 From finding common ground with warlords, introducing the Taliban to change, and working with NFL greats such as Marshawn Lynch, this uplifting and inspirational memoir from coach and personal development expert, Tareq Azim, will help you build a relationship with fear and embrace your own power. A descendant of Afghan nobles, Tareq Azim's family was forced to flee their homeland in 1979. He assimilated in the United States through his love of sports, excelling in wrestling, boxing, and

football. In 2004, Azim decided to visit his home country, and upon arriving, he discovered countless children living on the streets, waiting for the inevitable recruitment into terrorist networks and anti-peace militias. Azim's close encounter with the ravages of a war-torn society taught him how pain can generate the most intense forms of fear, anxiety, and depression. He had found his salvation through sports and physical activity, and he knew these children could, too. He put his method to the test and created the Afghan Women's Boxing Federation, the official governing body for women's sports for the National Olympic Committee and the first ever in the history of any Islamic republic, proving that Afghanistan was ready for social change by addressing the harms of accumulated trauma. Now, his remarkable full story is revealed in this book that is both a memoir and a roadmap. Through his own experiences, he effortlessly explains how fear is an invitation to seek a deeper feeling within—a feeling that is achieved when we engage in righteous and sincere struggle. Only then will our choices be guided by values that help us avoid the pitfalls of moral and personal failure. Featuring actionable advice and varied clear-eyed case studies, including MMA star Jake Shields, former

congresswoman Tulsi Gabbard, and San Francisco 49ers owner Jed York—Empower is the ultimate guide to living a life understanding that fear is there to help you.

With the characteristic professionalism that has made him the preeminent independent journalist in Pakistan for three decades, Rashid asks the important questions and delivers informed insights about the future of U.S. relations with the troubled region. His most urgent book to date, *Pakistan on the Brink* is the third volume in a comprehensive series that is a call to action to our nation's leaders and an exposition of this conflict's impact on the security of the world.

Please note: This is a companion version & not the original book. Book Preview: #1 I had known Omar since I'd started working in Afghanistan, and he'd always dreamed of living in the West. His aspiration had grown urgent as the civil war intensified and his city was torn apart by bombings. #2 I had been sleeping little since I returned from Sanaa, but my tiredness left me as the scene came into focus: the Hindu Kush snowcaps, the slums on the hillside, the Humvee with its turret pointed at the gate. #3 Half the city was escaping that summer. Afghans were losing hope in their country's future, and were preparing to emigrate to America through the Special Immigrant Visa program. #4 I wanted to go with Omar and document the refugee underground, so I proposed the idea to him. He needed to get asylum in Europe first, then come back for Laila. But while he was gone, her father might try to marry her off to someone else.

A ball can start a revolution. Born in Kabul, Awista Ayub escaped with her family to Connecticut in 1981, when she was two years old, but her connection to her heritage remained strong. An athlete her whole life, she was inspired to start the Afghan Youth Sports Exchange after September 11, 2001, as a way of uniting girls of Afghanistan and giving them hope for their future. She chose soccer because little more than a ball and a field is needed to play; however, the courage it would take for girls in Afghanistan to do this would have to be tremendous—and the social change it could bring about by making a loud and clear statement for Afghan women was enough to convince Awista that it was possible, and even necessary. Under Taliban rule, girls in Afghanistan couldn't play outside of their homes, let alone participate in a sport on a team. So, Awista brought eight girls from Afghanistan to the United States for a soccer clinic, in the hope of not only teaching them the sport, but also instilling confidence and a belief in their self-worth. They returned to Afghanistan and spread their interest in playing soccer; when Awista traveled there to host another clinic, hundreds of girls turned out to participate—and the numbers of players and teams keep growing. What began with eight young women has now exploded into something of a phenomenon. Fifteen teams now compete in the Afghanistan Football Federation, with hundreds of girls participating. Against all odds and fear, these girls decided to come together and play a sport that has reintroduced the very traits that decades of war had cruelly stripped away from them—confidence and self-worth. In *However Tall the Mountain*, Awista tells both her own story and the deeply moving stories of the eight original girls, describing their daily lives back in

