MOSHE JULISSA

Political Terrain JHU Press

Every person living with dementia is entitled to the highest standards of wellbeing and health and social care services. This in-depth, evidence-based book identifies how outstanding quality integrated care might be achieved, whether in residential or home-based settings. Experienced dementia researcher Dr Shibley Rahman highlights the key contemporary underpinnings of integrated care that are required for wellbeing for living with dementia, including technology, staff performance, leadership, and intelligent regulation of services. The book addresses the

major challenges to promoting person-centred care, and tackles difficult conversations around spirituality, sexuality and dying well. The crucial importance of promoting physical and mental health is emphasised. Taking into account recent developments in NICE guidelines and Cochrane reviews for dementia, this book presents an opportunity for all those involved in the provision of care for people with dementia to maintain a focus on delivering the best care possible, and to engage with the wider issues surrounding wellbeing. This book will be especially useful to commissioners following the NHS 'new models of care' "vanguards".

Enriching Curriculum for All Students National Academies Press

For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders,

advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

Leave Me Alone and I'll Make You Rich Penguin

The correlation between 'disengagement' and illness in people with dementia living in long-term care settings is becoming more widely recognised, and developing and adapting front-line staff responses to the changing needs of individuals is a crucial factor in addressing this problem. This book presents a complete practical framework for whole person assessment, care planning and review of persons with dementia or signs of dementia (including those with learning disabilities) who are in need of, or already receiving, health and/or social support. The book provides photocopyable assessment forms, guidelines for carrying out the assessment, and suggestions for tailored interventions based on the profile that emerges from the assessment process. The authors also include a clear explanation of the five theoretical components of dementia that are considered in the assessment: health, biography, personality, neurological impairment and social psychology. This good practice guide will provide a step up to the challenge of providing person centred care as a minimum standard rather than just an ideal. Care workers in residential settings and social workers assessing clients for their support requirements will find this an essential resource.

Communities in Action Jessica Kingsley Publishers

The economist and historian Deirdre Nansen McCloskey has been best known recently for her Bourgeois Era trilogy, a vigorous defense, unrivaled in scope, of commercially tested betterment. Its massive volumes, *The Bourgeois Virtues*, *Bourgeois Dignity*,

and Bourgeois Equality, solve Adam Smith's puzzle of the nature and causes of the wealth of nations, and of the moral sentiments of modernity. The world got rich, she argues, not chiefly by material causes but by an idea and a sentiment, a new admiration for the middle class and its egalitarian liberalism. For readers looking for a distillation of McCloskey's magisterial work, *Leave Me Alone and I'll Make You Rich* is what you've been waiting for. In this lively volume, McCloskey and the economist and journalist Carden bring together the trilogy's key ideas and its most provocative arguments. The rise of the west, and now the rest, is the story of the rise of ordinary people to a dignity and liberty inspiring them to have a go. The outcome was an explosion of innovation after 1800, and a rise of real income by an astounding 3,000 percent. The Great Enrichment, well beyond the conventional Industrial Revolution, did not, McCloskey and Carden show, come from the usual suspects, capital accumulation or class struggle. It came from the idea of economic liberty in Holland and the Anglosphere, then Sweden and Japan, then Italy and Israel and China and India, an idea that bids fair in the next few generations to raise up the wretched of the earth. The original shift to liberalism arose from 1517 to 1789 from theological and political revolutions in northwest Europe, upending ancient hierarchies. McCloskey and Carden contend further that liberalism and "innovism" made us better humans as well as richer ones. Not matter but ideas. Not corruption but improvement. *Leave Me Alone and I'll Make You Rich* draws in entertaining fashion on history, economics, literature, philosophy, and popular culture, from growth theory to the Simpsons. It is the perfect introduction for a broad audience to McCloskey's

influential explanation of how we got rich. At a time when confidence in the economic system is under challenge, the book mounts an optimistic and persuasive defense of liberal innovism, and of the modern world it has wrought.

Enriched Care Planning for People with Dementia National Academies Press

Making Tough Decisions about End-of-Life Care in Dementia is a lifeline, an invaluable guide to assist in the late stage of dementia.

Sensory Modulation in Dementia Care Jessica Kingsley Publishers

This book outlines some of the key issues in risk perception, assessment and management in dementia care in a way that is both practical and accessible to a wide range of practitioners. It develops an approach to risk that promotes choice for people with dementia whilst also acknowledging the complex challenges care providers face.

Tired, stressed, and in need of more help from your partner? Imagine running your household (and life!) in a new way... It started with the Sh*t I Do List. Tired of being the "shefault" parent responsible for all aspects of her busy household, Eve Rodsky counted up all the unpaid, invisible work she was doing for her family—and then sent that list to her

husband, asking for things to change. His response was...underwhelming. Rodsky realized that simply identifying the issue of unequal labor on the home front wasn't enough: She needed a solution to this universal problem. Her sanity, identity, career, and marriage depended on it. The result is *Fair Play*: a time- and anxiety-saving system that offers couples a completely new way to divvy up domestic responsibilities. Rodsky interviewed more than five hundred men and women from all walks of life to figure out what the invisible work in a family actually entails and how to get it all done efficiently. With 4 easy-to-follow rules, 100 household tasks, and a series of conversation starters for you and your partner, *Fair Play* helps you prioritize what's important to your family and who should take the lead on every chore, from laundry to homework to dinner. "Winning" this game means rebalancing your home life, reigniting your relationship with your significant other, and reclaiming your Unicorn Space—the time to develop the skills and passions that keep you interested and interesting. Stop drowning in to-dos and lose some of that invisible workload that's pulling you down. Are you ready to try *Fair Play*? Let's deal you in.

