economies, and accessible to not just economists and policymakers, but also to educated general readers.

For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and the role of business government relations in the IB context. Journal of International Business Studies This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity

growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is presented in *The Architects' Handbook* University of Hawaii Press

An Unknown Future and a Doubtful Present Consumers International

Originally published in 1989, this a volume from the Combat Studies Institute "Leavenworth Papers" series. In the fall of 1944, some 56,000 German troops of the XIX Mountain Corps were occupying a strongpoint line just 70 kilometers northwest of Murmansk, about 200 miles north of the Arctic Circle. To clear these enemy forces from Soviet territory, STA VKA ordered General K. A. Meretskov's Karelian Front to plan and conduct an offensive, which was to be supported by Admiral A. G. Golovko's Northern Fleet. This Leavenworth Paper explains the planning and conduct of this offensive, known in Soviet military historiography as the Petsamo-Kirkenes Operation. The Soviet force of approximately 96,000 men was organized into a main attack force of two rifle corps, a corps-size economy-of-force formation, and two envelopment forces, one consisting of two naval infantry brigades and the other of two light rifle corps of two brigades each. The Soviets employed over 2,100 tubes of artillery and mortars, used 110 tanks and self-propelled guns, and enjoyed overwhelming air superiority. Engineer special-purpose troops infiltrated up to fifty kilometers behind German forward positions to conduct reconnaissance before the battle. On 7 October 1944, the Soviets began the offensive with a 97,000-round artillery preparation, followed by an infantry attack.

This publication highlights how public-private partnerships (PPPs) can be effective to meet Asia's growing infrastructure needs. It shows how governments and their development partners can use PPPs to promote more inclusive and sustainable growth. The study finds that successful PPP projects are predicated on well-designed contracts, a stable economy, good governance and sound regulations, and a high level of institutional capacity to handle PPPs. It is the result of a collaboration between the Asian Development Bank, the Korea Development Institute, and other experts that supported the theme chapter "Sustaining Development through Public-Private Partnership" of the Asian Development Outlook 2017 Update.