Afghanistan, and how they found strength in each other, in teamwork, and in themselves—taking impossible risks to obtain freedoms we take for granted. This is a story about hope, about what home is, and in the end, about determination. As the Afghan proverb says, *However tall the mountain, there's always a road.* The Politics of State Intervention Simon and Schuster Winner, International Photography Award, 1st Place, Professional: Book, Documentary, 2016 The Afghan people are standing at a crucial crossroads in history. Can their fragile democratic institutions survive the drawdown of US military support? Will Afghan women and girls be stripped of their modest gains in freedom and opportunity as the West loses interest in their plight? While the media have largely moved on from these stories, Paula Bronstein remains passionately committed to bearing witness to the lives of the Afghan people. In this powerful photo essay, she goes beyond war coverage to reveal the full complexity of daily life in what may be the world's most reported on yet least known country. *Afghanistan: Between Hope and Fear* presents a photographic portrait of this war-torn country's people across more than a decade. With empathy born of the challenges of being an American female photojournalist working in a conservative Islamic country, Bronstein gives voice to those Afghans, particularly women and children, rendered silent during the violent Taliban regime. She documents everything from the grave trials facing the country—human rights abuses against women, poverty and the aftermath of war, and heroin addiction, among them—to the stirrings of new hope, including elections, girls' education, and work and recreation. Fellow award-winning journalist Christina Lamb describes the gains that Afghan women have made since the overthrow of the Taliban, as well as the daunting obstacles they still face. An eloquent portrait of everyday life, *Afghanistan: Between Hope and Fear* is the most complete visual narrative history of the country currently in print. Andrews (economics, Wellesley College) argues that economic foundations of the Civil Rights movement have been destroyed by the combined forces of globalization, technology, and tight government budgets. He fills an important intellectual gap in writing on race by developing an economic analysis of the links between competitive capitalism, racial hostility, and persistent racial inequality in post-Civil Rights America. *Journeys Exposed: Women's Writing, Photography, and Mobility* examines contemporary literature written by women that are all in different ways related to Italy. It argues that photography provides women with a means to expose aspects of their nomadic self and of the others' mobile lives within and beyond the writing process. By resorting to the visual, women individualistically respond to forms of hegemonic power, fragmentation, displacement, loss and marginality, and make these experiences key to their creative production.

This study revolves around the jihad ideas of 'Abd Allāh 'Azzām — an iconic figure in the study of militant jihad in the 20th century, history of Afghan jihad against the Soviet Union, Al-Qaeda and current threat of terrorism. This study has several objectives: to render an in-depth description of his ideas by way of a review of his writing, hitherto little referenced in the literature; to identify how these ideas have inspired so many to participate in militant jihad in the Soviet-Afghan war, and indeed elsewhere; to highlight

the internal contradictions and inconsistencies in 'Azzām's ideas, and to juxtapose these ideas with contemporary jihadism; to identify specific aspects of 'Azzām's ideas in order to extract key lessons for counter-ideology work within the framework of counter-terrorism. The study concludes and makes three key arguments/observations on 'Azzām's jihad ideas; 'Azzām's success in mobilising Muslims for jihad in Afghanistan was not due to his jihad ideas alone, although they mattered to him and were important tools for mobilisation. The study identifies two other non-ideational structural factors that were critical in effecting his mobilisation; some aspects of 'Azzām's jihad ideas have serious implications on national security; some of 'Azzām's jihad ideas diverge from dominant ideas held by current jihadist groups like Al-Qaeda and these could potentially be used to counter contemporary jihad ideas and practices of jihadists.