Working with Elderly People Jessica Kingsley Publishers
Understand and assess the sensory needs of people with dementia, and learn how to implement sensory modulation-based approaches for enriched care. Drawing on the author's Sensory Modulation Program, this approach aids with self-organization and meaningful participation in life activities. Explaining sensory-processing issues specific to older populations, this book provides a downloadable assessment tool to help review individual sensory-processing patterns. It includes a range of sensory-based

activities which can be carried out with people at all stages of dementia, both with individuals and in groups. The book also provides recommendations for modifying physical environments to make care settings sensory-enriched.

A Family Guide to Living Well with Dementia National Academies Press

Looking at the roles of those who decide on how, what, where and when care is given, as well as those who deliver care, this text outlines recommended measures for working with elderly people who have dementia.

The Pool Activity Level (PAL) Instrument for Occupational Profiling University of Chicago Press

Sensory-being: the enveloping of natural presentness and awareness in an unfolding sensory moment. Sensory Beings: people whose experience of the world, and meaning within it, is primarily sensory. Often these are people who do not have access to language. If you support someone who understands the world in a primarily sensory way, for example someone with PMLD or later stage dementia, you will recognise that they often face periods of time in which they are left without an activity they can access. This unique, practical guide helps you to plan and deliver sensory activities that lead people into a calm, focused state. You are even invited to let the person you support lead you into a state of sensory focus. Written by a leading sensory specialist this book will help you to: View the world as the person you support may view it, and identify times when a sensory-being activity may be appropriate. Understand how to select and create the most engaging, low cost, sensory foci to suit the specific needs of the individuals in your care. Effectively facilitate

sensory-being sessions from start to finish so that the people you care for receive the full and many benefits of calm, focused time. Tried and tested in a diverse range of settings prior to publication, these techniques and practical tools have already helped many people provide an enriched experience of life for those in their care. Throughout the book you will find numerous case studies and insights from parents, carers, special school practitioners, therapists, research institutions and more so that you can benefit from this broad body of experience.

Retooling for an Aging America Jessica Kingsley Publishers

Dual Language Instruction: A Handbook for Enriched Education is an ideal professional reference title for those interested in teaching ESL, foreign language, and bilingual programs. It is a resource guide for implementing, evaluating, administering, and maintaining dual language instruction programs.

Long-Term Care Planning Jessica Kingsley Publishers

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities

can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

Making Tough Decisions about End-of-Life Care in Dementia
Heinle & Heinle Pub

This book will help all health professionals involved in the rehabilitation of older people to provide their patients with the highest possible quality of life and autonomy. Expanded and rewritten by a diverse team of authors, the text is suitable for doctors in all specialties that see older patients, as well as nurses, physiotherapists, occupational therapists, psychologists, dietitians, speech and language therapists/pathologists, physician associates/assistants, healthcare assistants, and many others including patients, family members and students. The book is written in an accessible, no-jargon style and provides a patient-centred perspective on recent advances in the field of rehabilitation – an increasingly important aspect of care for older people. Clear explanations of relevant concepts: ageing, frailty, comprehensive assessment, rehabilitation Broad coverage of all aspects of rehabilitation including different settings Explanations of input from multiple health professionals Problem-based section that highlights solutions to common issues during rehabilitation Specialty-specific areas of rehabilitation such as stroke rehabilitation, cancer rehabilitation, post-operative rehabilitation,

trauma, rehabilitation in the community Practical section explaining how to plan discharge safely, run a care planning meeting, organize home supports, continue rehabilitation at home Evidence-based but accessible writing, complemented by practical clinical wisdom Aimed at a broader audience – applicable to all health professionals who see older patients Resources for patients and their caregivers Multiple-choice questions to test knowledge

Parenting Matters Jessica Kingsley Publishers

Decades of research have demonstrated that the parent-child dyad and the environment of the family—which includes all primary caregivers—are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S.

population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Fratelli Tutti Da Capo Lifelong Books

This fourth edition contains all the latest research on the use of the PAL Instrument, new information on using the PAL Checklist to carry out sensory interventions and information about how a new online PAL tool supports the book. It features photocopiable activity checklists and plans that help to match users' abilities with activities.

Involving Families in Care Homes National Academies Press

Reminiscence is a vital way to stimulate communication and promote confidence and self-worth in people with dementia. This practical guide is designed to give those who care for people with dementia a clear sense of how reminiscence can be used to

greatly improve their quality of life. The book explores how reminiscence can contribute to person-centred dementia care and contains detailed descriptions of activities that can be used in a group setting, for one-to-one reminiscence at home or in a variety of care settings. Based on ideas developed and tested internationally over a period of ten years, the book offers imaginative approaches to reminiscence and a wealth of resources for use in a wide range of situations. The book includes advice on organising a reminiscence project and provides a useful planning tool for group sessions. *Remembering Yesterday, Caring Today* highlights the value of reminiscence for those with dementia and is an essential guide to good practice for family and professional carers.

Dual Language Instruction Corwin Press

The Pocket Book is for use by doctors nurses and other health

workers who are responsible for the care of young children at the first level referral hospitals. This second edition is based on evidence from several WHO updated and published clinical guidelines. It is for use in both inpatient and outpatient care in small hospitals with basic laboratory facilities and essential medicines. In some settings these guidelines can be used in any facilities where sick children are admitted for inpatient care. The Pocket Book is one of a series of documents and tools that support the Integrated Management.

Your Money or Your Life Storey Publishing, LLC

The Oxford Textbook of Old Age Psychiatry is the new edition of the much loved and highly popular multi-author textbook previously published as *Psychiatry in the Elderly*. It has established itself as the standard textbook in its field due to its unique combination of comprehensive coverage, clear writing and up-to-date information.