Key Features: First original in-depth study of 'Azzām's jihad ideas in English. 'Azzām is an interest to any researcher on jihadism and Al-Qaeda Relevant to the current problem of countering jihadist terrorism. It offers suggestions for effective counter ideology against jihadism Will be of interest to researchers of social mobilization and framing theory because it uses framing theory to analyse 'Azzām's ideas. Jamil Jan Kochai breathes life into his contemporary Afghan characters, moving between modern-day Afghanistan and the Afghan diaspora in America. In these arresting stories verging on both comedy and tragedy, often starring young characters whose bravado is matched by their tenderness, Kochai once again captures "a singular, resonant voice, an American teenager raised by Old World Afghan storytellers." \* In "Playing Metal Gear Solid V: The Phantom Pain," a young man's video game experience turns into a surreal exploration on his own father's memories of war and occupation. Set in Kabul, "Return to Sender" follows two married doctors driven by guilt to leave the US and care for their fellow Afghans, even when their own son disappears. A college student in the US in "Hungry Ricky Daddy" starves himself in protest of Israeli violence against Palestine. And in the title story, "The Haunting of Hajji Hotak," we learn the story of a man codenamed Hajji, from the perspective of a government surveillance worker, who becomes entrenched in the immigrant family's life. *The Haunting of Hajji Hotak and Other Stories* is a moving exploration of characters grappling with the ghosts of war and displacement—and one that speaks to the immediate political landscape we reckon with today. \*The New York Times Book Review

"This report represents the Afghan perspective on the operations of Pro-Government Forces (PGF). The incidents documented in

this report have resulted primarily from operations by International Military Forces (IMF), Afghan National Security Forces (ANSF), or joint operations involving airstrikes and nighttime searches of civilian houses ("night raids") ... AIHRC found no systematic attempts by PGF to violate their international obligation of care to civilians. Nonetheless, some PGF practices raise serious concerns."--Executive summary.

For many commentators, September 11 inaugurated a new era of fear. But as Corey Robin shows in his unsettling tour of the Western imagination--the first intellectual history of its kind--fear has shaped our politics and culture since time immemorial. From the Garden of Eden to the Gulag Archipelago to today's headlines, Robin traces our growing fascination with political danger and disaster. As our faith in positive political principles recedes, he argues, we turn to fear as the justifying language of public life. We may not know the good, but we do know the bad. So we cling to fear, abandoning the quest for justice, equality, and freedom. But as fear becomes our intimate, we understand it less. In a startling reexamination of fear's greatest modern interpreters--Hobbes, Montesquieu, Tocqueville, and Arendt--Robin finds that writers since the eighteenth century have systematically obscured fear's political dimensions, diverting attention from the public and private authorities who sponsor and benefit from it. For fear, Robin insists, is an exemplary instrument of repression--in the public and private sector. Nowhere is this politically repressive fear--and its evasion--more evident than in contemporary America. In his final chapters, Robin accuses our leading scholars and critics of ignoring "Fear, American Style," which, as he shows, is the fruit of our most prized inheritances--the Constitution and the free market. With danger playing an increasing role in our daily lives and justifying a growing number of government policies, Robin's *Fear* offers a bracing, and necessary, antidote to our contemporary culture of fear.

How the U.S. empire-state transformed post-1945 Afghanistan into a key site for reimagining development Established in 1961 by President Kennedy, the United States Agency for International Development (USAID) is often viewed as an extension of the security state, playing a constant role on the ground in Afghanistan since the early sixties. *The Quiet Violence of Empire* traces USAID's long and bloody history of development work in the region, revealing an empirically rich account of the transnational entanglements of imperialism and racial capitalism. Wesley Attewell carefully analyzes three chronological moments of development as counterinsurgency in action: the Helmand Valley Project, the Soviet-Afghan conflict, and the post-9/11 occupation in Afghanistan. These case studies expose how USAID's very public commitment to bringing seemingly inclusionary forms of self-help, technical assistance, and market development to Afghanistan has been undergirded by longer-standing infrastructures of race war and racial management. Attewell exposes how one of the net effects of USAID's development mission to Afghanistan has been to constrain the life chances of Afghan beneficiaries while simultaneously diverting development capital back to U.S. contractors, deftly underscoring the notion of development as a form of slow violence. *The Quiet Violence of Empire* asks the critical question: how might we refuse the ruse of USAID and its endlessly deferred promise of development? Thinking relationally across the fields of human geography, global studies, and critical ethnic studies, it uncovers the explicitly racial underpinnings of international development theory and praxis.

The Taliban's takeover of Afghanistan in 2021 was the result of

declining active support for the government, and of waste and inefficiency in aid delivery. Yet, while corrosive, these problems were not in themselves sufficient to have brought about a collapse. To a significant degree, they were the result of early failings in institutional design, reflecting an American inclination to pursue short-term policy approaches that created perverse incentives—thus interfering with the long-term objective of stability. This book exposes the true factors underpinning Kabul's fall. The Afghan Republic came under relentless attack from Taliban insurgents who depended critically on Pakistani support. It also suffered a creeping invasion that put the government on the back foot as the US tried and failed to deal with Pakistan's perfidy. The fatal blow came when bored US leaders naively cut an exit deal with the enemy, fatally compromising the operation of the Afghan army and air force and triggering the final collapse, with top leaders at odds over whether to make a final stand in Kabul. The Afghan Republic did not simply decline and fall. It was betrayed.

Details how presidents utilize mass media to justify foreign policy objectives in the aftermath of 9/11. Modern presidents have considerable power in selling U.S. foreign policy objectives to the public. In *Selling War, Selling Hope*, Anthony R. DiMaggio documents how presidents often make use of the media to create a positive informational environment that, at least in the short term, successfully builds public support for policy proposals. Using timely case studies with a focus on the Arab Spring and the U.S. "War on Terror" in the Middle East and surrounding regions, DiMaggio explains how official spin is employed to construct narratives that are sympathetic to U.S. officialdom. The mass media, rather than exhibiting independence when it comes to reporting foreign policy issues, is regularly utilized as a political tool for selling official proposals. The marginalization of alternative, critical viewpoints poses a significant obstacle to informed public deliberations on foreign policy issues. In the long run, however, the packaging of official narrative and its delivery by the media begins to unravel as citizens are able to make use

of alternative sources of information and assert their independence from official viewpoints. *Selling War, Selling Hope* is an innovative project that pushes the fields of political science, political communication, public opinion, and presidential rhetoric into new and exciting directions. This book is essential reading.

Mark Major, author of *The Unilateral Presidency and the News Media: The Politics of Framing Executive Power* This eye-opening exposition offers a radical new conclusion to the debate over why Americans oppose wars: Americans oppose particular wars for moral reasons. By capturing the wide range of presidential rhetoric from fear to hope, DiMaggio documents the depths plumbed by political and other elites to manipulate the American public to support the wars in Afghanistan and Iraq. In order to counteract American citizens' moral opposition to war, political elites manipulate citizens' fears into support for war by giving them hope, but the policies they choose, more often than not, lead to more war and reason for fear which creates a vicious cycle: fear→hope→war. The challenge we face is to break through the noise and the manipulation of political, economic, and military elites. DiMaggio offers us a way to see clearly.

*The Dogs are Eating Them Now* is a highly personal narrative of our war in Afghanistan and how it went dangerously wrong. Written by a respected and fearless former foreign correspondent who has won multiple awards for his journalism (including an Emmy for the video series "Talking with the Taliban") this is a gripping account of modern warfare that takes you into back alleys, cockpits, and prisons —telling stories that would have endangered his life had he published this book while still working as a journalist. Smith was not simply embedded with the military: he operated independently and at great personal risk to report from inside the war, and the heroes of his story are the translators, guides, and ordinary citizens who helped him find the truth. They revealed sad, absurd, touching stories that provide the key to understanding why the mission failed to deliver peace and democracy. From the corruption of law enforcement agents and the tribal nature of the local power structure to the economics of the drug trade and the frequent blunders of foreign troops, this is the no-holds-barred story from a leading expert on the insurgency.

*With All Our Strength* is the inside story of this women-led underground organization and their fight for the rights of Afghan women. Anne Brodsky, the first writer given in-depth access to visit and interview their members and operations in Afghanistan and Pakistan, shines light on the gruesome, often tragic, lives of Afghan women under some of the most brutal sexist oppression in the world.
